No securities regulatory authority has expressed an opinion about these securities and it is an offence to claim otherwise.

*This prospectus supplement (this "**Prospectus Supplement**"), together with the accompanying short form base shelf prospectus dated December 16, 2025 (the "**Base Shelf Prospectus**" and, as supplemented by this Prospectus Supplement, collectively the "**Prospectus**") to which it relates, as amended or supplemented, and each document incorporated by reference into this Prospectus Supplement and the Base Shelf Prospectus, constitutes a public offering of these securities only in those jurisdictions where they may be lawfully offered for sale and therein only by persons permitted to sell such securities.*

*The securities offered hereby have not been, and will not be, registered under the United States Securities Act of 1933, as amended (the "**U.S. Securities Act**"), or any state securities laws. Accordingly, the securities offered hereby may not be offered or sold, directly or indirectly, to, or for the account or benefit of, a person in the United States or a U.S. person, except pursuant to an available exemption from the registration requirements of the U.S. Securities Act and applicable U.S. state securities laws. This Prospectus Supplement does not constitute an offer to sell or a solicitation of an offer to buy any of the securities offered hereby to, or for the account or benefit of, persons in the United States or U.S. persons. See "Plan of Distribution".*

***Information has been incorporated by reference in this Prospectus Supplement and the Base Shelf Prospectus from documents filed with securities commissions or similar authorities in each of the provinces and territories of Canada**. Copies of the documents incorporated herein by reference may be obtained on request without charge from the Chief Executive Officer of AbraSilver Resource Corp. at 220 Bay Street, Suite 550, Toronto, Ontario, M5J 2W4, Telephone +1 (416) 648-1626, and are also available electronically at www.sedarplus.ca.*

PROSPECTUS SUPPLEMENT

To the Short Form Base Shelf Prospectus dated December 16, 2025

New Issue July 24, 2026

ABRASILVER RESOURCE CORP.

$45,011,400

3,062,000 Common Shares

Price: $14.70 per Common Share

AbraSilver Resource Corp. (the "**Corporation**" or "**AbraSilver**") is hereby qualifying the distribution of 3,062,000 common shares in the capital of the Corporation (the "**Common Shares**") at a price of $14.70 per Common Share (the "**Offering Price**") for aggregate gross proceeds of $45,011,400 (the "**Offering**"). The Offering is being made in each of the provinces and territories of Canada, other than Québec. The Common Shares are being issued pursuant to an underwriting agreement dated July 24, 2026 (the "**Underwriting Agreement**"), among the Corporation and National Bank Financial Inc., Beacon Securities

Limited, and Raymond James Ltd., as co-bookrunners (collectively, the "**Bookrunners**"), together with Scotia Capital Inc. and TD Securities Inc. (collectively with the Bookrunners, the "**Underwriters**"), relating to the Common Shares offered by this Prospectus. See "Plan of Distribution".

The Common Shares are listed on the Toronto Stock Exchange (the "**TSX**") under the symbol "ABRA" and the OTCQX Best Market (the "**OTCQX**") under the symbol "ABBRF". On July 22, 2026, the last trading day prior to the announcement of the Offering, the closing price of the Common Shares on the TSX and OTCQX was $15.63 and US$11.07 per Common Share, respectively. On July 23, 2026, the last trading day prior to the date of this Prospectus Supplement, the closing price of the Common Shares on the TSX and OTCQX was $14.94 and US$10.64 per Common Share, respectively. The Corporation has applied to list the Common Shares distributed under this Prospectus on the TSX. The TSX has not conditionally approved the Corporation's listing application and there is no assurance that the TSX will approve the listing application. Listing will be subject to the Corporation fulfilling all of the listing requirements of the TSX. See "Plan of Distribution" and "Risk Factors".

	Price to the Public[(1)]	**Underwriters' Commission[(2)]**	**Net Proceeds to the Corporation[(3)(4)]**
Per Common Share	$14.70	$0.8085	$13.8915
Total[(5)(6)]	$45,011,400	$2,475,627	$42,535,773

(1) The Offering Price was determined by arm's length negotiation between the Corporation and the Bookrunners with reference to the prevailing market price of the Common Shares. Assumes no exercise of the Over-Allotment Option (as defined herein).

(2) The Corporation has agreed to pay the Underwriters a cash commission (the "**Underwriters' Commission**") equal to 5.5% of the gross proceeds from the Offering (including any gross proceeds raised on exercise of the Over-Allotment Option).

(3) After deducting the Underwriters' Commission, but before deducting the expenses of the Offering (estimated to be approximately $500,000), which together with the Underwriters' Commission, will be paid from the gross proceeds of the Offering. Assumes no exercise of the Over-Allotment Option.

(4) The Underwriters have been granted an over-allotment option, exercisable, in whole or in part, at any time, and from time to time, on or before the 30th day following the Closing Date (as defined herein) (the "**Over-Allotment Deadline**"), to purchase up to an additional 339,000 Common Shares (the "**Over-Allotment Shares**") at the Offering Price to cover the Underwriters' over-allocation position, if any, and for market stabilization purposes (the "**Over-Allotment Option**"). The Over-Allotment Option may be exercised by the Underwriters to acquire Over-Allotment Shares at the Offering Price. The Over-Allotment Option is exercisable by the Underwriters giving notice to the Corporation prior to the Over-Allotment Deadline, which notice shall specify the number of Over-Allotment Shares to be purchased. If the Over-Allotment Option is exercised in full for Over-Allotment Shares, the total "Price to the Public", "Underwriters' Commission" and "Net Proceeds to the Corporation" will be $49,994,700, $2,749,708.50 and $47,244,991.50, respectively. This Prospectus qualifies the grant of the Over-Allotment Option and the distribution of Over-Allotment Shares issuable upon exercise of the Over-Allotment Option. A purchaser who acquires Over-Allotment Shares forming part of the Underwriters' over-allocation position acquires those Over-Allotment Shares under this Prospectus Supplement and the Prospectus, regardless of whether the over-allocation position is ultimately filled through the exercise of the Over-Allotment Option or secondary market purchases. See "Plan of Distribution".

(5) Assumes no exercise of the Over-Allotment Option.

(6) The aggregate net proceeds of the Offering (before the exercise of the Over-Allotment Option), will be $42,035,773, after deducting the Underwriters' Fee of $2,475,627 and the estimated expenses of the Offering of $500,000. If the Over-Allotment Option is exercised in full, the aggregate net proceeds of the Offering will be $46,744,991.50, after deducting the Underwriters' Fee of $2,749,708.50 and the estimated expenses of the Offering of $500,000.

Unless the context otherwise requires, when used herein, all references to the "Offering" include the exercise of the Over-Allotment Option and all references to "Common Shares" include the Over-Allotment Shares issuable upon exercise of the Over-Allotment Option.

The following table sets out the maximum number of additional securities issuable in connection with the Over-Allotment Option, assuming the exercise of the Over-Allotment Option in full:

Underwriters' Position	Maximum Number of Securities Available	Exercise Period	Exercise Price
Over-Allotment Option	339,000 Over-Allotment Shares[(1)]	On or before the 30th day following the Closing Date	$14.70 per Over-Allotment Share

(1) Assumes the exercise of the Over-Allotment Option in full for Over-Allotment Shares.

The Corporation has entered into (i) an investor rights agreement dated April 26, 2024, as amended February 11, 2025 with Proener SAU, an affiliate of Central Puerto SA ("**Central Puerto**"), and (ii) an investor rights agreement dated April 26, 2024 with Kinross Gold Corporation ("**Kinross**") (collectively, the "**Investor Rights Agreements**"). Pursuant to each of the Investor Rights Agreements, both Central Puerto and Kinross have the option to purchase such additional number of Common Shares on a private placement basis as to allow each of them to maintain their respective percentage ownership of the Common Shares following the sale of any Common Shares under this Prospectus. In such a case, no commission or other fees will be paid to the Underwriters in connection with any sales to Central Puerto or Kinross. As at the date hereof, Central Puerto and Kinross have not confirmed any exercise in connection with the Investor Rights Agreements, as a result, this Prospectus Supplement does not reflect any proceeds that may be obtained by the Corporation in connection therewith.

The Underwriters, as principals, conditionally offer the Common Shares, subject to prior sale, if, as and when issued by the Corporation and accepted by the Underwriters in accordance with the terms and conditions contained in the Underwriting Agreement referred to under "Plan of Distribution", and subject to the approval of certain legal matters on behalf of the Corporation by Mintz LLP and on behalf of the Underwriters by Cassels Brock & Blackwell LLP.

Subscriptions for the Common Shares will be received subject to rejection or allotment, in whole or in part, and the Underwriters reserve the right to close the subscription books at any time without notice. Closing of the Offering is expected to take place on or about July 29, 2026, or such other date as may be agreed upon by the Corporation and the Bookrunners, on behalf of the Underwriters, each acting reasonably (the "**Closing Date**"). It is anticipated that the Common Shares will be delivered under the book-based system through CDS Clearing and Depository Services Inc. ("**CDS**") or its nominee and deposited in electronic form, or will otherwise be delivered registered as directed by the Underwriters, on the Closing Date. Except in limited circumstances, a purchaser of Common Shares will receive only a customer confirmation from the registered dealer from or through which the Common Shares are purchased and who is a CDS depository service participant. CDS will record the CDS participants who hold Common Shares on behalf of owners who have purchased Common Shares in accordance with the book-based system. No definitive certificates will be issued unless specifically requested or required.

The Underwriters propose to offer the Common Shares initially at the Offering Price. After the Underwriters have made reasonable efforts to sell all of the Common Shares at such price, the offering price for the Common Shares may be decreased, and further changed from time to time, to an amount not greater than the Offering Price. If the offering price is reduced, the compensation received by the Underwriters will be reduced by the amount that the aggregate price paid by the purchasers for the Common Shares is less than the gross proceeds paid by the Underwriters to the Corporation. See "Plan of Distribution".

Any investment in securities of the Corporation involves significant risks that should be carefully considered by prospective investors before purchasing the Common Shares. The risks outlined in this Prospectus Supplement, the Base Shelf Prospectus, and in the documents incorporated by reference herein and therein, should be carefully reviewed and considered by prospective investors in connection with any investment in the Common Shares. Prospective investors should carefully read the "Risk Factors" section in this Prospectus Supplement, the Base Shelf Prospectus and the documents incorporated by reference herein and therein, as well as the information under the heading "Cautionary Note Regarding Forward-Looking Information" in this Prospectus Supplement and consider such notes and information in connection with an investment in the Common Shares.

Prospective investors should be aware that the acquisition of the securities described herein may have tax consequences that depend on each prospective investor's specific circumstances. Such consequences may not be described fully in this Prospectus Supplement or the accompanying Base Shelf Prospectus, including the Canadian federal income tax consequences applicable to a foreign controlled Canadian corporation that acquires the Common Shares. Investors should read the tax discussion in this Prospectus Supplement and consult their own tax advisors with respect to their own particular circumstances. See "Certain Canadian Federal Income Tax Considerations", "Eligibility for Investment" and "Risk Factors".

Robert Bruggeman, Nicholas Teasdale and Stephen Gatley, each directors of the Corporation, and David O'Connor, an officer of the Corporation, reside outside of Canada, and have appointed the Corporation (220 Bay Street, Suite 550, Toronto, Ontario, M5J 2W4) as their agent for service of process. In addition, Luis Rodrigo Peralta, Miguel Fuentealba and Donald Hickson, each of whom is an independent "qualified person" under National Instrument 43-101 – *Standards of Disclosure for Mineral Projects* ("**NI 43-101**"), reside outside of Canada. Purchasers are advised that it may not be possible for investors to enforce judgments obtained in Canada against any person that resides outside of Canada, even if the party has appointed an agent for service of process.

Information with respect to a purchaser's right to withdraw from or rescind an agreement to purchase securities is provided below. See "Purchasers' Statutory Rights".

The Corporation's registered office and head office is located at 220 Bay Street, Suite 550, Toronto, Ontario, M5J 2W4.

NOTICE TO READER

This document is in two parts. The first part is this Prospectus Supplement, which describes the specific terms of the Offering and also adds to and updates certain information contained in the Base Shelf Prospectus and the documents incorporated by reference herein and therein. The second part, the Base Shelf Prospectus, gives more general information about securities the Corporation may offer from time to time, some of which may not apply to the Offering. Both documents contain important information investors should consider when making an investment decision. This Prospectus Supplement may add, update or change information contained in the Base Shelf Prospectus. Before investing, purchasers of the Common Shares pursuant to the Offering should carefully read both this Prospectus Supplement and the Base Shelf Prospectus together with the additional information about the Corporation referred to in the section of this Prospectus Supplement titled "Documents Incorporated by Reference". This Prospectus Supplement is deemed to be incorporated by reference into the Base Shelf Prospectus solely for the purposes of the Offering. Other documents are also incorporated or deemed to be incorporated by reference into this Prospectus Supplement and into the Base Shelf Prospectus. See "Documents Incorporated by Reference".

Purchasers of Common Shares pursuant to the Offering should rely only on the information contained in or incorporated by reference into this Prospectus Supplement and the Base Shelf Prospectus. If information in this Prospectus Supplement is inconsistent with the Base Shelf Prospectus or the information incorporated by reference therein, you should rely on this Prospectus Supplement. The Corporation has not authorized any other person to provide purchasers with additional or different information. If anyone provides purchasers with additional or different information, such purchasers should not rely on it.

The Corporation is offering to sell, and seeking offers to buy, these securities only in jurisdictions where offers and sales are permitted. Purchasers should assume that the information appearing in this Prospectus Supplement and the Base Shelf Prospectus, as well as information the Corporation has previously filed with the securities regulatory authority in each of the provinces and territories of Canada, that is incorporated herein and in the Base Shelf Prospectus by reference, is accurate as of their respective dates only. The Corporation's business, financial condition, results of operations and prospects may have changed since those dates.

References in this Prospectus Supplement to "AbraSilver", "we", "us" or "our" refer to the Corporation and its direct and indirect wholly-owned subsidiaries, unless the context indicates otherwise.

CURRENCY PRESENTATION AND EXCHANGE RATE INFORMATION

All dollar amounts in this Prospectus Supplement are expressed in Canadian dollars unless otherwise indicated. References to "US$" are to U.S. dollars.

The following table sets forth, for each of the periods indicated, the high, low and period end spot rates of exchange for one United States dollar, expressed in Canadian dollars, published by the Bank of Canada.

	Year ended December 31,		Three months ended March 31,	
	2025 ($)	2024 ($)	2026 ($)	2025 ($)
High.....	1.4603	1.4416	1.3939	1.4603
Low.....	1.3558	1.3316	1.3515	1.4166
Period End	1.3706	1.4389	1.3939	1.4376

On July 23, 2026, the rate of exchange posted by the Bank of Canada for conversion of United States dollars into Canadian dollars was US$1.00 = $1.4083. The Corporation makes no representation that Canadian dollars could be converted into United States dollars at that rate or any other rate.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING INFORMATION

This Prospectus Supplement and the Base Shelf Prospectus, and the documents incorporated herein by reference, contain certain forward-looking statements that relate to the Corporation's current internal expectations, estimates, projections, assumptions, beliefs and views of future events. In some cases, these forward-looking statements can be identified by words or phrases such as "may", "might", "will", "expect", "anticipate", "estimate", "intend", "plan", "indicate", "seek", "believe", "predict" or "likely", or the negative or grammatical variations of these terms, or other similar expressions intended to identify forward-looking statements. The Corporation has based these forward-looking statements on its current expectations and projections about future events and financial trends that it believes might affect its financial condition, results of operations, business strategy and financial needs. These forward-looking statements include, among other things, statements relating to:

- the performance of the Corporation's business and operations;
- the expected timing and cost of the Corporation's business objectives and milestones;
- the intention to grow the business, operations and potential activities of the Corporation;
- future successful development of the Project (as defined herein) in accordance with the DFS (as defined herein), and other exploration and development projects;
- the target for an FID (as defined herein) being in April 2027;
- the competitive conditions of the industry;
- the applicable laws, regulations and any amendments thereof;
- the competitive and business strategies of the Corporation;
- the anticipated future benefits and cost savings from acquisitions;
- the intention of the Corporation to complete the Offering on the terms and conditions described herein and the aggregate amount of the total proceeds that the Corporation may receive pursuant to the Offering;
- the Corporation's expected use of the net proceeds from the Offering; and
- the listing of any Common Shares issued pursuant to the Offering.

Forward-looking statements are based on certain assumptions and analyses made by the Corporation in light of the experience and perception of historical trends, current conditions and expected future developments and other factors it believes are appropriate and are subject to risks and uncertainties. The forward-looking statements contained herein reflect management's current expectations and beliefs and are based upon certain assumptions that management believes to be reasonable based on the information currently available to management. Such assumptions include, but are not limited to, assumptions regarding: (a) the demand for the Corporation's products and services and fluctuations in future revenues; (b) sufficiency of current working capital to support future operating and working capital requirements; (c) equity and debt markets continuing to provide the Corporation with access to capital on terms acceptable to it; (d) general economic trends and conditions; (e) the expected actions of third parties; (f) the Corporation's future growth prospects and business opportunities; (g) capital cost of expected expansion by the Corporation; (h) the competitive conditions of the mining industry; and (i) the applicable laws, regulations and any amendments thereof.

Although the Corporation believes that the assumptions underlying these statements are reasonable, they may prove to be incorrect, and the Corporation cannot assure that actual results will be consistent with these forward-looking statements.

A number of factors could cause actual events, performance or results to differ materially from what is projected in forward-looking statements. Given these risks, uncertainties and assumptions, investors should not place undue reliance on these forward-looking statements. Whether actual results, performance or achievements will conform to the Corporation's expectations and predictions is subject to a number of known and unknown risks, uncertainties, assumptions and other factors, including those listed under "Risk Factors" in this Prospectus Supplement, the Base Shelf Prospectus and the documents incorporated by reference herein and therein. If any of these risks or uncertainties materialize, or if assumptions underlying the forward-looking statements prove incorrect, actual results might vary materially from those anticipated in those forward-looking statements. The factors described in detail under "Risk Factors" in this Prospectus Supplement and in the Base Shelf Prospectus and the documents incorporated by reference herein and therein should be considered carefully by prospective purchasers of Common Shares pursuant to the Offering. Prospective purchasers are urged to read the Corporation's filings with Canadian securities regulatory agencies, which can be viewed online under the Corporation's profile on the Canadian System for Electronic Data Analysis and Retrieval + ("**SEDAR+**") at www.sedarplus.ca.

The Corporation's forward-looking statements are based on the reasonable beliefs, expectations and opinions of management on the date of this Prospectus Supplement (or as of the date that they are otherwise stated to be made). Although the Corporation has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. There is no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, prospective purchasers of Common Shares pursuant to the Offering should not place undue reliance on forward-looking statements. The Corporation does not undertake to update or revise any forward-looking statements except as, and to the extent required by, applicable securities laws in Canada.

Prospective purchasers of Common Shares are cautioned that the above list of cautionary statements is not exhaustive. All of the forward-looking statements contained in this Prospectus are expressly qualified by the foregoing cautionary statements. Prospective purchasers of Common Shares pursuant to the Offering should read this Prospectus and consult their own professional advisors to assess the income tax, legal, risk factors and other aspects of their investment in Common Shares.

MARKET AND INDUSTRY DATA

Unless otherwise indicated, market data and certain industry data and forecasts included in this Prospectus Supplement and the documents incorporated by reference herein concerning the Corporation's industry and the markets in which the Corporation operates or seeks to operate were obtained from internal Corporation surveys, market research, publicly available information, reports of governmental agencies and industry publications and surveys. The Corporation has relied upon industry publications as the Corporation's primary sources of third-party industry data and forecasts. The Corporation has not independently verified any of the data from third-party sources, nor has the Corporation ascertained the underlying assumptions relied upon therein. Similarly, internal surveys, industry forecasts and market research, which the Corporation believes to be reliable based upon the Corporation's knowledge of the industry, have not been independently verified, and the Corporation does not know what assumptions were

used in their preparation. By their nature, forecasts are particularly subject to change or inaccuracies, especially over long periods. While the Corporation is not aware of any misstatements regarding the industry data presented herein or via the documents incorporated herein by reference, estimates involve risks and uncertainties and are subject to change based on various factors, including those discussed under "Cautionary Note Regarding Forward-Looking Information" and "Risk Factors" in this Prospectus Supplement and the documents incorporated by reference herein. While the Corporation believes that its internal research is reliable and market definitions are appropriate, neither such research nor definitions have been verified by any independent source.

SCIENTIFIC AND TECHNICAL INFORMATION

Scientific and technical information relating to the Corporation's Diablillos project, in the Salta Province of northwestern Argentina (the "**Project**" or the "**Diablillos Project**") contained in this Prospectus Supplement is derived from, and in some instances is a direct extract from, and based on the assumptions, qualifications and procedures set out in, the definitive feasibility study entitled "NI 43-101 Technical Report, Feasibility Study for the Diablillos Ag-Au Project", dated July 20, 2026, effective as of June 19, 2026 and prepared by Luis Rodrigo Peralta, Miguel Fuentealba, Pierre Lacombe, Ernesto Caner, Kevin Tanas, Donald Hickson and Shaida Miranda (the "**DFS**"). Reference should be made to the full text of the DFS, which is available for review under the Corporation's profile on SEDAR+ at www.sedarplus.ca, and is incorporated by reference herein.

DOCUMENTS INCORPORATED BY REFERENCE

This Prospectus Supplement is deemed to be incorporated by reference into the Base Shelf Prospectus solely for the purpose of the Offering. Other documents are also incorporated, or deemed to be incorporated, by reference in the Base Shelf Prospectus and reference should be made to the Base Shelf Prospectus for full particulars thereof.

Information has been incorporated by reference in the Base Shelf Prospectus and this Prospectus Supplement from documents filed with or delivered to securities commissions or similar authorities in each of the provinces and territories of Canada. Copies of the documents incorporated herein by reference or a copy of the permanent information record may be obtained on request without charge from the Chief Executive Officer of the Corporation at 220 Bay Street, Suite 550, Toronto, Ontario, M5J 2W4 or by accessing the disclosure documents available through the internet on SEDAR+, which can be accessed at www.sedarplus.ca.

As at the date hereof, the following documents of the Corporation, filed with or delivered to the securities commissions or similar authorities in each of the provinces and territories of Canada, are specifically incorporated by reference into and form an integral part of the Base Shelf Prospectus and this Prospectus Supplement, provided that such documents are not incorporated by reference to the extent that their contents are modified or superseded by a statement contained in the Base Shelf Prospectus or this Prospectus Supplement or in any other subsequently filed document that is also incorporated by reference in the Base Shelf Prospectus or this Prospectus Supplement, as further described below:

(a) the audited consolidated financial statements of the Corporation for the years ended December 31, 2025, and December 31, 2024, together with the notes thereto and the independent auditor's report thereon;

(b) the unaudited consolidated financial statements of the Corporation for the three months ended March 31, 2026, and March 31, 2025, together with the notes thereto (the "**Interim Financial Statements**");

(c) the management's discussion and analysis of the Corporation for the years ended December 31, 2025, and December 31, 2024;

(d) the management's discussion and analysis of the Corporation for the three months ended March 31, 2026, and March 31, 2025;

(e) the management information circular dated May 22, 2026, regarding the annual meeting of shareholders of the Corporation held on June 29, 2026;

(f) the annual information form dated March 30, 2026, for the year ended December 31, 2025 (the "**AIF**"), except for the information contained under the heading "Material Mineral Properties" therein, which has been superseded by the information contained in this Prospectus Supplement under the heading "The Diablillos Project";

(g) the material change report of the Corporation dated June 30, 2026 in connection with the results of the DFS;

(h) the term sheet for the Offering dated July 22, 2026; and

(i) the DFS.

Any document of the type referred to in the preceding paragraph (excluding confidential material change reports), and all other documents of the type required by National Instrument 44-101 - *Short Form Prospectus Distributions* of the Canadian Securities Administrators to be incorporated by reference in the Base Shelf Prospectus or this Prospectus Supplement, filed by the Corporation with a securities commission or similar regulatory authority in Canada after the date of this Prospectus Supplement and prior to the termination of any offering of Common Shares hereunder shall be deemed to be incorporated by reference into this Prospectus Supplement.

Any statement contained herein or in a document incorporated or deemed to be incorporated by reference herein shall be deemed to be modified or superseded, for purposes of the Base Shelf Prospectus and this Prospectus Supplement, to the extent that a statement contained herein or in any other subsequently filed document that also is or is deemed to be incorporated by reference herein modifies or supersedes that statement. Any such modifying or superseding statement need not state that it has modified or superseded a prior statement or include any other information set forth in the document that it modifies or supersedes. The making of a modifying or superseding statement shall not be deemed an admission for any purposes that the modified or superseded statement, when made, constituted a misrepresentation, an untrue statement of a material fact or an omission to state a material fact that is required to be stated or that is necessary to make a statement not misleading in light of the circumstances in which it was made. Any statement so modified or superseded shall not be considered in its unmodified or superseded form to constitute part of the Base Shelf Prospectus or this Prospectus Supplement; rather only such statement as so modified or superseded shall be considered to constitute part of the Base Shelf Prospectus and this Prospectus Supplement.

References to the Corporation's website in any documents that are incorporated by reference into this Prospectus Supplement and/or the Base Shelf Prospectus do not incorporate by reference the information on such website into this Prospectus and the Corporation disclaims any such incorporation by reference, except as specifically set forth herein.

MARKETING MATERIALS

Any "template version" of any "marketing materials" (as such terms are defined under applicable Canadian securities laws) that are used in connection with the Offering are not part of this Prospectus Supplement to the extent that the contents of the template version of the marketing materials have been modified or superseded by a statement contained in this Prospectus Supplement. Any template version of any marketing materials that has been, or will be, filed under the Corporation's profile on SEDAR+ at www.sedarplus.ca before the termination of the distribution under the Offering (including any amendments to, or an amended version of, any template version of any marketing materials) is deemed to be incorporated by reference into this Prospectus Supplement.

THE CORPORATION

The following description of the Corporation is derived from selected information about the Corporation contained in the documents incorporated by reference and does not contain all of the information about the Corporation and its business that should be considered before investing in the Common Shares. This Prospectus Supplement, the Base Shelf Prospectus and the documents incorporated by reference herein and therein should be reviewed and considered by prospective purchasers in connection with their investment in the Common Shares. This Prospectus Supplement may add to, update or change information in the Base Shelf Prospectus. You should carefully read this entire Prospectus Supplement and the Base Shelf Prospectus, including the risks and uncertainties discussed in the section titled "Risk Factors", and the information incorporated by reference in this Prospectus Supplement, including the Corporation's consolidated financial statements, before making an investment decision.

Summary Description of the Business

AbraSilver is a leading silver-gold development company focused on advancing the Project in the mining-friendly provinces of Salta and Catamarca, Argentina. The DFS highlights the Project as a robust, high-margin, long-life precious metals project with a strong production profile and substantial exploration upside. In addition, the Corporation has entered into an earn-in option and joint venture agreement with a subsidiary of Teck Resources Limited on the La Coipita project, located in the San Juan province of Argentina.

More detailed information regarding the business of the Corporation as well as its operations, assets, and properties can be found in the AIF and other documents incorporated by reference herein, as supplemented by the disclosure herein. See "Documents Incorporated by Reference".

Corporate Structure

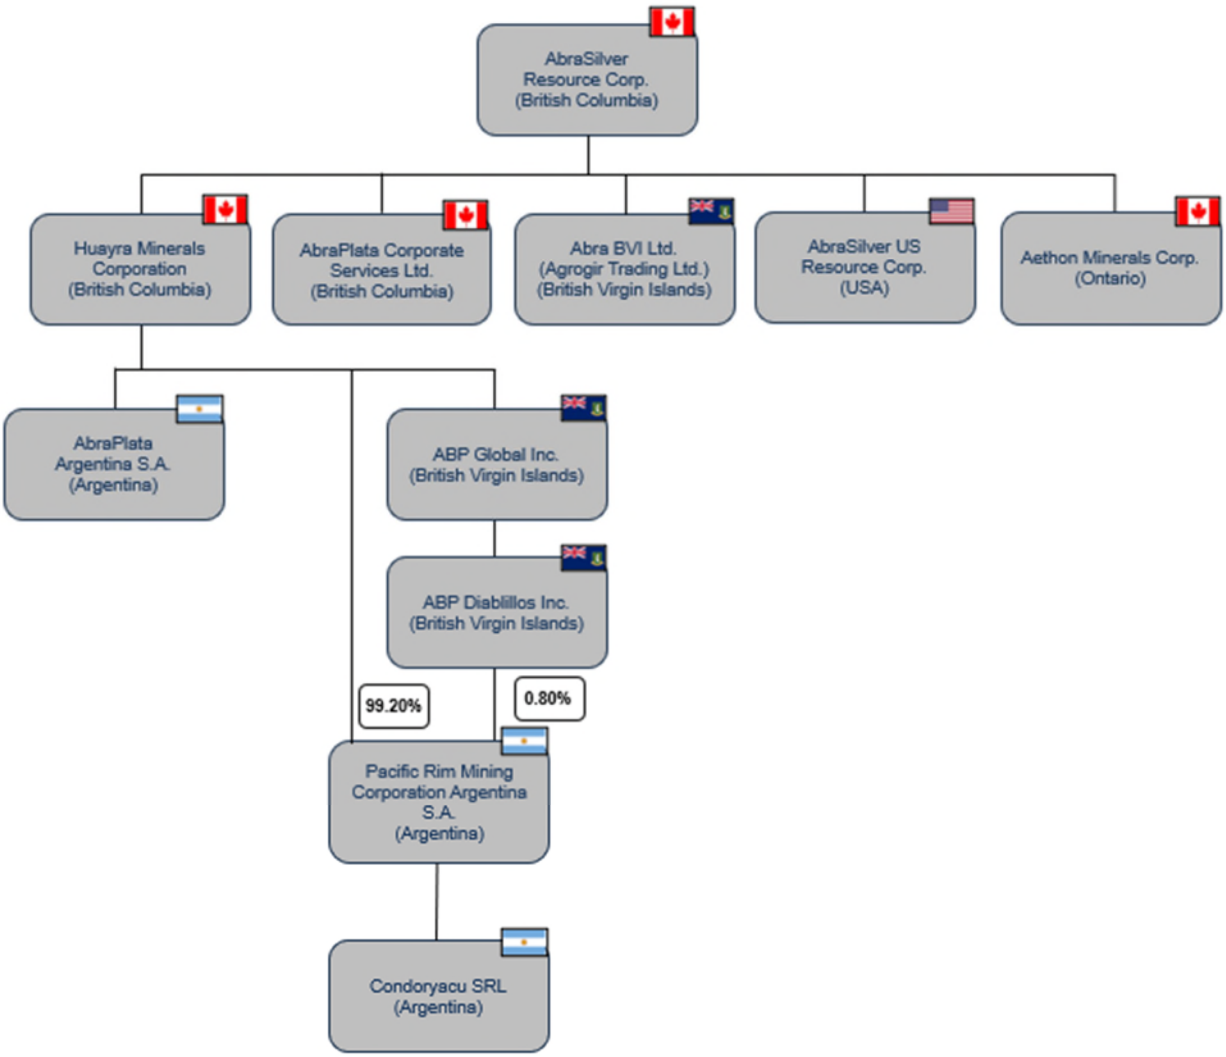

Name, Address and Incorporation

The Corporation was incorporated under the *Business Corporations Act* (Alberta) on August 31, 1993, under the corporate name "Schwanberg International Incorporated" ("**Schwanberg**"). On or about January 1, 2004, Schwanberg and at the time its wholly-owned subsidiaries, Lanex Resources Inc., Macroplus Energy Inc. and 650256 Alberta Ltd., amalgamated into a new entity, Schwanberg International Incorporated. Concurrently with the amalgamation, Schwanberg filed articles of amendment to change its name to "Mystique Energy Inc." ("**Mystique**"). On or about May 18, 2011, Mystique filed further articles of amendment changing its corporate name to "Bella Resources Inc." ("**Bella**"). The Corporation changed its name again on or about August 29, 2013, evidenced by a certificate of amendment from Bella to "Angel Bioventures Inc." ("**Angel Bio**"). Pursuant to a reverse takeover transaction with Huayra Minerals Corp., Angel Bio continued to the jurisdiction of British Columbia under the *Business Corporations Act* (British Columbia) effective February 27, 2017, and subsequently changed its name to "AbraPlata Resource Corp." ("**AbraPlata**"), by way of a certificate of amendment dated March 23, 2017. Finally, on or about March 4, 2021, AbraPlata changed its name by way of a certificate of change of name to "AbraSilver Resource Corp."

The registered principal office of AbraSilver is located at 220 Bay Street, Suite 550, Toronto, Ontario, M5J 2W4.

Intercorporate Relationships

The Corporation carries on a significant portion of its business through a number of direct and indirect subsidiaries, as follows:

THE DIABLILLOS PROJECT

The following is the summary section of the DFS prepared by Luis Rodrigo Peralta, Miguel Fuentealba, Pierre Lacombe, Ernesto Caner, Kevin Tanas, Donald Hickson and Shaida Miranda, which supersedes the information contained under the heading "Material Mineral Properties" in the AIF. Unless the context requires otherwise, all statements in the following summary are made as at the effective date of the DFS and all capitalized or abbreviated terms used in the following summary, unless otherwise defined herein, carry the meaning of such terms in the DFS. The following summary does not purport to be a complete summary of the Project and is subject to all of the assumptions, qualifications and procedures set out in the DFS and is qualified in its entirety with reference to the full text of the DFS, which is incorporated by reference herein. Readers should read this summary in conjunction with the DFS, which is available for review under the Corporation's profile on SEDAR+ at www.sedarplus.ca.

Property Description and Location

The Diablillos property is located within the Puna region of Argentina, which is located on the provincial border between Salta to the north and Catamarca to the south. The property is located approximately 160 km southwest of the City of Salta and 375 km northwest of the City of Catamarca. The property comprises 15 contiguous and overlapping mineral concessions acquired by AbraSilver in 2016.

The project site has good year-round accessibility from Salta via 327 km of paved and gravel roads from Salta and from San Fernando del Valle de Catamarca via approximately 700 km of paved and gravel roads. The site itself is accessed by a well-maintained gravel road that is shared with other adjacent projects.

History

The Diablillos Project has undergone several phases of exploration and ownership since its initial discovery in the early 1970s. Early work by the Argentine military and subsequent programs conducted by Shell, Billiton, Ophir, Pacific Rim, Barrick, and Silver Standard Resources progressively defined the silver-gold potential of the district through geological mapping, geochemical surveys, geophysical studies, and drilling campaigns. In December 2001, Silver Standard Resources acquired the Project and continued exploration activities, including additional drilling and ground magnetic surveys, laying the foundation for future resource delineation and development studies.

A new stage of development commenced in 2016, when AbraPlata Resource Corp. acquired Pacific Rim Mining Corporation Argentina S.A., obtaining control of the Diablillos property. Following its corporate rebranding to AbraSilver Resource Corp. in March 2021, the Corporation completed multiple drilling campaigns that substantially increased the Mineral Resource base and led to the discovery and delineation of new mineralized zones, including Jointed Altered Complex ("**JAC**"), Fantasma and extensions to the Oculto deposit. Since 2022, the Project has advanced rapidly through updated Mineral Resource and maiden Mineral Reserve estimates, extensive metallurgical and engineering studies, and the completion and submission of the Environmental Impact Assessment ("**EIA**") in 2024, culminating in the publication of a 2025 Pre-Feasibility Study (INSA Pre-Feasibility Study (PFS), 2025) that positions Diablillos as one of the largest undeveloped primary silver projects in Argentina and the Americas.

Geological Setting, Mineralization, and Deposit Types

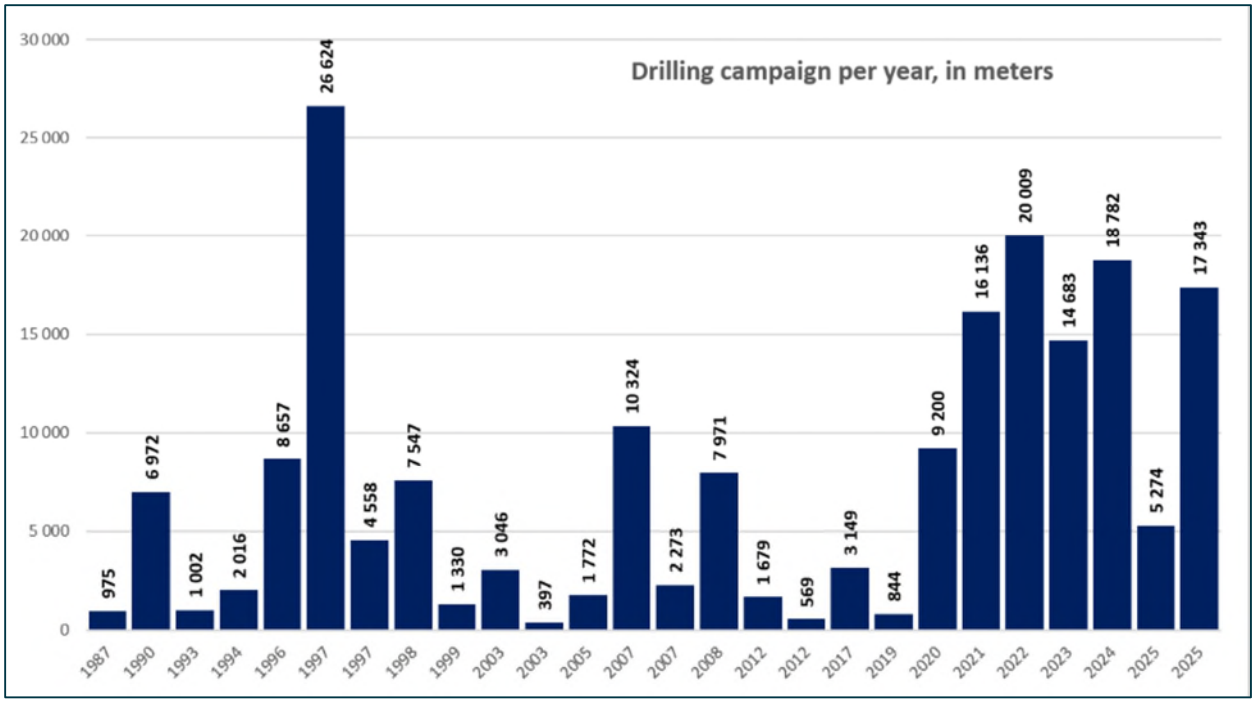

The Project contains a weathered high-sulphidation epithermal silver-gold system hosted primarily in Tertiary volcanic and sedimentary rocks. Drilling to date has outlined several occurrences of epithermal silver-gold mineralization, including the Oculto Zone, JAC Zone, Laderas Zone, and Fantasma Zone.

Several satellite zones of silver/gold-rich epithermal mineralization have been located within a 500 m to 1.5 km distance surrounding the Oculto/JAC epicentre. The focus of this technical report are the Oculto, JAC, Sombra, Fantasma, and Laderas Zones.

Exploration and Drilling

Exploration work completed by several operators over the history of the Project now totals 170,368 m of drilling in 790 drillholes, including both diamond drilling and reverse circulation (RC) drilling. The current Mineral Resource Estimate incorporates drilling completed up to December 31, 2025, and includes approximately 13,270 m of additional drilling completed since the previous Mineral Resource estimate dated July 29, 2025.

The total meters drilled by year are summarized in Figure 0-1.

Source: AbraSilver, 2026

Figure 0-1: Diablillos Drilling History

Hydrogeology

The Diablillos Project water supply strategy is supported by an extensive hydrogeological investigation program completed between 2007 and 2026. The program included regional hydrogeological exploration, geophysical surveys, exploratory drilling, hydraulic testing, long-duration pumping tests, and numerical groundwater modelling to identify and evaluate groundwater resources suitable for long term project supply. Based on approximately 20 years of investigations, Mr. Peralta considers that the identified groundwater resources are sufficient to satisfy the Project's estimated operational water demand of approximately 60 L/s while providing an appropriate level of confidence consistent with the requirements of a feasibility study and the NI 43-101 disclosure standards.

Sample Preparation, Analysis and Security

Sampling and analytical work from the 1996 to 2008 exploration programs was reviewed. It appears to have been conducted using industry standard practices. Starting in 2008, the property was explored primarily by SSRM until 2017, when AbraSilver took ownership. During this time, all drilling, including collaring, surveying, logging, sampling, and chain of custody for drilling campaigns, was conducted in an appropriate manner that is consistent with industry best practice.

The number and orientation of drillholes and the sampling methods employed reflect an adequate representation of the mineralization at Oculto, JAC, and the other identified orebodies. Core splitting and sampling was handled solely by dedicated staff and the samples were stored securely.

Assaying was performed using conventional, industry standard methods, and by well known independent commercial laboratories.

Data Verification

Mr. Peralta visited the Diablillos Project on several occasions, from April 24 to May 03, 2023, from October 02 to October 08, 2023, from October 18 to October 22, 2024, from December 06 to December 11, 2024, from April 08 to April 14, and from August 25 to August 29, 2025, and from April 13 to April 19, 2026. He conducted a general site inspection, including drill collar locations, core review, logging facility, logging procedures, camp facilities, and a surface geology review on the JAC, Laderas, Fantasma, and other nearby areas. Core from several drillholes was inspected and compared with the logs. Collar locations were confirmed by handheld GPS.

Vertical cross sections and plan views with detailed geology, alteration, and interpretation were discussed with AbraSilver's geologists. Discussions included future exploration targets and near term objectives. Based on Mr. Peralta's opinion, the site and geology procedures were as described in previous technical reports, with well-maintained facilities and orderly core storage.

Site visits by Mr. Fuentealba (from October 2 to October 8, 2023, from October 18 to October 22, 2024, from August 25 to August 29, 2025, and from April 15 to April 17, 2026) were carried out to verify the main project aspects, focusing on mining methodology, processing, general layout, infrastructure, and environment. It was confirmed that these processes were compliant with industry best practice and aligned with the relevant legislation.

Mineral Processing and Metallurgical Testing

The retained processing route for the Diablillos Project is supported by a series of testwork programs. These included mineralogical characterization, material grindability assessment and tests for gravity recovery, agitated cyanidation response, dewatering characteristics, oxygen uptake, precious metals cementation on zinc dust, and cyanide destruction.

Testing considered the differential response of the five main mineral domains identified in the Oculto and JAC deposits. For these, the influence of operating parameters such as grind size, leach retention time, cyanide, and dissolved oxygen concentrations were established to inform the plant design criteria.

The recovery expectations were found to not follow a relationship with head grades for gold or silver. The recoveries showed elevated variability within any given mineral domain, even discounting for the fact that, for some of those domains, either gold or silver will represent an insignificant contribution to the economic value of the material. No clear indication was found that consideration of either the lithology or mineralization type would provide more insight towards explaining such variability.

Mineral Resource Estimate

The updated Mineral Resource estimate for the Diablillos Project, provided in Table 1-1, was estimated by Mr. Peralta, B.Sc. (Hons), FAusIMM CP (Geo), an independent senior resource geologist, from INSA Consultora SAS. The results are based on approximately 790 drillholes (historical and current), totaling 170,368 m of drilling, including the latest Phase V drill campaign, conducted in 2025.

The Diablillos deposits are classified as high-sulphidation epithermal silver-gold systems with strong supergene overprinting. Mineralization is principally controlled by structural corridors and favorable lithological horizons. Recent geological work has resulted in an updated three-dimensional geological, alteration and oxidation model that forms the basis of the current Mineral Resource estimate.

Mineral Resources were estimated using Ordinary Kriging (OK) within a three Table 0-1 dimensional (3D) block model constrained by geological, alteration and oxidation domains. Mineral Resources were classified in accordance with the Canadian Code of the Canadian Institute of Mining, Metallurgy, and Petroleum ("**CIM**") Definition Standards (2014) and are reported within a conceptual open pit shell demonstrating reasonable prospects for eventual economic extraction.

A significant advancement incorporated into the current Mineral Resource estimate is the application of a dual-processing strategy consisting of a primary tank leach process and a secondary heap leach process. The tank leach component represents the higher grade mineralized material, while the heap leach component captures a substantial inventory of lower grade mineralization with potential economic significance.

Table 0-1: Diablillos Mineral Resource Summary (Tank & Heap Leach) – As of April 30th, 2026.

Zone	Zone	Category	Tonnes (000 t)	Ag (g/t)	Au (g/t)	AgEq (g/t)	Contained Ag (000 Oz Ag)	Contained Au (000 Oz Au)	Contained AgEq (000 Oz Ag)
Tank Leaching	Oxides	Measured	41,042	100	0.68	159	131,668	896	209,281
		Indicated	60,978	41	0.58	92	81,060	1,143	180,078
		Measured & Indicated	102,021	65	0.62	119	212,728	2,039	389,359
		Inferred	14,400	25	0.57	74	11,468	262	34,187
Heap Leaching	Oxides	Measured	25,469	13	0.09	19	10,997	76	15,425
		Indicated	104,491	7	0.13	15	24,328	428	49,342
		Measured & Indicated	129,960	8	0.12	16	35,325	503	64,767
		Inferred	34,947	6	0.14	14	6,939	158	16,153
Total	Oxides	Measured	66,512	67	0.45	105	142,665	971	224,706
		Indicated	165,469	20	0.30	43	105,388	1,570	229,420
		Measured & Indicated	231,981	33	0.34	61	248,053	2,542	454,127
		Inferred	49,347	12	0.26	32	18,406	420	50,340

Notes for Mineral Resource Estimate:

1. Mineral Resources are not Mineral Reserves and have not demonstrated economic viability.
2. The formula for calculating AgEq is as follows: Silver Eq Oz = Silver Oz + Gold Oz x (Gold Price/Silver Price) x (Gold Recovery/Silver Recovery).
3. The Mineral Resource model was populated using Ordinary Kriging grade estimation within a three-dimensional block model and mineralized zones defined by wireframed solids, which are a combination of lithology and alteration domains. The 1 m composite grades were capped where appropriate.
4. The Mineral Resource is reported inside a conceptual open pit shell derived using US$ 34.50/oz Ag price, US$3,200/oz Au price, 86.6% process recovery for Au and 80.9% process recovery for Ag for the tank leaching, and 74.3% process recovery for Au and 46.8% process recovery for Ag for the secondary heap leaching.
5. Open pit optimization was constrained using a dual process approach, with tank leaching as the primary process (total operating expenditures (OPEX) of US$32.30/t) and heap leaching as the secondary process (total OPEX of US$7.00/t).
6. The MRE has been categorized in accordance with the CIM Definition Standards (CIM, 2014).
7. A net value per block (NVB) calculation was used to constrain the Mineral Resource, determine the "Benefits = Revenue-Cost", where, Revenue = [(Au Selling Price (US$/oz) - Au Selling Cost (US$/Oz)) x (Au grade (g/t)/31.1035)) x Au Recovery (%)] + [(Ag Selling Price (US$/oz) - Ag Selling Cost (US$/Oz)) x (Ag grade (g/t)/31.1035)) x Ag Recovery (%)] and Cost = Mining Cost (US$/t) + Process Cost (US$/t) + Transport Cost (US$/t) + G&A Cost (US$/t) + [Royalty Cost (%) x Income]
8. The Mineral Resource is sub-horizontal with sub-vertical feeders and has a reasonable prospect for eventual economic extraction by open pit methods.
9. In-situ bulk densities were assigned to each model domain, according to samples averages for each lithology domain, separated by alteration zones, and subset by oxidation.
10. All tonnages reported are dry metric tonnes and ounces of gold and silver contained are troy ounces.
11. Mining recovery and dilution factors have not been applied to the Mineral Resource estimates.

12. The Mineral Resource was estimated by Luis Rodrigo Peralta, B.Sc., FAusIMM CP (Geo), an INSA Consultora Managing Principal Geologist and an Independent Qualified Person under NI 43-101.
13. Mr. Peralta is not aware of any environmental, permitting, legal, title, taxation, socio-political, marketing, or other relevant issues that could materially affect the potential development of the Mineral Resource.
14. All figures are rounded to reflect the relative accuracy of the estimates. Minor discrepancies may occur due to rounding to appropriate significant figures.

Mineral Reserve Estimate

The Mineral Reserve estimate for the Diablillos Project, with an effective date of May 16, 2026, was estimated and classified based on the CIM's Estimation of Mineral Resource and Mineral Reserves Best Practices Guidelines (CIM, 2019) and is reported in accordance with the Canadian Securities Administrators' National Instrument 43-101.

Proven & Probable Mineral Reserves containing 366 Moz of AgEq metal (78 Mt at 73 g/t Ag and 0.70 g/t Au) were estimated.

Table 0-2: Mineral Reserve Estimate Statement for the Diablillos Project, Salta, Argentina. By Classification, All Domains. As of May 16, 2026.

Mineral Reserve (All Domains)	Tonnage (kt)	Au (g/t)	Ag (g/t)	AgEq (g/t)	Contained Ag (koz Ag)	Contained Au (koz Au)	Contained AgEq (koz AgEq)
Proven	36,547	0.71	104	178	122,452	840	209,536
Probable	41,364	0.70	46	118	61,085	925	156,327
Total Proven and Probable	**77,911**	**0.70**	**73**	**146**	**183,537**	**1,764**	**365,863**

Considerations:

1. The Mineral Reserves have an effective date of May 16, 2026.
2. The Qualified Person for the Mineral Reserves Estimate is Mr. Miguel Fuentealba, P.Eng.
3. The Mineral Reserves were estimated using the Canadian Code of the Canadian Institute of Mining, Metallurgy, and Petroleum (CIM), Definition of Standards for Mineral Resources and Mineral Reserves, prepared by the CIM Standing Committee on Reserve Definitions and adopted by the CIM Council.
4. The Mineral Reserves are based on a pit design, which is aligned with the ultimate pit selected during the optimization process performed at Whittle.
5. The reserves were estimated at a sale price of US$2,800 per ounce of Au and US$29.5 per ounce of Ag.
6. A variable mining cost per bench and type of material was applied. An average cost of US$2.23/t for all lithologies was applied, except for cover (free dig), where a cost of US$1.81/t was applied.
7. The processing cost for all zones is US$23.84/t.
8. The infrastructure, general, and administrative costs amount to US$6.51/tonne.
9. The average overall slope pit angles range from 30° to 49.2°, depending on the geotechnical zone domain.
10. The average recovery is estimated at 79.9% for silver and 87% for gold.
11. The formula for calculating AgEq is AgEq oz = Ag oz + Au oz x (Au Price/Ag Price).
12. Mineral Reserve Estimates are classified according to CIM Standard definitions (CIM, 2014).
13. An NVB was used to restrict the Mineral Reserves within the pit shell. The NVB is based on "Profit = Revenue - Costs", being positive, where, Revenue = [(Au Price (US$/oz) - Au Sales Cost (US$/oz) x (Au Grade (g/t)/31.1035))x Au Recovery (%)]+[(Ag Price (US$/oz) - Ag Sales Cost (US$/oz) x (Ag Grade (g/t)/31.1035) x Ag Recovery (%) and cost as, Cost = Mine Cost (US$/t) + Process Cost (US$/t) + Transportation Cost (US$/t) + General and Administrative Costs (US$/t) + [Royalty Cost (%) x Revenue]. The NVB method matches an equivalent cut-off grade of 38 g/t AgEq.
14. The in-situ density is read directly from the block model, was previously assigned for each domain during the mineral resource estimation process, is according to averages of samples from each lithological domain and is separated by alteration and oxidation zones.
15. All tonnages reported are in dry metric tonnes and ounces of gold and silver contained in troy ounces.
16. The mine plan considers 539 Mt of total rock and 461 Mt of waste rock, which corresponds to a waste to ore ratio of 5.9. There is 78 Mt of cover material (free dig) included in the total waste. Waste rock from period -2 and period -1 is considered in the capital expenditures (CAPEX).

17. Ore is considered to be that which complies with profit greater than zero, is a measured or indicated resource, is within the designed operating phases, whose oxidation state is oxide, and of any lithology except cover.
18. Recoveries were estimated by geometallurgical domain within each block.
19. Figures are approximate due to rounding.
20. Au and Ag metal are considered in situ.

An NVB cut-off was used to constrain the Mineral Reserve within the reserve pit shell. The NVB was based on "Benefits = Revenue-Cost" being positive, where, Revenue = [(Au Selling Price (US$/oz) - Au Selling Cost (US$/oz)) x (Au grade (g/t)/31.1035)) x Au Recovery (%)] + [(Ag Selling Price (US$/oz) - Ag Selling Cost (US$/oz)) x (Ag grade (g/t)/31.1035)) x Ag Recovery (%)] and Cost = Mining Cost (US$/t) + Process Cost (US$/t) + Transport Cost (US$/t) + G&A Cost (US$/t) + [Royalty Cost (%) x Revenue]. This NVB method resulted in an average equivalent cut-off grade of approximately 38 g/t AgEq.

Mining Method

The Project has been designed as a conventional open pit mining operation, which is considered appropriate given the geometry, continuity, and near-surface characteristics of the mineralization. Mining operations will comprise drilling, blasting, loading, and hauling activities, utilizing a conventional truck-and-loader fleet. This mining approach provides a high degree of operational flexibility and scalability.

The mine design incorporates bench heights ranging from 10 to 20 m, inter-ramp slope angles of approximately 34° to 52°, and haul roads designed to accommodate 140 t class haul trucks. These parameters are consistent with internationally accepted practices for safe and efficient mining operations.

The ultimate pit configuration and phased mining sequence have been optimized using industry-recognized software (Whittle SIMO), with the objective of maximizing Net Present Value ("**NPV**") while maintaining practical and executable mining conditions. The selected mining sequence prioritizes early access to higher-grade material and zones characterized by low strip ratios, thereby enhancing project economics during the initial years of operation.

The Life of Mine ("**LOM**") plan indicates an overall project duration of approximately 26 years, including pre-stripping activities, with 18 years of active mining and a peak material movement on the order of 35 Mt per annum. The process plant was designed with a nominal throughput capacity of 9,000 tonnes per day, incorporating an initial ramp-up period followed by steady state operations.

Figure 0-2 presents the production rate by phase.

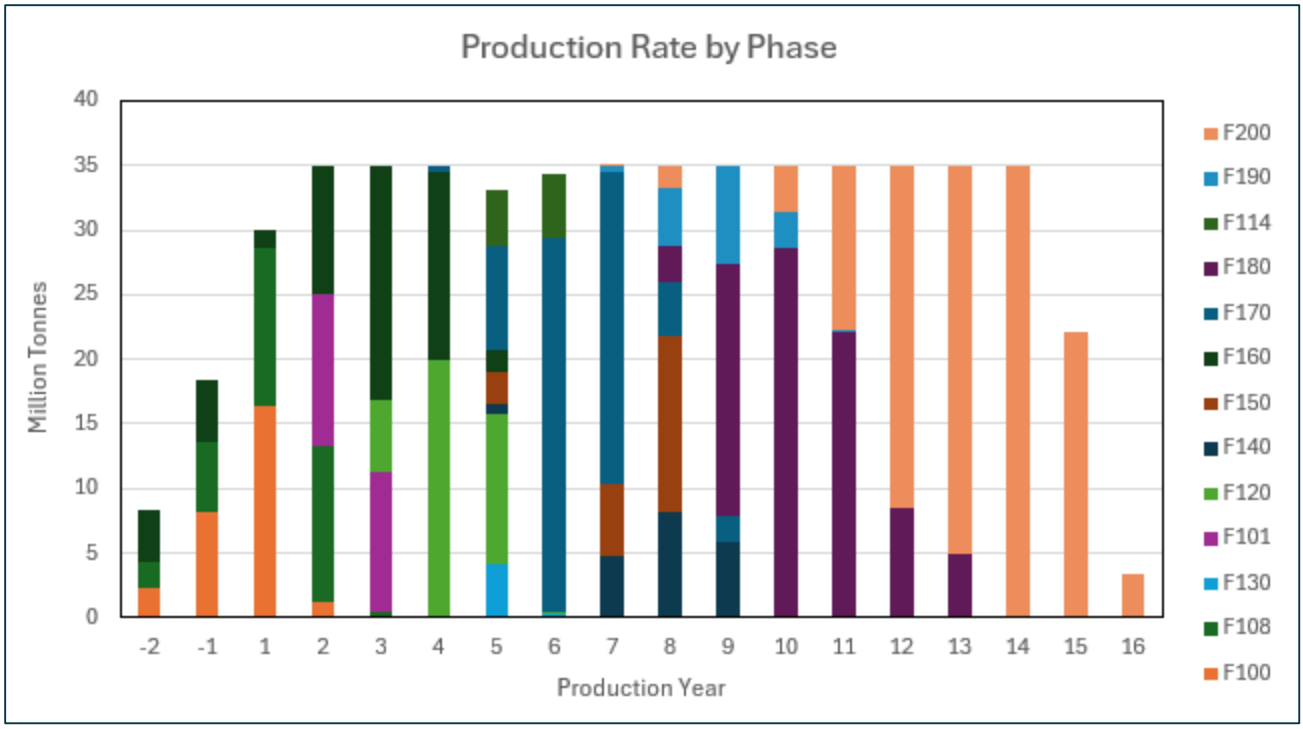

Figure 0-2: Production Rate by Phase

The material handling strategies include the development of multiple waste rock storage facilities and ore stockpiles, providing operational flexibility and enabling optimization of plant feed. Notably, the segregation and storage of subgrade material present an opportunity for potential future processing through alternative methods, such as heap leaching, representing a possible upside to the base case project configuration.

Geotechnical assessments supporting the pit design have been conducted at the bench, inter-ramp, and overall slope scales. The results demonstrate that the selected slope geometries satisfy accepted stability criteria for a feasibility level study. All analyzed sectors comply with the required Factors of Safety (FoS) and Probability of Failure (PoF) thresholds; however, certain areas would benefit from additional geotechnical data acquisition to further reduce uncertainty.

Hydrological and water management considerations were also integrated into the mine design. These include estimates of precipitation, surface runoff, and groundwater inflows to the pit, as well as the incorporation of dewatering systems and drainage infrastructure. The proposed measures are considered adequate for the anticipated environmental and operational conditions.

Based on the foregoing, the Qualified Person ("**QP**") is of the opinion that the proposed mining methods, design parameters, production schedule, and supporting technical analyses presented in Section 16 of the DFS are appropriate for the level of study completed and provide a reasonable basis for the estimation of Mineral Reserves. Further refinement is recommended through additional geotechnical investigations, hydrogeological monitoring, and the collection of operational data as the Project advances to detailed engineering and construction stages.

Recovery Methods

The Diablillos Project will utilize a conventional processing flowsheet for the recovery of silver and gold, developed based on extensive metallurgical testwork and designed to treat 9,000 tpd of ore. The process will include primary crushing and stockpiling followed by Semi-Autogenous Grinding (SAG) and ball milling in closed circuit to achieve the required grind size, with a portion of the cyclone underflow directed to gravity concentration and intensive leaching to recover coarse liberated precious metals. The primary extraction of gold and silver will be achieved through cyanide leaching in agitated tanks under controlled pH and dissolved oxygen conditions, with subsequent recovery of dissolved metals via a multi-stage counter current decantation (CCD) circuit. Precious metals will then be recovered from solution using the Merrill–Crowe process, producing a high-grade precipitate that is refined through retorting and smelting to produce doré bars. Tailings will be treated through cyanide destruction using the SO_2/air (INCO) process prior to disposal in a lined tailings storage facility ("**TSF**"), with water recovered and recycled to the process. Based on testwork and geometallurgical modelling, the process is expected to achieve average LOM recoveries of approximately 85% for gold and 79% for silver.

Figure 0-3 presents the overall project flowsheet.

Figure 0-3: Project Flowsheet

Project Infrastructure

The Diablillos Silver-Gold Project infrastructure has been developed to a feasibility study level to support a 9,000 tpd open pit mining and processing operation in a remote, high-altitude region (4,180 masl) of northwestern Argentina. The project area has limited existing infrastructure; therefore, the overall development strategy is based on constructing a largely self-sufficient, integrated infrastructure platform to enable safe, reliable, and continuous operations.

The infrastructure design encompasses all major facilities required for mining, processing, utilities, logistics, and personnel accommodation. Key components include site access roads, process plant facilities, mine service areas, water supply systems, onsite power generation, tailings and waste management infrastructure, and camp facilities for both construction and operations.

Access to site is supported by an established regional road network connecting to Salta, Catamarca, and Jujuy, supplemented by an upgraded 20 km site access road designed for all-weather and heavy transport use. International logistics will primarily utilize Chilean Pacific ports, with Mejillones-Angamos identified as the preferred port due to its cargo handling capabilities and operational reliability.

The Diablillos Project is expected to require approximately 23 MW of peak power, primarily for the process plant, and will initially be supplied by an onsite diesel power station from start-up in 2029. A future connection to the Argentine grid is anticipated by 2032, with site power distributed through a 6.6 kV network and backup generation provided for critical facilities.

Water supply is secured via a wellfield and a 14 km pipeline, with integrated raw, treated, potable, fire water, and process water systems designed to maximize recycling, including recovery from the TSF.

The process plant infrastructure comprises conventional crushing, milling, leaching, Merrill-Crowe recovery, and refining systems, supported by a full suite of ancillary facilities, including laboratories, warehouses, and maintenance workshops. Mine infrastructure includes waste rock storage, stockpiles, and fleet maintenance facilities. A comprehensive camp and non-process infrastructure supports peak construction (up to ~1,600 personnel) and steady-state operations (~400 personnel).

Overall, the infrastructure design reflects industry-standard practices and was developed to support operational reliability under challenging environmental conditions. While robust for a feasibility study, several elements remain subject to further refinement during detailed engineering, particularly with respect to utilities optimization, third party infrastructure integration, and final site layout coordination.

Market Studies and Contracts

No relevant market studies were performed, as Diablillos will produce silver and gold Doré bars, which are a readily saleable.

The price assumptions for the economic analysis were US$ 3,650/oz for gold and US$50/oz for silver. An exchange rate of 1,600 Argentinean Pesos to the US dollar was applied to cost estimates, and a long-term price of oil (West Texas Intermediate) of US$65.75/barrel was used in the calculation of fuel prices.

No contracts have been signed for further project development, but the most important procurement packages were identified and classified as supply, construction, or service packages. This allowed current budgetary quotations to be sought for the capital and operating cost estimation and will serve as a firm basis for future procurement.

Environmental Studies, Permitting and Social or Community Impact

Comprehensive environmental and socio-cultural baseline studies have been conducted in the project area over several study years, including critical elements related to hydrogeology, geochemistry, and hydrology. The environmental conditions were duly considered in the design of the Project and mitigation measures will be implemented as required. Key environmental approvals have been granted by Salta and Catamarca.

The Diablillos Project is at an advanced stage of permitting across both provincial and national jurisdictions, with the principal environmental approvals for the exploitation phase obtained. In Salta, the EIA (Declaraciones de Impacto Ambiental (DIA)) was approved for exploitation in April 2026 by the Secretaría de Minería y Energía. In Catamarca, approval was obtained for exploitation in June 2026 from the competent provincial authority.

The Project's critical path is driven by a defined set of key environmental and land access approvals, which will govern the initiation and sequencing of construction activities. These include the EIA approvals (DIA) for both Salta and Catamarca, together with water supply permitting, including water well drilling and associated hydrogeological authorizations and land tenure approvals for major infrastructure, particularly the TSF. These permits represent the principal regulatory dependencies for project execution and are directly reflected in the project development schedule.

In the opinion of Mr. Peralta, no material environmental, permitting, or land access issues have been identified that would reasonably be expected to preclude compliance with applicable regulatory requirements or the issuance of the remaining permits. Based on the status of approvals and the established permitting framework, Mr. Peralta considers that the Project has secured the principal critical path permits required to support project development.

Capital and Operating Costs

Capital Cost Estimate

The capital expenditure ("**CAPEX**") estimate for the DFS was prepared as an Association for the Advancement of Cost Engineering International (AACE) Class 3 estimate with an expected accuracy range of between -10% and +20%, which is consistent with the level of definition available at this stage. The total progress of engineering considering the feasibility study is 19%.

Table 0-3 provides a summary of the overall initial capital cost. The costs are expressed in US$ and include all mining, site preparation, process plant, onsite infrastructure, offsite infrastructure, tailings facility, first fills, and roadworks costs.

AbraSilver is targeting a final investment decision ("**FID**") in April 2027. To support project readiness and schedule objectives, AbraSilver plans to execute an early works program prior to FID, with full project execution commencing following FID approval.

The DFS capital estimate includes a Total Installed Cost ("**TIC**") of US$836.3 million, including US$70.2 million of pre-FID expenditures, US$720.6 million from FID to first production, and US$45.4 million of early sustaining capital. Excluding contingencies, the initial capital requirement totals US$723.4 million. A majority of the capital is concentrated in process plant construction, supporting infrastructure, and Owner managed development activities required to bring the operation into production.

Direct costs total US$378.3 million, representing approximately 45% of the TIC. The Process Plant (US$232.9 million) is the largest direct cost component, followed by Surface Infrastructure (US$123.7 million). Surface Infrastructure also accounts for the majority of the sustaining capital included in the TIC, with US$14.2 million allocated to infrastructure renewals and expansions during operations.

Indirect costs are estimated at US$201.0 million, including engineering, procurement, and construction management ("**EPCM**") services, temporary facilities, camps, freight, commissioning support, and other construction related expenditures. The largest component is Engineering, Procurement, Construction Management and Services (US$ 99.0 million). Approximately US$14.7 million of sustaining

capital is indirect cost to support ongoing engineering, site services, commissioning related activities, and operational support requirements over the life of the operation.

Owner's costs contribute a further US$144.2 million, driven primarily by pre-stripping development (US$91.1 million) and other Owner managed project expenditures. Included is US$11.6 million of sustaining capital associated with continued waste stripping, tailings facility development, and Owner managed investments required to maintain production throughout the mine life.

The estimate incorporates US$112.8 million of P70 contingencies, consisting of US$95.2 million in capital contingency and US$17.7 million in schedule contingency. Of this amount, approximately US$5.0 million is associated with sustaining capital activities.

In addition to the sustaining capital incorporated within the TIC, the Project includes a further LOM sustaining capital allowance of US$519.8 million, bringing the total LOM capital requirement to US$1.24 billion. This sustaining investment supports ongoing mine development, infrastructure replacements, equipment renewals, tailings storage facility expansions, and other capital works required to maintain planned production levels throughout the operation. The estimate also includes closure costs of US$74.1 million, reflecting the planned expenditures required for site reclamation and mine closure activities at the end of the project life.

Table 0-3: Capital Cost Summary by Work Breakdown Structure (WBS)

WBS L1	Cost Item	Total Cost Pre-FID (US$ M)	Total Cost FID to Silver (US$ M)	Sustaining Capital Cost (US$ M)	Total Installed Cost (US$ M)
0000	General	1.8	2.6	-	4.4

	Closure Costs			74.1	

Note: Due to rounding, totals may not equal the sum of individual line items.

Operating Cost Estimate

The estimated operating cost for the Diablillos Project is US$4,086.3 million over the LOM, equating to an average operating cost of US$52.44/t processed.

The largest cost component is mine operations, totaling US$1,110.5 million (US$14.25/t), representing approximately 27% of total operating costs. Process reagents and consumables are also a significant contributor totaling US$1,152.0 million (US$14.78/t). Electrical power supply represents another major operating expense at US$638.4 million ($8.19/t).

Labour and personnel costs total US$883.6 million (US$11.35/t), including process plant operations, mine staffing, tailings management, and site administration. Administrative costs account for the largest share of labour expenses at US$486.0 million (US$6.24/t). Site wide services and infrastructure contribute US$229.4 million (US$2.94/t), while maintenance and spares for the process plant are estimated at US$72.5 million (US$0.93/t). Table 1-4 covers the operating costs over the LOM.

Table 0-4: Operating Cost Summary - LOM

WBS	Description by WBS	Total Cost (US$ M)	US$/t Processed
1000	**Maintenance & Spares**		
1010	Process Plant Maintenance	$72.49	$0.93
2000	**Process Reagents & Consumables**		
2010	Process Plant Reagents	$935.82	$12.01
2020	Process Plant Consumables	$216.20	$2.77
3000	**Site Wide Services & Infrastructure**		
3010	Site Services & Consumables	$229.39	$2.94
4000	**Power Costs**		
4010	Electrical Power Supply	$638.38	$8.19
5000	**Labour/Personnel**		
5010	Process Plant	$134.28	$1.72
5020	AbraSilver Administration	$486.02	$6.24
5030	Mine	$229.51	$2.95

WBS	Description by WBS	Total Cost (US$ M)	US$/t Processed
5040	Tailings	$33.74	$0.43
6000	**Mine Costs**		
6010	Mine	$1,110.51	$14.25
	TOTAL	**$4,086.92**	**$52.44**

The LOM unit operating cost profile shows three distinct phases driven by changes in mining method, power supply, and eventual depletion of the open pit.

For the first three years of production, unit operating costs are elevated, ranging from approximately US$70–100/t milled, primarily due to the use of contract mining and the low plant throughput associated with project ramp up. Costs are highest in Year 1, reflecting start up conditions prior to achieving steady state production, with First Silver produced in Year 1 Q4. As operations stabilize, the unit cost declines rapidly and reaches approximately US$55–60/t milled by Year 4.

From approximately Year 4 through to Year 15, the operation enters a relatively stable steady state phase, during which unit operating costs remain largely constant at around US$58–62/t milled. A notable improvement in power cost occurs following the transition from diesel power generation to grid electricity in Year 3, which contributes to the lower operating costs observed during the middle years of the mine life. Minor fluctuations during this period are associated with changes in stripping requirements and ore sources.

A significant step change occurs in Year 16, when the open pit is depleted (Year 16 Q1) and the operation transitions to processing stockpiled material only. With active mining largely eliminated, the mining cost component drops sharply, reducing total operating costs from approximately $53/t in Year 15 to about $32–35/t milled for the remainder of the mine life. During this stockpile processing phase (Years 16–24), costs are dominated by processing, power, and general and administrative (G&A) expenses, while mining costs are minimal. Unit operating costs remain relatively flat through the end of the Project, reflecting the stable nature of reclaiming and processing stockpiled ore compared to active mining operations.

Figure 1-4 presents the LOM unit operating cost profile.

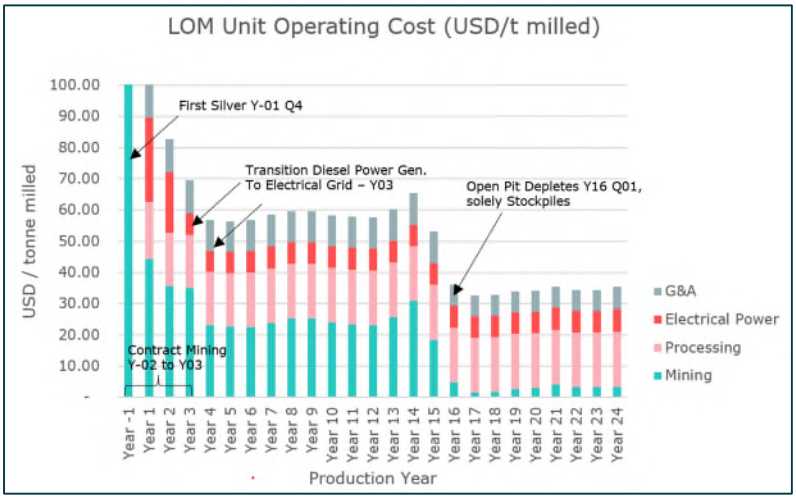

Figure 0-4: LOM Operating Cost

Economic Analysis

The economic evaluation was completed using a discounted cash flow model based on the Mineral Reserve estimate, the mine production schedule, metallurgical performance, capital and operating cost estimates, and the applicable fiscal framework. The analysis was undertaken on an after-tax basis using a 5% discount rate.

The Base Case assumes long term metal prices of US$3,650/oz for gold and US$50/oz for silver. The Project has an estimated operating life of approximately 24 years and 2 months, following an estimated 30 month construction period. Over the LOM (LOM), recovered metal production is estimated at approximately 1,539 koz of gold and 147,428 koz of silver.

The economic evaluation incorporates the fiscal incentives available under the Large Investment Incentive Regime ("**RIGI**"). Export duties, the 1.0% Net Smelter Return (NSR) royalty payable to Elemental Altus Royalties Corp. (Elemental Royalty), and the 3.0% provincial royalty are each applied to gross revenue. The remaining applicable taxes, including the 1.2% municipal tax, the 1.2% bank transaction tax, the 1.6% stamp tax, and the 25% federal corporate income tax under the RIGI regime, were calculated in accordance with the applicable Argentine tax legislation.

The Base Case economic evaluation demonstrates positive economic performance. The principal economic indicators, including the after-tax NPV (5%), Internal Rate of Return ("**IRR**"), payback period, capital expenditures, operating costs, and LOM cash flows, are summarized in Table 1-5.

Table 0-5: Summary of Financial Results

Item	Unit	FS
Silver Price	US$/Oz	50
Gold Price	US$/Oz	3650
After-Tax NPV @5%	US$ M	3,003
After-Tax IRR	%	42%
Pre-Tax NPV @5%	US$ M	4,145
Pre-Tax IRR	%	51%
Life of Mine (LOM)	years	25
Average Annual Production - Ag (LOM)	koz	5,897
Average Annual Production - Au (LOM)	koz	61.6
Average Annual Production - AgEq (LOM)	koz	10,323
Average Annual Production - Ag (Years 1 to 5)	koz	13,938
Average Annual Production - Au (Years 1 to 5)	koz	89.1
Average Annual Production - AgEq (Years 1 to 5)	koz	20,287
Total Production - Ag (LOM)	koz	147,428
Total Production - Au (LOM)	koz	1,539
Cash Cost (LOM)	US$/oz AgEq	18.3
LOM All-In Sustaining Cash Cost (LOM)	US$/oz AgEq	20.0
LOM All-In Sustaining Cash Cost (Years 1 to 5)	US$/oz AgEq	19.7
LOM All-In Sustaining Cash Cost (LOM)	US$/oz AuEq	1,458.7
LOM All-In Sustaining Cash Cost (Years 1 to 5)	US$/oz AuEq	1,437.3
Ore Mined	kt	77,911
Waste Mined	kt	461,011
Stripping Ratio Total	Waste: Ore	5.92
Stripping Ratio without considering Pre-Stripping	Waste: Ore	5.60
Total Mined	kt	538,923
Total Moved	kt	576,031
Head Grade - Ag (LOM)	g/t	73.27
Head Grade - Au (LOM)	g/t	0.70
Head Grade - AgEq (LOM)	g/t	129.1
Recovery Ag (LOM)	%	80.3%
Recovery Au (LOM)	%	87.2%
Head Grade - Ag (Years 1 to 5)	g/t	176.77
Head Grade - Au (Years 1 to 5)	g/t	1.04
Head Grade - AgEq (Years 1 to 5)	g/t	260.42
Recovery Ag (Years 1 to 5)	%	77.8%
Recovery Au (Years 1 to 5)	%	86.1%

Sustaining Capital Cost (Closure Cost Included)	US$ M	519.82

Item	Unit	FS
Operating Payback	years	1.67
Mine Life Operating Costs	US$/t processed	52.44
Mine Life Operating Costs	US$/t moved	7.09

Sensitivity Analysis

The after-tax NPV sensitivity analysis demonstrates that the Project remains economically robust across the range of scenarios evaluated. The analysis considered variations in gold and silver prices, metallurgical recoveries, operating costs, initial capital costs, diesel fuel costs, and power costs.

Among the parameters evaluated, the project economics are most sensitive to changes in silver price, followed by silver recovery, gold price, operating costs, gold recovery, and initial capital. Based on a favorable 10% sensitivity case, using a +10% variation for metal prices and recoveries and a -10% variation for operating and capital costs, silver-related parameters have the greatest influence on the project value, while initial capital has the lowest impact among the principal economic variables evaluated (see Figure 0-5).

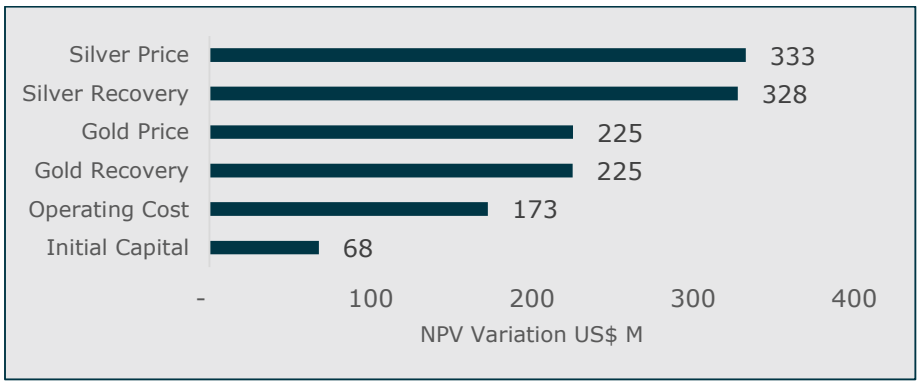

Figure 0-5: Ranking of After-Tax NPV Sensitivity (±10% Variation)

Table 0-6 presents the after-tax NPV for the Base Case, recent spot prices, and a simultaneous ±20% variation in gold and silver prices.

Table 0-6: Commodity Price Sensitivity Analysis

Economic Parameters	Base Case Prices	Recent Spot Prices[1]	Base Case Prices + 20%[2]	Base Case Prices - 20%
Silver Price ($/oz)	50.0	70.7	60.0	40.0
Gold Price ($/oz)	3,650.0	4338.0	4380.0	2920.0
After-Tax NPV (5%, US$ M)	3,003.0	4799	4116.0	1884.0
After-Tax NPV (8%, US$ M)	2,223.0	$3,623	$3,083	$1,359
After-Tax IRR (%)	41.9%	56.5%	50.9%	31.4%
Payback (Years)	1.7	1.4	1.4	2.2
After-Tax NPV5% to Initial Capex Ratio (x)	4.2	6.6	5.7	2.6

Notes:

1. Spot prices as of June 15, 2026
2. Gold and silver prices varied simultaneously by ±20% relative to the Base Case; all other assumptions remain unchanged.

Project Execution

Critical Path

The project execution schedule is driven by the development of the process plant, from early engineering and site preparation through to construction, commissioning, and first Doré production. The critical activities include pre-FID engineering, procurement of long lead items ("**LLI**"), site earthworks, installation of concrete foundations, and subsequent structural, mechanical, electrical, and instrumentation works. The schedule culminates with staged commissioning and ramp-up to full production. While mining and tailings storage facility development are integrated with key project milestones, the process plant remains the primary driver of the overall schedule.

Figure 1-6 represents a L1 critical path summary from pre-FID to first Doré, showing the primary critical path through the process plant execution. Other critical paths were also assessed as part of the project execution plan (PEP) and mitigation measures were implemented to de-risk overall execution.

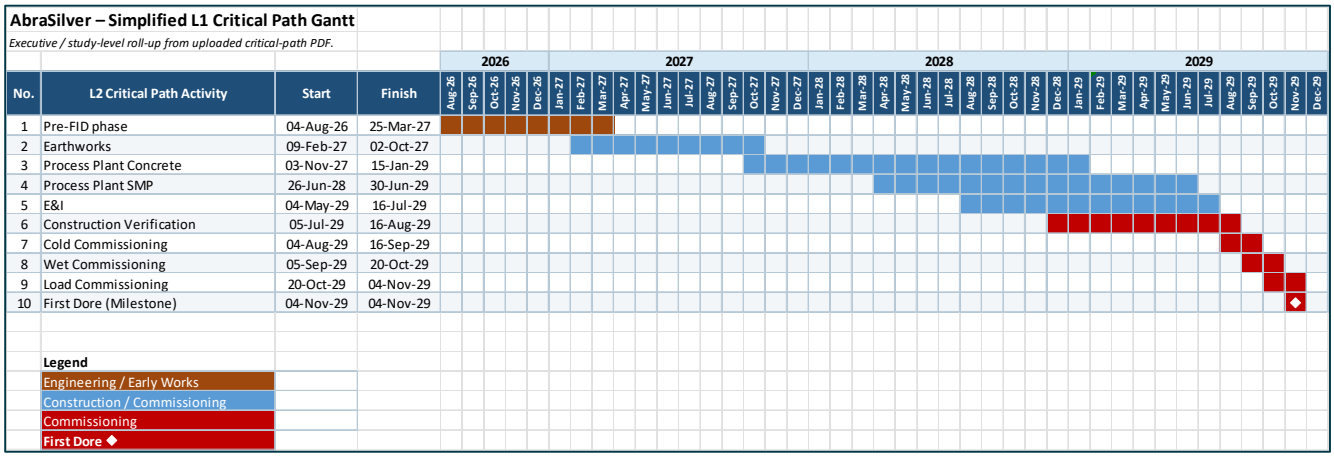

Figure 0-6: Simplified L1 Critical Path

Construction Approach

The Diablillos Project will be executed through a combination of pre-FID and post-FID activities designed to compress the overall schedule and reduce execution risk. The pre-FID work includes procurement of LLIs, advancement of detailed engineering, early contractor engagement, and construction of site infrastructure and earthworks. Following FID, construction will proceed under an EPCM execution model, with engineering, procurement, and construction activities coordinated to support a targeted 32-month post-FID execution period. This phased approach is intended to facilitate early site mobilization, accelerate project delivery, and support compliance with local regulatory requirements.

Adjacent Properties

The adjacent properties are mostly focused on developing lithium projects. Centenario-Ratones – Eramine Sudamérica and Sal de Oro – Posco are all under production. Rio Tinto, formerly Livent/FMC, has been in production since the 1990s. Other lithium projects are in early development stages. Consequently, these projects will not be competing for resources while the Project is in construction.

A joint venture between Salta Exploraciones and Litio Minera Argentina currently has a small production from an artesian brine well but is focused on expanding production on the Diablillos Salar. This project may compete for resources.

Metallic projects are mostly in early exploration stages and no competition for resources is expected.

A preliminary Project Execution Plan and Procedures Handbook were outlined. They detail the execution strategy, procedures, and a milestone schedule to identify the critical paths and key long lead items.

Conclusions, Recommendations, Opportunities

Conclusions

The Diablillos Project is considered technically viable, strongly prospective, and ready to advance from feasibility study to execution. The QPs recommend continued drilling, model refinement, expanded metallurgical testwork, and targeted engineering to reduce uncertainties and optimize project economics.

Recommendations

The Project is well defined at the feasibility study level and suitable for advancement to the next stage of engineering and execution, with some key recommendations. Beyond the Mineral Reserve defined by the current study, prospective exploration targets warrant additional drilling and testing to define additional mineable inventory to support a mine life extension or expansion project. Future engineering studies should include a heap leach expansion to evaluate the economic viability of the heap leach Mineral Resource, a tank leach plant expansion, and the evaluation of Sulphidation-Acidification-Recycling-Thickening (SART) technology to reduce reagent consumption and to increase metal recovery. Additional water exploration and well development activities are recommended to support the resource and throughput expansion potential. The potential to connect Diablillos to grid power is a key opportunity to reduce cost and to improve sustainability, and should remain a key focus of business development activity for the Project. As the Project moves into the next phase, early contractor/vendor engagement, and proactive risk mitigation measures be prioritized.

Opportunities

During the feasibility study, the Project undertook a process that identified risks and opportunities and actioned them accordingly. The Project is continuing with the action plans identified.

RECENT DEVELOPMENTS

Except as set out below, there have been no material developments in the business of the Corporation since the date of the Interim Financial Statements, which have not been disclosed in this Prospectus Supplement, the Base Shelf Prospectus or the documents incorporated by reference herein and therein.

On April 13, 2026, the Corporation announced new assay results from its four diamond drill holes from the ongoing Phase VI drill program at the Project.

On April 27, 2026, the Corporation announced that it had received approval of the Environmental Impact Assessment ("**DIA**") from the Government of Salta Province for the Project. The DIA is the principal environmental approval required in Salta Province for mining projects to advance to construction and commence operations.

On April 30, 2026, the Corporation announced new assay results from three diamond drill holes from the ongoing Phase VI drill program at the Project.

On May 6, 2026, the Corporation announced an updated mineral resource estimate in respect of the Project.

On June 15, 2026, the Corporation announced assay results from the 2026 drill program at the La Coipita copper-gold-molybdenum project located in the San Juan Province of Argentina.

On June 19, 2026, the Corporation announced that it had filed an NI 43-101 compliant technical report in respect of the updated mineral resource estimate on the Project.

On June 22, 2026, the Corporation announced the results of the DFS.

On June 24, 2026, the Corporation announced that it had received approval of the DIA from the Government of Catamarca Province for the Project. The Catamarca DIA approval represents the final major environmental permit required for the development and construction of the Project.

On June 29, 2026, the Corporation announced shareholder approval of all proposed resolutions voted on at the annual meeting of shareholders of the Corporation held on June 29, 2026.

On July 13, 2026, the Corporation announced new assay results from the ongoing Phase VI drill program at the Project.

On July 21, 2026, the Corporation announced that it had filed the DFS.

On July 22, 2026, the Corporation announced a series of appointments and promotions to the Corporation's board of directors (the "**Board**") and senior management team. The Corporation announced the following leadership changes: Marie Inkster was appointed as Executive Chair of the Board, John Miniotis, President and CEO of the Corporation, was appointed as a director of the Corporation, Jeremy Weyland, Senior Vice President, Projects and Development of the Corporation, was promoted to Chief Operating Officer of the Corporation and Hernan Zaballa and Sam Leung stepped down from the Board and will continue to support the Corporation in different capacities.

On July 22, 2026, the Corporation announced that it had entered into an agreement with the Bookrunners in connection with the Offering.

CONSOLIDATED CAPITALIZATION

Since March 31, 2026, the date of the Interim Financial Statements, there have been no material changes in the Corporation's consolidated share and loan capital other than as outlined under "*Prior Sales*" below.

The following table shows the effect of the Offering on the consolidated share and loan capital of the Corporation. The following table should be read in conjunction with the Interim Financial Statements incorporated by reference in this Prospectus Supplement:

Description	Outstanding as at March 31, 2026	Outstanding as at March 31, 2026 after giving effect to the Offering, and the transactions outlined under "*Prior Sales*"[(1)]	Outstanding as at March 31, 2026 after giving effect to the Offering, and the transactions outlined under "*Prior Sales*"[(2)]
Common Shares	160,807,928	165,014,332	165,353,332
Options	5,872,250	4,676,000	4,676,000
Warrants	Nil	Nil	Nil
Restricted Share Units	1,085,000	730,004	730,004
Total Debt	Nil	Nil	Nil

Notes:
(1) Assuming no exercise of the Over-Allotment Option.
(2) Assuming the full exercise of the Over-Allotment Option.

USE OF PROCEEDS

The net proceeds of the Offering are estimated to be $42,035,773 after deducting the Underwriters' Commission of $2,475,627 and the expenses of the Offering (estimated to be $500,000). If the Over-Allotment Option is exercised in full for Over-Allotment Shares, the net proceeds of the Offering are estimated to be $46,744,991.50, after deducting the Underwriters' Commission of $2,749,708.50 and the expenses of the Offering (estimated to be $500,000).

Principal Purposes

The Corporation currently anticipates using the net proceeds of the Offering (assuming closing of the Offering and no exercise of the Over-Allotment Option) as set forth in the following table:

Use	Allocation of Net Proceeds
Surface Infrastructure[(1)]	$14,500,000
EPCM Services[(2)]	$8,000,000
Owner's Costs[(3)]	$7,500,000

Additional Drilling in Phase VI[4]	$5,500,000
General Working Capital[5]	$6,535,773
TOTAL	**$42,035,773**

Notes:

(1) The scope of Surface Infrastructure considered encompasses accommodation facilities, including camp modules, access roads, laydown areas and select temporary facilities.

(2) EPCM Services encompasses Engineering, Procurement and Construction Management services required for the execution of the Diablillos Project. Engineering services include office and site-based engineering management, feasibility-level and detailed design engineering across all major project disciplines, as well as vendor engineering coordination. Procurement activities include sourcing and contracting for equipment, bulk materials, and long-lead items, supplier qualification and pricing, contract administration, and logistics coordination. Construction management services include site office management, construction supervision, quality assurance and quality control, schedule and cost control, safety management, subcontractor coordination, and commissioning support.

(3) Owner's Costs include expenditures incurred directly by the Corporation, separate from EPCM or contractor-provided costs, that are necessary to advance the Project to production. This category encompasses the Corporation's project management team salaries and expenses during the execution phase, pre-operational labour for process plant operations, process plant maintenance, tailings dam operations, and mine operations readiness personnel. Owner's Costs also include information technology infrastructure and services, supplied vehicles and fuel, third-party consulting services and trade-off studies, environmental management, legal fees, permitting, community relations and social programs, human resources activities including training and recruiting, security and medical personnel, and project insurance. Additionally, Owner's Costs include camp accommodation, catering, and lodging services at the Project.

(4) Additional Drilling includes expenditures for the Corporation's ongoing Phase VI exploration and resource definition drilling program at the Project. Additional drilling activities are designed to extend and further delineate known mineralization, upgrade resource confidence through infill drilling, and support the potential conversion of resources. The drilling program is also expected to include testing of priority exploration targets, where recent drilling has demonstrated potential for additional mineralized zones.

(5) General working capital is comprised of expenses related to, among other things, expected general working capital related expenditures, consultant fees, salaries and wages, accounting costs, legal fees, marketing expenditures, investor relations, and office and administration fees.

If the Over-Allotment Option is exercised in full for Over-Allotment Shares, the Corporation will receive additional net proceeds of $4,709,218.50. The net proceeds from the exercise of the Over-Allotment Option, if any, will be used for working capital purposes.

The Corporation intends to spend the funds available to it as stated above. However, there may be circumstances where, for sound business reasons, a reallocation of the net proceeds may be necessary or appropriate. The actual amount that the Corporation spends in connection with each of the intended uses of proceeds will depend on a number of factors, including those referred to under "Risk Factors" in this Prospectus.

The Corporation had negative operating cash flow for the nine months ended March 31, 2026. To the extent the Corporation has negative cash flows in future periods, the Corporation may use a greater portion of its general working capital to fund such negative cash flow than it would use if it had positive cash flows. See "Risk Factors".

Business Objectives and Milestones

The Corporation expects to accomplish the following business objectives and milestones using the net proceeds of the Offering:

Business Objective	Milestone(s) or Activities that are anticipated to occur for Business Objective to be Accomplished	Anticipated Timing to Achieve Business Objective	Estimated Cost
Surface Infrastructure	Commencement of early works site preparation, including access road construction, laydown areas, and initial camp development; procurement and delivery of construction camp modules and temporary facilities.	Q4 2027	$14,500,000
EPCM Services	Advancement of detailed engineering for critical process plant and infrastructure facilities.	Q4 2027	$8,000,000
Owner's Costs	Establishment of project management team and pre-operational personnel; completion of permitting, environmental management, and community relations activities required to support project advancement.	Q4 2027	$7,500,000
Additional Drilling in Phase VI	Completion of Phase VI exploration and resource definition drilling program, including infill drilling and testing of priority exploration targets.	Q4 2026	$5,500,000

While the Corporation believes that it has the skills and resources necessary to accomplish these business objectives, there is no certainty that the Corporation will be able to do so within the timelines indicated above, or at all. See “Risk Factors”. In addition to the net proceeds of the Offering, the Corporation expects to finance the above noted milestones through revenues from operations and additional financings, if required.

DESCRIPTION OF SECURITIES BEING DISTRIBUTED

Common Shares

The Corporation’s authorized share capital consists of an unlimited number of Common Shares without par value, of which 161,952,332 Common Shares are issued and outstanding as at the date hereof. For a summary of certain material attributes and characteristics of the Common Shares, see “Description of Securities – Description of Common Shares” in the Base Shelf Prospectus.

PLAN OF DISTRIBUTION

Pursuant to the Underwriting Agreement, the Underwriters have agreed to purchase, as principals, and the Corporation has agreed to issue and sell, on the Closing Date, an aggregate of 3,062,000 Common

Shares at the Offering Price, for aggregate gross consideration of $45,011,400, payable in cash to the Corporation against delivery of the Common Shares, subject to the terms and conditions of the Underwriting Agreement. The Offering Price was determined by arm's length negotiation between the Corporation and the Bookrunners, with reference to the prevailing market price of the Common Shares. The obligations of the Underwriters under the Underwriting Agreement are subject to certain closing conditions and may be terminated at their discretion on the basis of "regulatory out", "disaster out", "material adverse change out", and "breach out" provisions in the Underwriting Agreement and may also be terminated upon the occurrence of certain other stated events. The Underwriters are, however, obligated to take up and pay for all of the Common Shares (other than the Over-Allotment Shares) if any of such Common Shares are purchased under the Underwriting Agreement.

The total "Price to the Public", "Underwriters' Commission" and "Net Proceeds to the Corporation" will be approximately $45,011,400, $2,475,627 and $42,535,773, respectively (before deducting the estimated expenses of the Offering of $500,000).

The Underwriters have been granted the Over-Allotment Option, which is exercisable, in whole or in part, at any time, and from time to time, on or before the Over-Allotment Deadline, to purchase up to an additional 339,000 Over-Allotment Shares at the Offering Price to cover the Underwriters' over-allocation position, if any, and market stabilization purposes. The Over-Allotment Option is exercisable by the Underwriters giving notice to the Corporation prior to the Over-Allotment Deadline, which notice shall specify the number of Over-Allotment Shares to be purchased. This Prospectus Supplement qualifies the grant of the Over-Allotment Option and the distribution of Over-Allotment Shares issuable upon exercise of the Over-Allotment Option. A purchaser who acquires Over-Allotment Shares forming part of the Underwriters' over-allocation position acquires those Over-Allotment Shares under this Prospectus Supplement, regardless of whether the over-allocation position is ultimately filled through the exercise of the Over-Allotment Option or secondary market purchases.

In consideration for the services provided by the Underwriters in connection with the Offering, and pursuant to the terms of the Underwriting Agreement, the Corporation has agreed to pay the Underwriters the Underwriters' Commission equal to 5.5% of the gross proceeds from the Offering (including any gross proceeds raised on exercise of the Over-Allotment Option). Assuming the full exercise of the Over-Allotment Option, the aggregate Underwriters' Commission payable by the Corporation will be $2,749,708.50. If the Over-Allotment Option is exercised in full, the total "Price to the Public", "Underwriters' Commission" and "Net Proceeds to the Corporation" will be $49,994,700, $2,749,708.50 and $47,244,991.50, respectively.

Pursuant to the terms of the Underwriting Agreement, the Corporation has agreed to reimburse the Underwriters for certain expenses incurred in connection with the Offering and to indemnify the Underwriters and their respective subsidiaries and their respective directors, officers, employees, partners, and agents against certain liabilities and expenses and to contribute to payments the Underwriters may be required to make in respect thereof.

The Offering is being made in each of the provinces and territories of Canada, other than Québec. The Common Shares will be offered in each of the relevant provinces and territories of Canada through the Underwriters or their affiliates who are registered to offer the Common Shares for sale in such provinces and territories and such other registered dealers as may be designated by the Underwriters. Subject to applicable law, the Underwriters may offer the Common Shares in the United States and such other jurisdictions outside of Canada and the United States as agreed between the Corporation and the Underwriters.

The Corporation has applied to list the Common Shares distributed under this Prospectus on the TSX. The TSX has not conditionally approved the Corporation's listing application and there is no assurance that the TSX will approve the listing application. Listing will be subject to the Corporation fulfilling all of the listing requirements of the TSX. Closing of the Offering is conditional on the Offered Shares being conditionally approved for listing on the TSX. See "Risk Factors".

The Underwriters propose to offer the Common Shares initially at the Offering Price. After the Underwriters have made reasonable efforts to sell all of the Common Shares at such price, the offering price for the Common Shares may be decreased, and further changed from time to time, to an amount not greater than the Offering Price. If the offering price is reduced, the compensation received by the Underwriters will be reduced by the amount that the aggregate price paid by the purchasers for the Common Shares is less than the gross proceeds paid by the Underwriters to the Corporation.

The Underwriters have reserved the right to form a selling group of appropriately registered dealers and brokers, with compensation to be negotiated between the Underwriters and such selling group participants, but at no additional cost to the Corporation.

Pursuant to the Underwriting Agreement, the Corporation has agreed that without the prior written consent of the Bookrunners, on behalf of the Underwriters, such consent not to be unreasonably withheld or delayed, it will not issue or sell, agree to issue or sell, or announce an intention to issue or sell, any additional Common Shares or any securities or financial instruments, convertible into, or exercisable, redeemable or exchangeable for Common Shares, for a period ending 90 days following the Closing Date, other than: (i) pursuant to the Offering, including any Common Shares issued pursuant to the Over-Allotment Option; (ii) in connection with the exercise of anti-dilution rights under agreements existing as at July 22, 2026, including any Common Shares issued pursuant to the exercise of rights under the Investor Rights Agreements; (iii) in connection with grants of awards under the Corporation's share compensation plan; (iv) to satisfy obligations under any outstanding or subsequently granted awards under the Corporation's long-term incentive plan or in respect of any existing agreements or instruments existing as at July 22, 2026; or (v) in connection with an arm's length acquisition transaction.

Pursuant to the Underwriting Agreement, the Corporation has agreed to use its commercially reasonable efforts to cause each of the directors, officers and insiders of the Corporation to enter into a lock-up agreement to be executed concurrently with the closing of the Offering, pursuant to which each such persons shall agree that for a period of 90 days from the Closing Date, each will not, except with the prior consent of the Bookrunners, such consent not to be unreasonably withheld or delayed, directly or indirectly, offer, sell, contract to sell, grant any option to purchase, make any short sale, or otherwise dispose of, or transfer, or announce any intention to do so, any Common Shares, whether now owned directly or indirectly, or under their control or direction, or with respect to which each has beneficial ownership, or enter into any transaction or arrangement that has the effect of transferring, in whole or in part, any of the economic consequences of ownership of Common Shares, whether such transaction is settled by the delivery of Common Shares, other securities, cash or otherwise (each, a "**Transfer**") other than (i) Transfers among a shareholders' affiliates for tax or other planning purposes; or (ii) Transfers pursuant to a take-over bid or any other similar transaction made generally to all of the shareholders of the Corporation subject to certain customary exceptions.

Pursuant to policy statements of certain securities regulators, the Underwriters may not, throughout the period of distribution, bid for or purchase Common Shares. The foregoing restriction is subject to certain exceptions including: (i) a bid or purchase permitted under the Universal Market Integrity Rules for

Canadian Marketplaces administered by the Canadian Investment Regulatory Organization relating to market stabilization and passive market making activities, (ii) a bid or purchase made for and on behalf of a customer where the order was not solicited during the period of the distribution, provided that the bid or purchase was for the purpose of maintaining a fair and orderly market and not engaged in for the purpose of creating actual or apparent active trading in, or raising the price of, such securities, or (iii) a bid or purchase to cover a short position entered into prior to the commencement of a prescribed restricted period. Consistent with these requirements, and in connection with the Offering, the Underwriters may over-allot or effect transactions that are intended to stabilize or maintain the market price of the Common Shares at levels other than those which otherwise might prevail in the open market. If these activities are commenced, they may be discontinued by the Underwriters at any time. The Underwriters may carry out these transactions on the TSX, in the over-the-counter market or otherwise.

Subscriptions for the Common Shares will be received subject to rejection or allotment, in whole or in part, and the Underwriters reserve the right to close the subscription books at any time without notice. Closing of the Offering is expected to take place on the Closing Date. It is anticipated that the Common Shares will be delivered under the book-based system through CDS or its nominee and deposited in electronic form, or will otherwise be delivered registered as directed by the Underwriters, on the Closing Date. Except in limited circumstances, a purchaser of Common Shares will receive only a customer confirmation from the registered dealer from or through which the Common Shares are purchased and who is a CDS depository service participant. CDS will record the CDS participants who hold Common Shares on behalf of owners who have purchased Common Shares in accordance with the book-based system. No definitive certificates will be issued unless specifically requested or required.

United States Sales

The Common Shares have not been and will not be registered under the U.S. Securities Act or any state securities laws and may not be offered, sold or delivered, directly or indirectly, to, or for the account or benefit of, a person in the United States or a U.S. person unless exemptions from the registration requirements of the U.S. Securities Act and any applicable state securities laws are available.

Each Underwriter has agreed that, except as permitted by the Underwriting Agreement and as expressly permitted by applicable U.S. federal and state securities laws, it will not offer or sell the Common Shares at any time to, or for the account or benefit of, any person in the United States or any U.S. person as part of its distribution. The Underwriting Agreement permits the Underwriters to offer the Common Shares for sale through or by one or more U.S. registered broker-dealer affiliates of the Underwriters (the "**U.S. Affiliates**") to "qualified institutional buyers" (as defined in Rule 144A under the U.S. Securities Act) ("**Qualified Institutional Buyer**") that are, or are acting for the account or benefit of, a person in the United States or a U.S. person in compliance with Rule 144A under the U.S. Securities Act (and pursuant to similar exemptions under applicable state securities laws) and similar exemptions under applicable state securities laws. Moreover, the Underwriting Agreement provides that the Underwriters will offer and sell the Common Shares outside the United States to non-U.S. persons only in accordance with Rule 903 of Regulation S under the U.S. Securities Act. The Common Shares that are offered or sold to, or for the account or benefit of, a person in the United States or a U.S. person will be "restricted securities" within the meaning of Rule 144(a)(3) under the U.S. Securities Act and will be subject to restrictions to the effect that such securities have not been registered under the U.S. Securities Act or any applicable state securities laws and may only be offered, sold, pledged or otherwise transferred pursuant to certain exemptions from the registration requirements of the U.S. Securities Act and applicable state securities laws.

This Prospectus Supplement does not constitute an offer to sell or a solicitation of an offer to buy any of the Common Shares to, or for the account or benefit of, a person in the United States or a U.S. person. In addition, until 40 days after the commencement of the Offering, an offer or sale of the Common Shares within the United States by any dealer (whether or not participating in the Offering) may violate the registration requirements of the U.S. Securities Act if such offer or sale is made otherwise than in accordance with exemptions from registration under the U.S. Securities Act and applicable state securities laws.

TRADING PRICE AND VOLUME

Common Shares

The outstanding Common Shares are traded on the TSX under the trading symbol “ABRA”. The following table sets forth the reported trading prices and monthly aggregate trading volumes of the Common Shares on the TSX for the 12-month period prior to the date of this Prospectus Supplement (Source: TMX Money):

Period	High Trading Price	Low Trading Price	Volume
July 2025	$6.15	$4.785	5,658,362
August 2025	$6.61	$5.32	6,121,367
September 2025	$7.57	$5.37	10,626,632
October 2025	$8.09	$5.51	15,012,145
November 2025	$9.58	$6.25	9,683,632
December 2025	$11.44	$9.29	11,365,041
January 2026	$14.40	$10.25	13,737,567
February 2026	$17.97	$11.20	16,206,913
March 2026	$18.00	$9.86	26,736,221
April 2026	$17.42	$11.95	12,239,447
May 2026	$19.89	$15.11	13,435,029
June 2026	$19.31	$12.54	14,995,233
July 1-23, 2026	$16.20	$12.53	7,606,331

PRIOR SALES

The following table sets forth the details regarding all issuances of Common Shares, including issuances of all securities convertible or exchangeable into Common Shares, during the 12-month period before the date of this Prospectus Supplement:

Date	Type of Security	Issue/Exercise Price	Number of Securities
August 5, 2025	Common Shares[(1)]	1.95	6,500
August 6, 2025	Common Shares[(1)]	1.875	40,000

Date	Type of Security	Issue/Exercise Price	Number of Securities
August 7, 2025	Common Shares[1]	$1.875	100,000
October 22, 2025	Common Shares[2]	$7.10	6,783,860
October 30, 2025	Options[3]	$6.59	100,000
October 30, 2025	Restricted Share Units[3]	N/A	100,000
October 31, 2025	Common Shares[1]	$1.95	345,796
January 12, 2026	Common Shares[1]	$4.55	7,296
January 20, 2026	Common Shares	N/A	3,442
January 20, 2026	Common Shares	N/A	(3,442)
February 12, 2026	Common Shares[1]	$1.85	25,862
February 13, 2026	Common Shares[4]	$13.66	94,650
March 6, 2026	Common Shares[1]	$2.65	126,379
March 9, 2026	Common Shares[6]	N/A	(18,752)
March 10, 2026	Common Shares[1]	$1.875	21,739
March 10, 2026	Common Shares[1]	$1.85	69,705
March 10, 2026	Common Shares[1]	$1.875	34,783
March 10, 2026	Common Shares[1]	$1.85	47,922
March 10, 2026	Common Shares[1]	$1.775	42,731
March 10, 2026	Common Shares[1]	$2.51	82,541
March 10, 2026	Common Shares[1]	$4.55	12,815
March 11, 2026	Common Shares[1]	$1.85	140,000
March 11, 2026	Common Shares[1]	$1.875	17,391
March 11, 2026	Common Shares[1]	$1.85	47,922
March 11, 2026	Common Shares[1]	$1.775	42,731
March 11, 2026	Common Shares[1]	$2.51	61,906
March 11, 2026	Common Shares[1]	$4.55	10,252
March 13, 2026	Common Shares[1]	$1.875	25,461
March 13, 2026	Common Shares[1]	$1.85	35,082
April 14, 2026	Common Shares[1]	$3.32	113,344
April 27, 2026	Common Shares[1]	$1.775	42,633
June 25, 2026	Common Shares[1]	$2.51	89,938
June 25, 2026	Common Shares[1]	$4.55	9,219
June 26, 2026	Common Shares[5]	N/A	259,133
June 29, 2026	Common Shares[1]	$4.55	8,287

Date	Type of Security	Issue/Exercise Price	Number of Securities
July 2, 2026	Common Shares(1)	$1.775	130,000
July 7, 2026	Common Shares(1)	$1.875	34,805
July 7, 2026	Common Shares(1)	$1.85	69,750
July 7, 2026	Common Shares(1)	$1.775	70,165
July 7, 2026	Common Shares(1)	$2.51	92,943
July 7, 2026	Common Shares(1)	$4.55	34,244
July 7, 2026	Common Shares(1)	$4.55	15,101
July 8, 2026	Common Shares(1)	$1.875	23,925
July 8, 2026	Common Shares(1)	$1.775	52,617
July 8, 2026	Common Shares(1)	$2.51	74,340
July 8, 2026	Common Shares(1)	$4.55	23,960
July 21, 2026	Options(7)	$2.51	(30,000)
July 21, 2026	Options(7)	$4.55	(35,000)
July 21, 2026	Restricted Share Units(7)	N/A	(26,667)

Notes:

(1) Issued in connection with the exercise of stock options of the Corporation.

(2) Issued pursuant to the bought deal private placement offering and concurrent non-brokered private placement offering at a price of $7.10 per Common Share for aggregate gross proceeds of $48,165,406.

(3) Granted under the omnibus equity incentive plan of the Corporation.

(4) Issued in connection with the acquisition of several strategic mining properties in the vicinity of the Project.

(5) Issued in connection with the vesting of restricted share units of the Corporation.

(6) 18,752 Common Shares were canceled, as the deadline outlined in the Aethon Minerals Corporation and AbraPlata Resource Corp. Depositary Agreement had passed without the holder tendering their position.

(7) Cancelled in connection with a director stepping down from the Board.

CERTAIN CANADIAN FEDERAL INCOME TAX CONSIDERATIONS

The following summary is, as of the date of this Prospectus Supplement, a general summary of the principal Canadian federal income tax considerations under the *Income Tax Act* (Canada) (the "**Tax Act"**) generally applicable to an investor who acquires, as beneficial owner, a Common Share pursuant to the Offering and who, for the purposes of the Tax Act and at all relevant times: (i) deals at arm's length with the Corporation and the Underwriters, (ii) is not affiliated with the Corporation or the Underwriters, and (iii) acquires and holds the Common Shares as capital property (a "**Holder**"), all within the meaning of the Tax Act. Generally, the Common Shares will be considered to be capital property to a Holder thereof provided that the Holder does not use or hold the Common Shares in the course of carrying on a business of trading or dealing in securities and such Holder has not acquired them in one or more transactions considered to be an adventure or concern in the nature of trade.

This summary does not apply to a Holder (i) that is a "financial institution" for the purposes of the mark-to-market rules contained in the Tax Act; (ii) that is a "specified financial institution" as defined in the Tax Act; (iii) an interest in which would be a "tax shelter investment" as defined in the Tax Act; (iv) that has elected to report its "Canadian tax results" (as defined in the Tax Act) in a currency other than Canadian currency; (v) that is exempt from tax under the Tax Act; (vi) that has entered or will enter into a "derivative

forward agreement" or "synthetic disposition arrangement", as those terms are defined in the Tax Act, with respect to the Common Shares; (vii) that receives dividends on the Common Shares under or as part of a "dividend rental arrangement", as defined in the Tax Act or (viii) that is a corporation resident in Canada and is or becomes, or does not deal at arm's length with a corporation resident in Canada that is or becomes, as part of a transaction or event or series of transactions or events that includes the acquisition of Common Shares pursuant to the Offering, controlled by a non-resident person, or a group of non-resident persons not dealing with each other at arm's length, for purposes of the "foreign affiliate dumping" rules in section 212.3 of the Tax Act. **Such Holders should consult their own tax advisors with respect to an investment in Common Shares.**

This summary is based upon the current provisions of the Tax Act and the regulations thereunder, counsel's understanding of the current published administrative policies and assessing practices of the Canada Revenue Agency (the "**CRA**") and all specific proposals to amend the Tax Act and the regulations thereunder publicly announced by or on behalf of the Minister of Finance (Canada) prior to the date hereof (the "**Tax Proposals**"). This summary assumes that the Tax Proposals will be enacted as proposed; however, no assurance can be given that the Tax Proposals will be enacted as proposed or at all. This summary does not otherwise take into account or anticipate any changes in law or the CRA's administrative policies or assessing practices, whether by legislative, governmental or judicial decision or action, nor does it take into account other federal or any provincial, territorial or foreign tax legislation or considerations.

This summary is of a general nature only, is not exhaustive of all possible Canadian federal income tax considerations and is not intended to be, nor should it be construed to be, legal or tax advice to any particular Holder. Accordingly, Holders should consult their own tax advisors with respect to their particular circumstances.

Residents of Canada

The following section of this summary is generally applicable to a Holder who, for the purposes of the Tax Act and any applicable tax treaty or convention, is or is deemed to be resident in Canada at all relevant times (a "**Resident Holder**"). Certain Resident Holders whose Common Shares might not otherwise qualify as capital property may be entitled to make an irrevocable election permitted by subsection 39(4) of the Tax Act to deem the Common Shares, and every other "Canadian security" (as defined in the Tax Act), held by such Resident Holder in the taxation year of the election and each subsequent taxation year, to be capital property. Resident Holders contemplating such election should consult their own tax advisors for advice as to whether it is available and advisable in their particular circumstances.

Dividends

Dividends received or deemed to be received on the Common Shares will be included in computing a Resident Holder's income. In the case of a Resident Holder who is an individual (other than certain trusts), such dividends will be subject to the gross-up and dividend tax credit rules normally applicable in respect of "taxable dividends" received from a "taxable Canadian corporation" (as defined in the Tax Act), including the enhanced gross up and dividend tax credit in respect of taxable dividends duly designated by the Corporation as an "eligible dividend" in accordance with the provisions of the Tax Act. There may be limitations on the ability of the Corporation to designate dividends as "eligible dividends".

Dividends received or deemed to be received on the Common Shares by a Resident Holder that is a corporation must be included in computing its income but generally will be deductible in computing its

taxable income, subject to the rules and restrictions under the Tax Act. In certain circumstances, subsection 55(2) of the Tax Act will treat a taxable dividend received or deemed to be received by a Resident Holder that is a corporation as proceeds of disposition or a capital gain. Resident Holders that are corporations should consult their own tax advisors having regard to their own circumstances.

A Resident Holder that is a "private corporation" (as defined in the Tax Act) or a "subject corporation" (as defined for the purposes of Part IV of the Tax Act), may be liable to pay an additional tax (refundable in certain circumstances) under Part IV of the Tax Act on dividends received or deemed to be received on the Common Shares to the extent such dividends are deductible in computing taxable income for the year.

Dispositions of Common Shares

Upon a disposition or a deemed disposition of a Common Share (other than a disposition to the Corporation that is not a sale in the open market in the manner in which shares are normally purchased by any member of the public in the open market), a Resident Holder generally will realize a capital gain (or a capital loss) equal to the amount by which the proceeds of disposition, net of any reasonable costs of disposition, are greater (or are less) than the adjusted cost base of such share to the Resident Holder immediately before the disposition or deemed disposition. The tax treatment of capital gains and capital losses is discussed in greater detail below under the subheading "*Residents of Canada – Capital Gains and Capital Losses*". The adjusted cost base to a Resident Holder of a Common Share acquired pursuant to the Offering will be determined by averaging the cost of that Common Share with the adjusted cost base (determined immediately before the acquisition of the Common Share) of all other Common Shares (if any) held as capital property at that time by the Resident Holder.

Capital Gains and Capital Losses

Generally, a Resident Holder is required to include in computing its income for a taxation year one-half of the amount of any capital gain (a "**taxable capital gain**") realized by the Resident Holder in the year. Subject to and in accordance with the provisions of the Tax Act, a Resident Holder is required to deduct one-half of the amount of any capital loss (an "**allowable capital loss**") realized in a taxation year from taxable capital gains realized in the year. Allowable capital losses in excess of taxable capital gains may be carried back and deducted in any of the three preceding taxation years or carried forward and deducted in any subsequent taxation year against net taxable capital gains realized by the Resident Holder in such years, to the extent and in the circumstances described in the Tax Act.

The amount of any capital loss realized by a Resident Holder that is a corporation on the disposition of a Common Share may be reduced by the amount of any dividends received or deemed to have been received by such Resident Holder on Common Shares, to the extent and under the circumstances described in the Tax Act. Similar rules may apply where a corporation is a member of a partnership or a beneficiary of a trust that owns, directly or indirectly, Common Shares. Resident Holders to whom these rules may be relevant should consult their own tax advisors.

Alternative Minimum Tax

Capital gains realized or deemed to be realized and dividends received or deemed to be received by a Resident Holder that is an individual or a trust, other than certain specified trusts, may give rise to alternative minimum tax under the Tax Act. Resident Holders should consult their own advisors with respect to the application of the alternative minimum tax.

Additional Refundable Tax

A Resident Holder that is throughout the relevant taxation year a "Canadian-controlled private corporation" (as defined in the Tax Act) or, that is at any time in a relevant taxation year, a "substantive CCPC" (as defined in the Tax Act) may be liable to pay an additional tax (refundable under certain circumstances) on its "aggregate investment income" (as defined in the Tax Act) for the year, which is defined to include taxable capital gains and certain dividends. **Such Resident Holders should consult their own tax advisors in this regard.**

Non-Residents of Canada

The following section of this summary is generally applicable to Holders who for the purposes of the Tax Act and any applicable tax treaty or convention and at all relevant times (i) are not, and are not deemed to be, resident in Canada; and (ii) do not use or hold (or be deemed to use or hold) the Common Shares in carrying on a business in Canada (a "**Non-Resident Holder**").

Special rules, which are not discussed in this summary, may apply to a Non-Resident Holder that is an insurer carrying on business in Canada and elsewhere or is an "authorized foreign bank" (as defined in the Tax Act). Such Non-Resident Holders should consult their own tax advisors.

Dividends

Dividends paid or credited or deemed to be paid or credited to a Non-Resident Holder by the Corporation on any Common Shares will be subject to Canadian withholding tax at the rate of 25% of the gross amount of the dividend unless such rate is reduced by the terms of an applicable income tax treaty or convention. For example, under the *Canada-United States Tax Convention (1980),* as amended (the "**Canada-U.S. Treaty**"), the rate of withholding tax on dividends paid or credited to a Non-Resident Holder who is resident in the United States for purposes of the Canada-U.S. Treaty, is the beneficial holder of the dividends, and is fully entitled to benefits under the Canada-U.S. Treaty (a "**U.S. Holder**") is generally reduced to 15% of the gross amount of the dividend (or 5% in the case of a U.S. Holder that is a company beneficially owning at least 10% of the Corporation's voting shares). The *Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting* (the "**MLI**"), of which Canada is a signatory, affects many of Canada's bilateral tax treaties (but not the Canada-U.S. Treaty), including the ability to claim benefits thereunder. **Non-Resident Holders should consult their own tax advisors in this regard.**

Dispositions of Common Shares

A Non-Resident Holder generally will not be subject to tax under the Tax Act in respect of a capital gain realized on the disposition or deemed disposition of a Common Share, nor will capital losses arising therefrom be recognized under the Tax Act, unless the Common Share constitutes "taxable Canadian property" to the Non-Resident Holder for purposes of the Tax Act at the time of disposition, and the gain is not exempt from tax pursuant to the terms of an applicable income tax treaty or convention, including as a result of the application of the MLI.

Provided the Common Shares are listed on a "designated stock exchange" as defined in the Tax Act (which currently includes the TSX), at the time of disposition, the Common Shares generally will not constitute taxable Canadian property of a Non-Resident Holder at that time, unless at any time during the 60-month period immediately preceding the disposition of such Common Shares, the following two

conditions are met concurrently: (i) 25% or more of the issued shares of any class or series of shares of the Corporation were owned by one or any combination of (a) the Non-Resident Holder, (b) persons with whom the Non-Resident Holder did not deal at arm's length, or (c) partnerships in which the Non-Resident Holder or persons referred to in (b) hold a membership interest (directly or indirectly through one or more partnerships); and (ii) more than 50% of the fair market value of the Common Shares was derived directly or indirectly from one or any combination of real or immovable property situated in Canada, "Canadian resource properties" (as defined in the Tax Act), "timber resource properties" (as defined in the Tax Act) or an option in respect of, or an interest in, or for civil law a right in, such properties, whether or not such property exists. Notwithstanding the foregoing, a Common Share may also be deemed to be taxable Canadian property to a Non-Resident Holder for purposes of the Tax Act in certain circumstances.

Even if a Common Share is "taxable Canadian property" to a Non-Resident Holder, such Non-Resident Holder may be exempt from tax under the Tax Act on the disposition of such Common Share by virtue of an applicable income tax treaty or convention, including as a result of the application of the MLI.

A Non-Resident Holder's capital gain (or capital loss) in respect of a disposition of Common Shares that constitute or are deemed to constitute taxable Canadian property to a Non-Resident Holder (and is not exempt from tax under an applicable income tax treaty, including as a result of the application of the MLI) will generally be computed in the manner described above under the subheading "*Residents of Canada — Dispositions of Common Shares*" and "*Residents of Canada – Capital Gains and Capital Losses*". Non-Resident Holders whose Common Shares are taxable Canadian property should consult their own tax advisors regarding the tax and compliance considerations that may be relevant to them.

ELIGIBILITY FOR INVESTMENT

In the opinion of Mintz LLP, counsel to the Corporation, and Cassels Brock & Blackwell LLP, counsel to the Underwriters, based on the current provisions of the Tax Act and the regulations thereunder in force as of the date hereof and the Tax Proposals, subject to the provisions of any particular plan, the Common Shares offered hereby, if issued on the date hereof, would be, as of the date hereof, qualified investments under the Tax Act for a trust governed by a registered retirement savings plan (an "**RRSP**"), a registered retirement income fund (an "**RRIF**"), a registered education savings plan (an "**RESP**"), a first home savings account (a "**FHSA**"), a registered disability savings plan (an "**RDSP**"), a deferred profit sharing plan or a tax-free savings account (a "**TFSA**"), provided that, such shares are listed on a "designated stock exchange" for the purposes of the Tax Act (which currently includes the TSX) or the Corporation qualifies as a "public corporation" other than a "mortgage investment corporation" for purposes of the Tax Act.

Notwithstanding the foregoing, if a Common Share is a "prohibited investment" (as defined in the Tax Act) for a trust governed by an RRSP, RRIF, RESP, RDSP, FHSA or a TFSA, the annuitant under an RRSP or RRIF, the subscriber of an RESP or the holder of an RDSP, FHSA or a TFSA will be subject to a penalty tax as set out in the Tax Act. The Common Shares will generally not be a "prohibited investment" provided that such holder, subscriber or annuitant, as the case may be, deals at arm's length with the Corporation for purposes of the Tax Act and does not have a "significant interest" in the Corporation (within the meaning of the prohibited investment rules in the Tax Act). In addition, the Common Shares will not be a prohibited investment if they are "excluded property" for a trust governed by an RRSP, RRIF, RESP, RDSP, FHSA or a TFSA within the meaning of the prohibited investment rules in the Tax Act.

Prospective investors who intend to acquire Common Shares in an RRSP, RRIF, RESP, RDSP, FHSA or a TFSA should consult their own tax advisors as to whether the Common Shares will be prohibited investments in their particular circumstances.

LEGAL MATTERS & INTEREST OF EXPERTS

Certain Canadian legal matters in connection with the Offering will be passed upon on behalf of the Corporation by Mintz LLP, and on behalf of the Underwriters by Cassels Brock & Blackwell LLP. As of the date of this Prospectus Supplement, the "designated professionals" (as such term is defined in Form 51-102F2 – *Annual Information Form*) of Mintz LLP, as a group, and of Cassels Brock & Blackwell LLP, as a group, each beneficially own, directly or indirectly, less than 1% of the issued and outstanding Common Shares.

Crowe MacKay LLP acts as external auditor of the Corporation and is independent of the Corporation within the meaning of the Rules of Professional Conduct of the Institute of Chartered Professional Accountants of British Columbia.

Information of a scientific or technical nature in respect of the Project is based upon the DFS, prepared by Luis Rodrigo Peralta, Miguel Fuentealba, Pierre Lacombe, Ernesto Caner, Kevin Tanas, Donald Hickson and Shaida Miranda, each of whom is an independent “qualified person” under NI 43-101. Luis Rodrigo Peralta, Miguel Fuentealba, Pierre Lacombe, Ernesto Caner, Kevin Tanas, Donald Hickson and Shaida Miranda have reviewed certain scientific and technical information relating to the Project contained in or incorporated by reference in this Prospectus Supplement or have supervised the preparation of information upon which such scientific and technical information is based, as detailed in the DFS. To the Corporation’s knowledge, after reasonable inquiry, as of the date hereof, the aforementioned individuals and their firms, do not beneficially own, directly or indirectly, any Common Shares.

RISK FACTORS

An investment in the Common Shares is subject to a number of risks, including those set forth in the AIF, and in the management’s discussion and analysis for the Corporation’s most recently completed financial year and in the Base Shelf Prospectus under “Risk Factors”. The occurrence of any of these risks could have a material adverse effect on the Corporation’s business, financial condition, results of operations and prospects. In these circumstances, the market price of the Common Shares could decline, and you may lose all or part of your investment. These risks are not the only risks the Corporation faces; risks and uncertainties not currently known to the Corporation or that it currently deems to be immaterial may also materially and adversely affect the Corporation’s business, financial condition, results of operations and prospects. Investors should also refer to the other information set forth or incorporated by reference in this Prospectus. This Prospectus Supplement also contains forward-looking statements that involve risks and uncertainties. The Corporation’s actual results could differ materially from those anticipated in the forward-looking statements as a result of a number of factors. See “Cautionary Note Regarding Forward-Looking Information”. Prospective investors should carefully consider these risks in addition to information contained in this Prospectus and the information incorporated by reference herein, as well as the following risk factors, before purchasing Common Shares:

Negative cash flow from operations may require the need for additional financing

To date, the Corporation has had negative cash flow from operating activities. Although the Corporation anticipates it will have positive cash flow from operating activities in future periods, it expects

it will require additional working capital to fund operating activities. To the extent that the Corporation has negative cash flow in any future period, certain or all of the net proceeds from the Offering may be used to fund such negative cash flow from operating activities. Accordingly, the Corporation expects its primary use of the net proceeds of the Offering and its other available cash will be to fund its operating activities. The Corporation may require additional financing to fund its operations to the point where it is generating positive cash flows. Continued negative cash flow may restrict the Corporation's ability to pursue its business objectives. The Corporation has historically financed its working capital requirements primarily through equity and debt financings. While the Corporation has been successful in raising financing in the past, there is no assurance that it will be able to obtain additional financing or that such financing will be available on reasonable terms.

In addition, the Corporation's continued development of the Project will require additional financing. The failure to raise such capital could result in the delay or indefinite postponement of current business objectives or the Corporation going out of business. Additional financing may not be available on favorable terms, or at all. If additional funds are raised through issuances of equity or securities (including debt securities) convertible into equity, existing shareholders could suffer significant dilution, and any new equity securities issued could have rights, preferences and privileges superior to those of holders of Common Shares. In addition, from time to time, the Corporation may enter into transactions to acquire assets or the shares or securities of other entities. These transactions may be financed wholly or partially with debt, which may temporarily increase the Corporation's debt levels above industry standards. Any debt financing secured in the future could involve restrictive covenants relating to capital raising activities and other financial and operational matters, which may make it more difficult for the Corporation to obtain additional capital and to pursue business opportunities, including potential acquisitions.

The Corporation retains discretion over use of proceeds

The Corporation's management will have broad discretion concerning the use of the net proceeds of the Offering as well as the timing of their expenditures, and there can be no assurance as to how the funds will be allocated. The failure by the Corporation's management to apply these funds effectively could result in financial losses that could have a material adverse effect on the Corporation's business and cause the price of the Common Shares to decline. Pending their use, the Corporation may invest the net proceeds from the Offering in a manner that does not produce income or that loses value.

There may be dilution from future offerings

The Corporation may raise funds in the future through the sale of additional Common Shares or securities convertible into Common Shares. Any such issuances may dilute the interests of holders of Common Shares and may have a negative impact on the market price of the Common Shares. In addition, exercises of presently outstanding stock options or warrants may also result in dilution to security holders.

The Common Shares may be subject to market price volatility

The market price of the Common Shares has in the past been, and may in the future be, subject to large fluctuations which may result in losses for investors. The factors which may contribute to market price fluctuations of the Common Shares include the following:

(a) actual or anticipated fluctuations in the Corporation's quarterly results of operations;

(b) regulatory and political changes affecting the Corporation's industry generally and its business and operations;

(c) recommendations by securities research analysts;

(d) changes in the economic performance or market valuations of companies in the industry in which the Corporation operates;

(e) addition or departure of the Corporation's executive officers and other key personnel;

(f) operating and financial performance that vary from the expectations of management, securities analysts and investors;

(g) announcements of developments and other material events by the Corporation or its competitors;

(h) fluctuations to the costs of vital production materials and services;

(i) changes in global financial markets and global economies and general market conditions, such as interest rates and/or potential tariffs;

(j) natural disasters, unusual weather, pandemic outbreaks, boycotts and geo-political events or acts of terrorism;

(k) significant acquisitions or business combinations, strategic partnerships, joint ventures or capital commitments by or involving the Corporation or its competitors;

(l) operating and share price performance of other companies that investors deem comparable to the Corporation;

(m) news reports relating to trends, concerns, technological or competitive developments, regulatory changes and other related issues in the Corporation's industry or target markets; and

(n) the number of Common Shares sold on any one day and in the aggregate pursuant to the Offering.

The Corporation may not pay dividends

The Corporation has not declared and paid dividends in the past and may not declare and pay dividends in the future. Any decision to declare and pay dividends in the future will be made at the discretion of the Board and will depend on, among other things, financial results, cash requirements, contractual restrictions and other factors that the Board may deem relevant. As a result, investors may not receive any return on an investment in the Common Shares unless they sell their Common Shares for a price greater than that which such investors paid for them.

There may be no return on the Common Shares

There is no guarantee that the Common Shares will earn any positive return in the short term or long term. A holding of Common Shares is speculative and involves a high degree of risk and should be

undertaken only by holders whose financial resources are sufficient to enable them to assume such risks and who have no need for immediate liquidity in their investment. A holding of Common Shares is appropriate only for investors who have the capacity to absorb a loss of some or all of their holdings.

Investors may lose their entire investment

An investment in the Common Shares is speculative and may result in the loss of an investor's entire investment. Only potential investors who are experienced in high-risk investments and who can afford to lose their entire investment should consider an investment in the Corporation.

The inability to obtain the financing needed to achieve commercial production may impact the Corporation and the price of the Common Shares

Substantial capital investments are necessary to complete the development of the Project. The Corporation has sustained operating losses since incorporation and not earned any operating revenue. As a result, despite the Offering, the Corporation may need to raise additional funds to complete the development of the Project, as well as to conduct other exploration and development activities. The Corporation may seek to raise further funds through equity or debt financings. There is no assurance that additional funding will be available to the Corporation (or on commercially reasonable terms) for further exploration and development or the commercialization of the Project, or that the Corporation will ever be cash flow positive. If required, a failure to obtain necessary additional financing could result in delay or indefinite postponement of further exploration and development or the commercialization of the Project. If the Corporation is unable to obtain additional financing or if it obtains additional financing on unfavourable terms, it could have a material adverse effect on the Corporation's business, financial condition, results of operations, cash flows or prospects. There can be no assurance that development of the Project will be completed when expected or at all.

AGENTS FOR SERVICE OF PROCESS IN CANADA

Robert Bruggeman, Nicholas Teasdale and Stephen Gatley, each directors of the Corporation, and David O'Connor, Chief Geologist of the Corporation, reside outside of Canada. Each of these individuals have appointed the Corporation (220 Bay Street, Suite 550, Toronto, Ontario, M5J 2W4) as their agent for service of process. In addition, Luis Rodrigo Peralta, Miguel Fuentealba and Donald Hickson, reside outside of Canada. Purchasers are advised that it may not be possible for investors to enforce judgments obtained in Canada against any person that resides outside of Canada, even if the party has appointed an agent for service of process.

PURCHASERS' STATUTORY RIGHTS

Securities legislation in certain of the provinces and territories of Canada provides purchasers with the right to withdraw from an agreement to purchase securities. This right may be exercised within two business days after the later of (i) the date that the issuer (a) filed the prospectus or any amendment on SEDAR+ and, if applicable, a receipt is issued and posted for the document, and (b) issued and filed a news release on SEDAR+ announcing that the document is accessible through SEDAR+, and (ii) the date that the purchaser or subscriber has entered into an agreement to purchase the securities or a contract to purchase or a subscription for the securities. In several of the provinces and territories of Canada, the securities legislation further provides a purchaser with remedies for rescission or, in some jurisdictions, revisions of the price or damages if the prospectus and any amendment contains a misrepresentation or is not delivered to the purchaser, provided that the remedies for rescission, revision of the price or damages

are exercised by the purchaser within the time limit prescribed by the securities legislation of the purchaser's province or territory. The purchaser should refer to any applicable provisions of the securities legislation of the purchaser's province or territory for the particulars of these rights or consult with a legal adviser.

CERTIFICATE OF THE CORPORATION

Dated: July 24, 2026

The short form prospectus, together with the documents incorporated in the prospectus by reference, as supplemented by the foregoing, constitutes full, true and plain disclosure of all material facts relating to the securities offered by the prospectus and this supplement as required by the securities legislation of each of the provinces and territories of Canada.

This short form prospectus is a base shelf prospectus. This short form base shelf prospectus has been filed under legislation in each of the provinces and territories of Canada that permits certain information about these securities to be determined after this prospectus has become final and that permits the omission from this prospectus of that information. The legislation requires the delivery to purchasers of a prospectus supplement containing the omitted information within a specified period of time after agreeing to purchase any of these securities, except in cases where an exemption from such delivery requirements is available.

***No securities regulatory authority has expressed an opinion about these securities and it is an offence to claim otherwise**. This short form prospectus constitutes a public offering of these securities only in those jurisdictions where they may be lawfully offered for sale and only by persons permitted to sell these securities in those jurisdictions. These securities have not been and will not be registered under the United States Securities Act of 1933, as amended (the "**U.S. Securities Act**") or any state securities laws. Accordingly, these securities may not be offered or sold in the United States (as such term is defined in Regulation S under the U.S. Securities Act) except pursuant to transactions exempt from registration under the U.S. Securities Act and under the securities laws of any applicable state. This short form prospectus does not constitute an offer to sell or a solicitation of an offer to buy any of these securities in the United States. See "Plan of Distribution".*

***Information has been incorporated by reference in this short form prospectus from documents filed with securities commissions or similar authorities in Canada**. Copies of the documents incorporated herein by reference may be obtained on request without charge from the Chief Financial Officer and Corporate Secretary of AbraSilver Resource Corp. at 220 Bay Street, Suite 550, Toronto, Ontario, M5J 2W4 and 416-648-1626, and are also available electronically at www.sedarplus.ca.*

SHORT FORM BASE SHELF PROSPECTUS

New Issue and/or Secondary Offering December 16, 2025

ABRASILVER RESOURCE CORP.

$700,000,000

COMMON SHARES
WARRANTS
UNITS
SUBSCRIPTION RECEIPTS
DEBT SECURITIES

This short form base shelf prospectus relates to the offering for sale by AbraSilver Resource Corp. (the "**Corporation**") from time to time, during the 25-month period that this prospectus, including any amendments hereto, remains effective, of up to an aggregate of $700,000,000 of securities comprised of any of the following, or combination thereof: (i) our common shares ("**Common Shares**"); (ii) warrants ("**Warrants**") to purchase other Securities (as defined below); (iii) units ("**Units**") comprised of one or more of the other Securities; (iv) subscription receipts ("**Subscription Receipts**"); and (v) debt securities ("**Debt Securities**" and together with the Common Shares, Warrants, Units and Subscription Receipts, collectively referred to herein as the "**Securities**"). The Securities may be offered separately or together, in amounts, at prices and on terms determined by market conditions at the time of sale and as set forth in an accompanying prospectus supplement.

The specific terms of any Securities offered will be described in a prospectus supplement, including, where applicable: (i) in the case of Common Shares, the number of Common Shares offered, the offering price (in the event the offering is a fixed price distribution), the manner of determining the offering price(s) (in the event the offering is a non-fixed price distribution) and any other specific terms; (ii) in the case of Warrants, the number of Warrants being offered, the offering price (in the event the offering is a fixed price distribution), the manner of determining the offering price(s) (in the event the offering is a non-fixed price distribution), the designation, number and terms of the other Securities purchasable upon exercise of the Warrants, and any procedures that will result in the adjustment of those numbers, the exercise price, the dates and periods of exercise and any other specific terms; (iii) in the case of Units, the number of Units offered, the offering price, the designation, number and terms of the other Securities comprising the Units, and any other specific terms; (iv) in the case of Subscription Receipts, the number of Subscription Receipts being offered, the offering price (in the event the offering is a fixed price distribution), the manner of determining the offering price(s) (in the event the offering is a non-fixed price distribution), the terms, conditions and procedures for the conversion of the Subscription Receipts into other Securities, the designation, number and terms of such other Securities, and any other specific terms; and (v) in the case of Debt Securities, the designation of the Debt Securities, the aggregate principal amount of the Debt Securities being offered, the currency or currency unit in which the Debt Securities may be purchased, authorized denominations, whether payment on the Debt Securities will be senior or subordinated to the Corporation's other liabilities and obligations, the nature and priority of any security for the Debt Securities, any limit on the aggregate principal amount of the Debt Securities of the series being offered, the issue and delivery date, the maturity date, the offering price (at par, discount or at a premium), the interest rate or method of determining the interest rate, the interest payment date(s), any conversion or exchange rights that are attached to the Debt Securities, any redemption provisions, any repayment provisions, any arrangements with the trustee for the Debt Securities, and any other specific terms. A prospectus supplement relating to a particular offering of Securities may include terms pertaining to the Securities being offered thereunder that are not within the terms and parameters described in this prospectus. The Corporation does not intend on issuing "novel" securities pursuant to this prospectus, as such term is defined under National Instrument 44-102 – "*Shelf Distributions*" ("**NI 44-102**").

We or a selling securityholder may offer and sell the Securities to or through underwriters or dealers purchasing as principals, and may also sell directly to one or more purchasers or through agents or pursuant to applicable statutory exemptions. See "*Plan of Distribution*". A prospectus supplement relating to a particular offering of Securities will identify each underwriter, dealer, agent or selling securityholder, as the case may be, involved in the sale of our Securities, the amounts, if any, to be purchased by underwriters, the plan of distribution of such Securities, including, to the extent applicable, any fees, discounts or any other compensation payable to underwriters, dealers or agents in connection with the offering, the initial issue price (in the event that the offering is a fixed price distribution), the net proceeds that we will receive and any other material terms of the plan of distribution.

The Securities may be sold from time to time in one or more transactions at a fixed price or prices or at non-fixed prices, such as market prices prevailing at the time of sale (including, without limitation, sales deemed to be "at-the-market distributions" as defined in NI 44-102, including sales made directly on the Toronto Stock Exchange (the "**TSX**") or other existing trading markets for the Securities), prices related to such prevailing market prices or prices to be negotiated with purchasers, which prices may vary as between purchasers and during the period of distribution of the Securities.

If offered on a non-fixed price basis, the Securities may be offered at market prices prevailing at the time of sale, at prices determined by reference to the prevailing price of a specified security in a specified market or at prices to be negotiated with purchasers, in which case the compensation payable to an underwriter,

dealer or agent in connection with any such sale will be decreased by the amount, if any, by which the aggregate price paid for the Securities by the purchasers is less than the gross proceeds paid by the underwriter, dealer or agent to us. The price at which the Securities will be offered and sold may vary from purchaser to purchaser and during the period of distribution.

In connection with any offering of Securities other than an "at-the-market distribution" (unless otherwise specified in the relevant Prospectus Supplement), the underwriters, dealers or agents, as the case may be, may over-allot or effect transactions which stabilize, maintain or otherwise affect the market price of the Securities at a level other than those which otherwise might prevail on the open market. Such transactions may be commenced, interrupted or discontinued at any time. See "*Plan of Distribution*". No underwriter of an at-the-market distribution, and no person or company acting jointly or in concert with an underwriter, may, in connection with the distribution, enter into any transaction that is intended to stabilize or maintain the market price of the Securities or securities of the same class as the Securities distributed under this prospectus, including selling an aggregate number or principal amount of Securities that would result in the underwriter creating an over-allocation position in the Securities.

Our Common Shares are listed on the TSX under the symbol "ABRA" and on the OTCQX Best Market ("**OTCQX**") under the symbol "ABBRF". On December 15, 2025, the last trading day prior to the date of this prospectus, the closing price per Common Share on the TSX and OTCQX was $10.22 and US$7.45, respectively.

The offering of any securities under this prospectus and any prospectus supplement is subject to approval of certain legal matters by Mintz LLP.

Unless otherwise specified in the applicable prospectus supplement, each series or issue of Securities (other than Common Shares) will be a new issue of Securities with no established trading market. Accordingly, there is currently no market through which the Securities (other than Common Shares) may be sold and purchasers may not be able to resell such Securities purchased under this prospectus. This may affect the pricing of such Securities in the secondary market, the transparency and availability of trading prices, the liquidity of such Securities and the extent of issuer regulation. See "*Risk Factors*".

Prospective investors should be aware that the purchase of Securities may have tax consequences that may not be fully described in this prospectus or in any prospectus supplement, and should carefully review the tax discussion, if any, in the applicable prospectus supplement and in any event consult with a tax adviser.

An investment in the Securities is subject to a number of risks. See "*Risk Factors*" herein and the risks identified in the documents incorporated by reference herein for a more complete discussion of these risks.

No underwriter has been involved in the preparation of this prospectus or performed any review of the contents hereof.

Our head and registered office is located at 220 Bay Street, Suite 550, Toronto, Ontario, M5J 2W4. Robert Bruggeman, Hernán Zaballa, Nicholas Teasdale and Stephen Gatley each directors of the Corporation, and John Miniotis and David O'Connor, each officers of the Corporation, reside outside of Canada, and have appointed the Corporation (220 Bay Street, Suite 550, Toronto, Ontario, M5J 2W4) as their agent for service of process. In addition, Luis Rodrigo Peralta, Joseph M. Keane, Miguel Fuentealba and Shaida

Miranda, each of whom is an independent "qualified person" under National Instrument 43-101 – *Standards of Disclosure for Mineral Projects* ("**NI 43-101**"), reside outside of Canada. Purchasers are advised that it may not be possible for investors to enforce judgments obtained in Canada against any person that resides outside of Canada, even if the party has appointed an agent for service of process.

ABOUT THIS PROSPECTUS

You should rely only on the information contained in or incorporated by reference in this short form base shelf prospectus or any applicable prospectus supplement. References to this "prospectus" refer to this short form base shelf prospectus, including the documents incorporated by reference herein. We have not authorized anyone to provide you with information that is different than the information contained herein. The information contained on our website is not a part of this prospectus and is not incorporated by reference into this prospectus despite any references to such information in this prospectus or the documents incorporated by reference, and prospective investors should not rely on such information when deciding whether or not to invest in the Securities. The information in or incorporated by reference into this prospectus is current only as of the date of this prospectus or the date on the front of such other documents. It should not be assumed that the information contained in this prospectus is accurate as of any other date. We are not making an offer of these Securities where the offer is not permitted by law.

Unless otherwise stated or the context otherwise requires, in this prospectus (excluding the documents incorporated by reference herein) the terms "AbraSilver", the "Corporation", "we", "us" and "our" refer to AbraSilver Resource Corp. and its subsidiaries.

We may, from time to time, sell any combination of the Securities described in this prospectus in one or more offerings up to an aggregate amount of $700,000,000. This prospectus provides a general description of the Securities that we may offer. All information permitted under applicable laws to be omitted from this prospectus will be contained in one or more prospectus supplements that will be delivered to purchasers together with this prospectus, except in cases where an exemption from such delivery is available. Each prospectus supplement containing the specific terms of any Securities will be incorporated by reference into this prospectus for the purposes of securities legislation as of the date of the prospectus supplement and only for the purposes of the distribution of the Securities to which the prospectus supplement pertains.

Before purchasing any Securities, prospective investors should carefully read both this prospectus and the applicable accompanying prospectus supplement, together with the additional information provided in the documents incorporated by reference herein as described under the headings "*Documents Incorporated by Reference*".

Our consolidated financial statements have been prepared in accordance with International Financial Reporting Standards. In this prospectus and any prospectus supplement, all dollar amounts are in Canadian dollars unless otherwise indicated. All references to "US$" or "United States dollars" are used to indicate United States dollar values.

EXCHANGE RATE INFORMATION

The following table sets forth, for each of the periods indicated, the high, low and period end spot rates of exchange for one United States dollar, expressed in Canadian dollars, published by the Bank of Canada.

	Year ended December 31,		**Nine months ended September 30,**	
	2024 ($)	**2023 ($)**	**2025 ($)**	**2024 ($)**
High.....	$1.4416	$1.3875	$1.4603	$1.3858
Low.....	$1.3316	$1.3128	$1.3558	$1.3316
Period End	$1.4389	$1.3226	$1.3921	$1.3499

On December 15, 2025, the rate of exchange posted by the Bank of Canada for conversion of United States dollars into Canadian dollars was US$1.00 = $1.377. The Corporation makes no representation that Canadian dollars could be converted into United States dollars at that rate or any other rate.

FORWARD-LOOKING INFORMATION

Certain statements contained in this prospectus, and in the documents incorporated by reference in this prospectus, may constitute "forward-looking information" and "forward-looking statements" (together, "**forward-looking statements**") within the meaning of applicable Canadian securities laws and are based on assumptions, expectations, estimates and projections as of the date of this prospectus. Forward-looking statements include, but are not limited to, statements with respect to:

- the Corporation's planned use of funds, business objectives and operations in the next twelve months;
- future production of silver, gold, copper and other precious metals (collectively, the "**metals**");
- future cash costs per ounce or pound of the metals;
- the effects of domestic and foreign laws, regulations and government policies and actions affecting the Corporation's operations or potential future operations;
- future successful development of the Diablillos project, in the Salta Province ("**Salta**") and in the Catamarca Province ("**Catamarca**") of northwestern Argentina (the "**Diablillos Project**" or the "**Project**"), and other exploration and development projects;
- the sufficiency of the Corporation's current working capital, anticipated operating cash flow or the Corporation's ability to raise necessary funds;
- the exercise of convertible securities of the Corporation;
- estimated production rates for the metals produced by the Corporation;
- timing of production;
- the estimated cost of initial capital, operating costs, sustaining capital, and closure costs;
- ongoing or future development plans and capital replacement, improvement or remediation programs;
- the estimates of expected or anticipated economic returns from the Corporation's mining projects;
- future sales of the metals, concentrates or other future products produced by the Corporation;
- implementation of programs;
- effects of renegotiation and termination of contracts or sub-contracts; and
- the Corporation's plans and expectations for its properties and operations.

The words "may", "will", "would", "could", "should", "believes", "estimates", "projects", "potential", "expects", "plans", "intends", "projects", "assumes", "anticipates", "targeted", "continues", "forecasts", "designed", "goal", or the negative of those words or other similar or comparable words identify forward-looking statements. Forward-looking statements are based upon management's perceptions of historical trends, current conditions and expected future developments, as well as a number of specific factors and assumptions, including, without limitation risks with respect to: investing in an emerging market; potential

economic problems in Argentina; risks related to corruption; local legal and regulatory systems; political instability in Argentina; unpredictable tax rates, capital controls and foreign exchange restrictions in Argentina; risks related to the nationalization of mineral assets; risks related to the Corporation's negative operating cash flows; foreign mining operations; additional financing; volatility of the capital markets; exploration; early stage of development; attracting and retaining qualified personnel; environmental risks; burden of government regulation and permitting; local and international groups; competition risks; insurance risks; operating hazards and risks; potential conflicts of interest; political instability and hyperinflation; Russia's military action in Ukraine; precious metal and base metal price fluctuation; uncertainty of calculation of reserves and sources and metal recoveries; uncertainty of title to assets; environmental risks; litigation risks; volatility in the price of the Common Shares in the capital of the Corporation; potential dilution of present and prospective shareholdings; currency risks; financial reporting standards; and climate change.

By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and a number of factors could cause actual events or results to differ materially from the results discussed in the forward-looking statements. In evaluating these statements, a reader should specifically consider various factors, including the risks outlined under the heading "*Risk Factors*" in this prospectus and the documents incorporated by reference herein, which may cause actual results to differ materially from any forward-looking statements.

The forward-looking statements contained herein reflect management's current expectations and beliefs and are based upon certain assumptions that management believes to be reasonable based on the information currently available to management. Such assumptions include, but are not limited to:

- the legislative and regulatory environment in Argentina;
- demand for metals;
- ability to attract and retain skilled management and staff;
- progress and success of the Diablillos Project and other exploration and development projects;
- that tax regimes will remain largely unaltered;
- the Corporation's ability to obtain additional financing on satisfactory terms; and
- the global economic environment.

Many risk factors could cause the actual results, performance, or achievements to be materially different from any future results, performance, or achievements that may be expressed or implied by such forward-looking statements, including, without limitation, those listed in the "*Risk Factors*" section of this prospectus and in the documents incorporated by reference herein. Should one or more of these risks or uncertainties materialize, or should assumptions underlying the forward-looking statements prove incorrect, actual results, performance, or achievements may vary materially from those expressed or implied by the forward-looking statements contained in this prospectus. These factors should be considered carefully and prospective investors should not place undue reliance on the forward-looking statements.

Prospective purchasers are cautioned that the foregoing list is not exhaustive of all factors that could cause actual results or events to differ materially. Although we have attempted to identify important factors that could cause actual results or events to differ materially, there may be other factors that cause unanticipated results or events. There can be no assurance that such forward-looking information and statements will

prove to be accurate as actual results and future events could differ materially from those anticipated in such information and statements.

Prospective purchasers should not place undue reliance on forward-looking information and statements, including the documents incorporated herein by reference, as statements containing forward-looking information involve significant risks and uncertainties and should not be read as guarantees of future results, performance, achievements, prospects and opportunities. The forward-looking information and statements contained herein are presented for the purposes of assisting prospective purchasers in understanding our expected financial and operating performance and our plans and objectives and may not be appropriate for other purposes.

The forward-looking statements contained in this prospectus speak only as of the date of this prospectus. The forward-looking statements contained herein are expressly qualified in their entirety by this cautionary statement. The cautionary statements contained or referred to in this section should be considered in connection with any subsequent written or oral forward-looking statements that we and/or persons acting on our behalf may issue. We undertake no obligation to update or revise any forward-looking statements, whether because of new information, future events or otherwise, other than as required under securities legislation.

MARKET AND INDUSTRY DATA

Unless otherwise indicated, market data and certain industry data and forecasts included in this prospectus and the documents incorporated by reference herein concerning the Corporation's industry and the markets in which the Corporation operates or seeks to operate were obtained from internal company surveys, market research, publicly available information, reports of governmental agencies and industry publications and surveys. The Corporation has relied upon industry publications as the Corporation's primary sources of third-party industry data and forecasts. The Corporation has not independently verified any of the data from third-party sources, nor has the Corporation ascertained the underlying assumptions relied upon therein. Similarly, internal surveys, industry forecasts and market research, which the Corporation believes to be reliable based upon the Corporation's knowledge of the industry, have not been independently verified, and the Corporation does not know what assumptions were used in their preparation. By their nature, forecasts are particularly subject to change or inaccuracies, especially over long periods. While the Corporation is not aware of any misstatements regarding the industry data presented herein or via the documents incorporated herein by reference, estimates involve risks and uncertainties and are subject to change based on various factors, including those discussed under "*Forward-Looking Infomration*" and "*Risk Factors*" in this prospectus and the documents incorporated by reference herein. While the Corporation believes that its internal research is reliable and market definitions are appropriate, neither such research nor definitions have been verified by any independent source. For the avoidance of doubt, nothing stated in this paragraph operates to relieve the Corporation from liability for any misrepresentation contained in this prospectus under applicable Canadian securities laws.

SCIENTIFIC AND TECHNICAL INFORMATION

Scientific and technical information relating to the Diablillos Project contained in this prospectus is derived from, and in some instances is a direct extract from, and based on the assumptions, qualifications and procedures set out in, the technical report entitled “NI 43-101 Technical Report, Mineral Resource Estimate for the Diablillos Ag-Au Project”, dated September 12, 2025 and effective as of July 29, 2025 (the “**Technical Report**”), prepared by each of the following qualified persons: Luis Rodrigo Peralta, Joseph M. Keane, Miguel Fuentealba and Shaida Miranda (collectively, the “**Qualified Persons**”). Reference should

be made to the full text of the Technical Report, which is available for review under the Corporation's profile on SEDAR+ at www.sedarplus.ca. Additional scientific and technical information contained in this prospectus has been reviewed and approved by Jeremy Weyland, Senior Vice President, Projects and Development of the Corporation, and a "qualified person" within the meaning of NI 43-101.

If, after the date of this prospectus, the Corporation is required by Section 4.2(1)(j) of NI 43-101 to file a technical report to support scientific or technical information that relates to a mineral project on a property material to the Corporation and the exemption under Section 9.2 of NI 43-101 is not available, the Corporation will file such technical report in accordance with Section 4.2(5)(a)(i) of NI 43-101 as if the words "preliminary short form prospectus" refer to a "shelf prospectus supplement".

CIM Definition Standards

The following definitions are reproduced from the CIM Definition Standards:

"**Indicated Mineral Resource**" means that part of a Mineral Resource for which quantity, grade or quality, densities, shape, and physical characteristics are estimated with sufficient confidence to allow the application of Modifying Factors as described below in sufficient detail to support mine planning and evaluation of the economic viability of the deposit. Geological evidence is derived from adequately detailed and reliable exploration, sampling and testing and is sufficient to assume geological and grade or quality continuity between points of observation. An Indicated Mineral Resource has a lower level of confidence than that applying to a Measured Mineral Resource and may only be converted to a Probable Mineral Reserve.

"**Inferred Mineral Resource**" means that part of a Mineral Resource for which quantity and grade or quality are estimated on the basis of limited geological evidence and sampling. Geological evidence is sufficient to imply but not verify geological and grade or quality continuity. An Inferred Mineral Resource has a lower level of confidence than that applying to an Indicated Mineral Resource and must not be converted to a Mineral Reserve. It is reasonably expected that the majority of Inferred Mineral Resources could be upgraded to Indicated Mineral Resources with continued exploration.

"**Measured Mineral Resource**" means that part of a Mineral Resource for which quantity, grade or quality, densities, shape, and physical characteristics are estimated with confidence sufficient to allow the application of Modifying Factors to support detailed mine planning and final evaluation of the economic viability of the deposit. Geological evidence is derived from detailed and reliable exploration, sampling and testing and is sufficient to confirm geological and grade or quality continuity between points of observation. A Measured Mineral Resource has a higher level of confidence than that applying to either an Indicated Mineral Resource or an Inferred Mineral Resource. It may be converted to a Proven Mineral Reserve or to a Probable Mineral Reserve.

"**Mineral Reserve**" means the economically mineable part of a Measured and/or Indicated Mineral Resource. It includes diluting materials and allowances for losses, which may occur when the material is mined or extracted and is defined by studies at pre-feasibility or feasibility level as appropriate that include application of Modifying Factors. Such studies demonstrate that, at the time of reporting, extraction could reasonably be justified. The reference point at which Mineral Reserves are defined, usually the point where the ore is delivered to the processing plant, must be stated. It is important that, in all situations where the reference point is different, such as for a saleable product, a clarifying statement is included to ensure that the reader is fully informed as to what is being reported. The public disclosure of a Mineral Reserve must be demonstrated by a pre-feasibility study or feasibility study.

"**Mineral Resource**" means a concentration or occurrence of solid material of economic interest in or on the Earth's crust in such form, grade or quality and quantity that there are reasonable prospects for eventual economic extraction. The location, quantity, grade or quality, continuity and other geological characteristics of a Mineral Resource are known, estimated, or interpreted from specific geological evidence and knowledge, including sampling.

"**Probable Mineral Reserve**" means the economically mineable part of an Indicated Mineral Resource, and in some circumstances, a Measured Mineral Resource. The confidence in the Modifying Factors applying to a Probable Mineral Reserve is lower than that applying to a Proven Mineral Reserve.

"**Proven Mineral Reserve**" means the economically mineable part of a Measured Mineral Resource. A Proven Mineral Reserve implies a high degree of confidence in the Modifying Factors.

For the purposes of the CIM Definition Standards, "**Modifying Factors**" are considerations used to convert Mineral Resources to Mineral Reserves. These include, but are not restricted to, mining, processing, metallurgical, infrastructure, economic, marketing, legal, environmental, social, and governmental factors.

DOCUMENTS INCORPORATED BY REFERENCE

Information has been incorporated by reference in this prospectus from documents filed with the securities commissions or similar regulatory authorities in Canada. Copies of the documents incorporated herein by reference may be obtained on request without charge from the Chief Financial Officer and Corporate Secretary of AbraSilver Resource Corp. at 220 Bay Street, Suite 550, Toronto, Ontario, M5J 2W4, telephone 416-648-1626, and are also available electronically at www.sedarplus.ca.

The following documents filed with the securities commission or similar regulatory authority in each of the provinces and territories of Canada are specifically incorporated by reference into this prospectus:

(a) the annual information form dated April 3, 2025, for the year ended December 31, 2024 (the "**AIF**"), except for the information contained under the heading "*Material Mineral Properties*" therein, which has been superseded by the information contained in this prospectus under the heading "*The Diablillos Project*";

(b) the audited consolidated financial statements of the Corporation for the years ended December 31, 2024 and December 31, 2023, together with the notes thereto and the independent auditor's report thereon;

(c) the unaudited consolidated financial statements of the Corporation for the three and nine months ended September 30, 2025 and September 30, 2024, together with the notes thereto;

(d) the management's discussion and analysis of the Corporation dated April 3, 2025 for the years ended December 31, 2024 and December 31, 2023;

(e) the management's discussion and analysis of the Corporation dated November 13, 2025 for the three and nine months ended September 30, 2025 and September 30, 2024;

(f) the management information circular dated May 15, 2025, prepared in connection with an annual general and special meeting of the Corporation's shareholders held on June 26, 2025;

(g) the material change report of the Corporation dated February 21, 2025 in connection with the private placement offering of 11,193,565 Common Shares at a price of $2.55 per Common Share for aggregate gross proceeds of $28,543,591;

(h) the material change report of the Corporation dated February 10, 2025 in connection with the bought deal private placement offering of 10,231,000 Common Shares at a price of $2.55 per Common Share for aggregate gross proceeds of $26,089,050; and

(i) the material change report of the Corporation dated October 16, 2025 in connection with the bought deal private placement offering of 6,113,000 Common Shares at a price of $7.10 per Common Share for aggregate gross proceeds of $43,402,300 (the "**LIFE Offering**").

Any documents of the types referred to in the preceding paragraphs or required by Item 11.1 of Form 44-101F1 – *Short Form Prospectus*, filed by us with a securities commission or similar regulatory authority pursuant to the requirements of applicable securities legislation after the date of this short form prospectus and prior to the expiry of this prospectus or completion of the issuance of Securities pursuant hereto, will be deemed to be incorporated by reference into this prospectus.

Any “template version” of any other “marketing materials” (as such terms are defined in National Instrument 41-101 — *General Prospectus Requirements*) pertaining to a distribution of Securities, and filed by us after the date of a prospectus supplement for the distribution of such Securities and before the termination of the distribution of such Securities, will be deemed to be incorporated by reference into that prospectus supplement.

Any prospectus supplement containing specific terms applicable to the issuance of Securities and other information applicable to such issuance will be delivered, together with this prospectus, to purchasers and will be deemed to be incorporated by reference into this prospectus as of the date of such prospectus supplement, but only for the purposes of the offering of Securities to which such prospectus supplement pertains.

Any statement contained in a document incorporated or deemed to be incorporated by reference herein will be deemed to be modified or superseded for the purposes of this prospectus to the extent that a statement contained in this prospectus or in any subsequently filed document that also is or is deemed to be incorporated by reference herein modifies or supersedes such statement. Any statement so modified or superseded will not constitute a part of this prospectus, except as so modified or superseded. The modifying or superseding statement need not state that it has modified or superseded a prior statement or include any other information set forth in the statement or document that it modifies or supersedes. The making of such a modifying or superseding statement will not be deemed an admission for any purpose that the modified or superseded statement, when made, constituted a misrepresentation, an untrue statement of a material fact or an omission to state a material fact that is required to be stated or that is necessary to make a statement not misleading in light of the circumstances in which it was made. Any statement so modified or superseded shall not be deemed in its unmodified or superseded form to constitute part of this prospectus.

Upon any new annual information form or new annual financial statements and related management's discussion and analysis being filed by us with the applicable securities regulatory authorities in Canada during the period that this prospectus is effective, the previous year's annual information form, the previous year's annual financial statements and all interim consolidated financial statements relating to prior financial periods or material change reports filed before the commencement of the financial year in which the new annual information form is filed, and any business acquisition reports for acquisitions completed since the beginning of such financial year (in each case, as applicable) will be deemed to no longer be incorporated by reference in this prospectus for the purpose of future offers and sales of Securities under this prospectus. Upon unaudited interim condensed consolidated financial statements and related management's discussion and analysis being filed by us with the applicable securities regulatory authorities during the currency of this prospectus, all previously filed unaudited interim condensed consideration financial statements and related management's discussion and analysis will be deemed to no longer be incorporated by reference into this prospectus for the purposes of future offers and sales of Securities under this prospectus. Upon any new information circular prepared solely in connection with an annual general meeting being filed by us with the applicable securities regulatory authorities in Canada during the period that this prospectus is effective, the previous year's information circular prepared solely in connection with an annual general meeting will be deemed to no longer be incorporated by reference in this prospectus for the purpose of future offers and sales of Securities under this prospectus.

References to our website in any documents that are incorporated by reference into this prospectus do not incorporate by reference the information on such website into this prospectus, and we disclaim any such incorporation by reference.

TRADEMARKS AND TRADE NAMES

This prospectus and the documents incorporated by reference herein may include certain trademarks and trade names that are protected under applicable intellectual property laws and are our property. Solely for convenience, our trademarks and trade names referred to in this prospectus and the documents incorporated by reference herein may appear without the ® or ™ symbol, but such references are not intended to indicate, in any way, that we will not assert, to the fullest extent under applicable law, our rights to these trademarks and trade names. All other trademarks used in the prospectus or the documents incorporated by reference herein are the property of their respective owners.

ABRASILVER RESOURCE CORP.

AbraSilver is a silver, gold, and copper exploration company with projects in Argentina. The Corporation has projects at various stages of exploration, from drill-ready to pre-feasibility study stage. Its primary focus is on exploring and advancing the Diablillos Project, which is a high sulphidation epithermal silver-gold deposit with a large Mineral Resource estimate. In addition, the Corporation owns a portfolio of earlier-stage copper-gold projects including the La Coipita copper-gold project in the San Juan province of Argentina and in respect of which the Corporation has entered into an option and joint venture agreement with a subsidiary of Teck Resources Limited. See "*Corporate Structure*", "*General Development of the Business*", and "*Description of the Business*", in the AIF.

Appointment of Director

On September 24, 2025, the Corporation announced that Marie Inkster was appointed as a director and chair of the Board.

Principal Occupation

Name, and State and Country of Residence	Principal Occupation During the Last Five Years	Director or Officer Since	Securities of the Company Owned or Controlled
Marie Inkster *Toronto, Canada*	Independent Director, Cameco Corp. (May 2025 – present); Independent Director, member of the Audit & Risk Committee, Foran Mining Corp. (May 2024 – present); Independent Director, Chair of Audit and Risk Committee, member of Governance, Capital Allocation and Projects Committee, Vale S.A. (April 2023 – July 2024); Independent Director, Chair of Audit Committee, Lucara Diamond Corp. (June 2014 – May 2024); Board Chair, International Zinc Association (November 2020 – January 2022); Director, President and Chief Executive Officer, Lundin Mining Corporation (October 2018 to October 2021).	September 2025	18,350(1)

Notes:

(1) Ms. Inkster holds stock options to acquire 100,000 Common Shares and restricted share units to acquire 100,000 Common Shares.

Relevant Experience

Ms. Inkster is an accomplished mining executive and corporate director with more than 25 years of international experience spanning corporate leadership, finance, governance and capital markets. From 2018 to 2021, she served as President and Chief Executive Officer of Lundin Mining Corporation, after nearly a decade as its Chief Financial Officer. She currently serves on the boards of Cameco Corp. and Foran Mining Corp., and has also held board roles with global mining leaders including Vale S.A. and Lucara Diamond Corp. Ms. Inkster received a bachelor of business administration degree from St. Francis Xavier University and is a member of the Chartered Professional Accountants of Ontario.

Cease Trade Orders, Bankruptcies, Penalties or Sanctions

Ms. Inkster is not and has not been within 10 years before the date of this prospectus, a director, chief executive officer or chief financial officer of any company that:

(a) while she was acting in that capacity, was the subject of a cease trade order or similar order or an order that denied the relevant company access to any exemption under securities legislation for a period of more than 30 consecutive days; or

(b) while she was acting in that capacity, was subject to an event that resulted, after she ceased to be a director or executive officer, in the company being the subject of a cease trade or similar order or an order that denied the relevant company access to any exemption under securities legislation for a period of more than 30 consecutive days.

Ms. Inkster is not and has not been within 10 years before the date of this prospectus:

(a) a director or executive officer of any company that, while she was acting in that capacity, or within a year of her ceasing to act in that capacity, became bankrupt, made a proposal under any legislation relating to bankruptcy or insolvency or was subject to or instituted any

proceedings, arrangement or compromise with creditors or had a receiver, receiver manager or trustee appointed to hold its assets;

(b) bankrupt, made a proposal under any legislation relating to bankruptcy or insolvency, or become subject to or instituted any proceedings, arrangement or compromise with creditors, or had a receiver, receiver manager or trustee appointed to hold the assets of the director, executive officer or shareholder; or

(c) subject to:

(i) any penalties or sanctions imposed by a court relating to securities legislation or by a securities regulatory authority or has entered into a settlement agreement with a securities regulatory authority since December 31, 2000 or before December 31, 2000 the disclosure of which would likely be important to a reasonable security holder in making an investment decision; or

(ii) any other penalties or sanctions imposed by a court or regulatory body that would likely be considered important to a reasonable securityholder in making an investment decision.

Conflicts of Interest

To the best of the Corporation's knowledge, there are no known existing or potential conflicts of interest of Ms. Inkster as a result of her outside business interests.

Recent Developments

Except as set out below, there have been no material developments in the business of the Corporation since September 30, 2025, the date of the Corporation's most recently completed financial period, which have not been disclosed in this prospectus or the documents incorporated by reference herein.

On October 6, 2025, the Corporation announced the LIFE Offering and a concurrent private placement pursuant to a participation right held by Kinross Gold Corporation and Proener SAU (the "**Concurrent Private Placement**").

On October 22, 2025, the Corporation announced the closing of the LIFE Offering and the Concurrent Private Placement. Pursuant to the LIFE Offering, the Corporation issued an aggregate of 6,513,000 Common Shares at a price of $7.10 per Common Share for aggregate gross proceeds of $46,242,300. Pursuant to the Concurrent Private Placement, the Corporation issued an aggregate of 270,860 Common Shares at a price of $7.10 per Common Share for aggregate gross proceeds of $1,923,106.

On October 28, 2025 and November 19, 2025, the Corporation announced new assay results from additional drill holes from the ongoing Phase V exploration program at its wholly-owned Diablillos project in Argentina.

On November 21, 2025, the Corporation announced that it had formally submitted its application for the Diablillos silver-gold project to be included under Argentina's Large Investment Incentive Regime ("**RIGI**").

Shareholder Rights

As the Corporation's material operations are located in Argentina, it is important to highlight the differences of the rights and remedies generally available to shareholders of a corporation under the respective corporate statutes in Canada, for example, the *Business Corporations Act* (British Columbia) and the Argentine Companies Law:

	Matter	**Canada (*Business Corporations Act (British Columbia)*)**	**Argentina (Argentine Companies Law)**
1.	Legal Liability	Shareholders of a corporation are generally not liable for the debts or obligations of the corporation. Directors are generally not liable for the debts or obligations of the corporation, except for certain statutory exceptions.	Shareholders of a corporation are generally not liable for the debts or obligations of the corporation. Directors may be held personally liable to the company, shareholders and third parties if they fail to comply with their general legal duties or specific duties contained in the Argentine Companies Law.
2.	Shareholder Meeting Requirements	Required to hold annual meeting of shareholders to vote on certain items, such as election of directors, unless a unanimous shareholder agreement is in effect that specifies how directors are to be appointed.	Required to hold an annual meeting of shareholders to approve the financial statements of the company.
3.	Summary of director's, officer's and shareholder's authority and limitations thereof	Directors are elected by the shareholders (or may be appointed under a unanimous shareholder agreement) and are the highest authority in the management of the corporation and govern the organization by establishing broad policies and objectives. In contrast, officers are appointed by the directors to oversee day-to-day operations of the corporation. Shareholders may adopt a unanimous shareholders agreement to restrict powers of directors.	Directors are elected by the shareholders (or may be appointed under a unanimous shareholder agreement) and are the highest authority in the management of the corporation. According to the law, the president of the board of directors represents the company although the by-laws may authorize the performance of one or more directors. The directors can appoint general or special managers, whether they are directors or not, freely revocable, to delegate the executive functions of the administration. Their appointment does not exclude the responsibility of the directors.
4.	Public disclosure of identity of directors, officers and shareholders	Identity of directors is publicly disclosed; certain jurisdictions require disclosure of officers; identity of shareholders of private, non-listed companies is not publicly disclosed in most jurisdictions.	The appointment of directors must be registered with the Public Register of Commerce and the identity of directors of private, non-listed companies is not publicly disclosed in Argentina.
5.	Minimum and maximum number of shareholders	There must be a minimum of 1 shareholder. There is no maximum number.	There must be a minimum of 2 or more shareholders, except for one special form of corporation called 'Sociedad Anónima Unipersonal' (S.A.U.), that may be incorporated and held by a single shareholder.

	Matter	Canada (*Business Corporations Act (British Columbia)*)	Argentina (Argentine Companies Law)
6.	Removal of directors or officers	Removal of directors is generally allowed by a vote of shareholders; removal of officers is generally allowed by a vote of directors.	Removal of directors or managers shall be approved by the shareholders meeting and then registered in the public register.
7.	Quorum requirements for shareholder meetings	For a shareholder meeting, the quorum set out in the corporate bylaws, articles of incorporation or unanimous shareholder agreement must be present during the shareholder meeting.	For ordinary shareholders' meetings, quorum on first call requires the presence of shareholders representing the majority of the voting shares. If quorum is not reached, the meeting may be held at a second call, iIn which case, the meeting is validly constituted regardless of the number of shareholders present. For extraordinary shareholders' meetings, quorum on first call requires the presence of shareholders representing 60 percent (60%) of the voting shares, unless the bylaws establish a higher quorum. If quorum is not reached, the meeting may be held at a second call. In this case, the meeting is validly constituted with the presence of shareholders representing 30 percent (30%) of the voting shares, unless the bylaws provide otherwise.
8.	Approval requirements for amending charter documents	Typically, a corporation's shareholders must approve, by special resolution, any amendments to the articles of incorporation. Some changes to the articles give rise to a mandatory vote of shareholders or even a separate class vote. Some changes to the articles also give rise to an appraisal right.	Amendments to bylaws in all companies must be approved by shareholders or members' meeting and then filed for registration by the public registry.

THE DIABLILLOS PROJECT

The following is the executive summary section of the Technical Report prepared by each of Luis Rodrigo Peralta, Joseph M. Keane, Miguel Fuentealba and Shaida Miranda, which supersedes the information contained under the heading "Material Mineral Properties" in the AIF. The following summary does not purport to be a complete summary of the Diablillos Project and is subject to all of the assumptions, qualifications and procedures set out in the Technical Report and is qualified in its entirety with reference to the full text of the Technical Report, which is incorporated by reference herein. Readers should read this summary in conjunction with the Technical Report, which is available for review under the Corporation's profile on SEDAR+ at www.sedarplus.ca.

Introduction

The purpose of this Technical Report is to support the public disclosure of the Mineral Resource Estimate ("MRE") results. Mr. Peralta visited the property from December 6th, 2024, to December 11th, 2024, from April 8th to April 14th and from August 25th to August 29th, 2025, for the purposes of this report. Mineral

Resources for the Diablillos Project were estimated by Mr. Peralta, Qualified Person (“QP”), who considers that the input data was suitable for use in the MRE.

Metallurgical test-work carried out in support of the Project is also included in this report for which the QP is Joseph M. Keane, P.E. who is an Independent Mineral Processing Engineer Consultant and a Registered Member of the SME.

The Mineral Reserve estimate based on the November 2023 MRE has also been included in this report. Likewise, the corresponding mine design, operational mining phases, and stability analysis have also been included, taken entirety from the previous NI 43-101 Technical Report Updated Pre-Feasibility Study for the Diablillos Project, dated January 17th, 2025.

The following sections have not been modified and have been taken in their entirety from the previous NI 43-101 Technical Report Updated Pre-Feasibility Study for the Diablillos Project, dated January 17th, 2025: Recovery method (Section 13), Project infrastructure (Section 18), Market studies and contracts (Section 19), Environmental studies, permitting and social or community impact (Section 20), Capital and operating cost (Section 21), Adjacent properties (Section 23) and Other relevant data and information (Section 24).

Responsibility for each chapter is described in the QP certificates.

The Project is located within the Puna region of Argentina, in the southern part of Salta Province and northern part of Catamarca, approximately 160 km southwest of the city of Salta and 375 km northwest of the city of Catamarca. The property comprises 15 contiguous and overlapping mineral leases acquired by AbraSilver in 2016. The mining concessions were granted by the Government of Salta through an agreement with SSRM Mining (“SSRM”,) and Pacific Rim Mining Corporation Argentina SA, an Argentinian company and the registered owner of the Diablillos property.

The Project hosts several known occurrences of epithermal gold-silver mineralization. Exploration work, conducted by several operators over the history of the Project, includes 157,211m of total drilling in 733 drill holes, consisting of 109,633m from diamond drillholes (“DDH”) and 47,578m from reverse circulation (“RC”). The area that has been the focus of the vast majority of drilling is named the Oculto zone. In 2022, AbraSilver discovered a new high-grade silver zone, located to the southwest of Oculto, which was named the JAC zone and was the focus of the Company’s most recent drill campaign in 2022 – 2025. Also, during 2024, a close satellite area, named Sombra, between the Oculto Zone and JAC zone was discovered, a few drillholes have been done in this area, but enough to justify the continuity of the exploration.

The Project currently consists of several near-surface silver-gold deposits, namely: Oculto, JAC, Laderas, Sombra and Fantasma. In addition, several satellite zones of silver and gold rich epithermal mineralization have been located surrounding the Oculto/JAC epicentre within a distance of approximately 500 meters to 1.5 kilometers, which require additional drilling. The focus of this report is solely on the Oculto, JAC, Fantasma, Sombra and Laderas zones, which form the basis of the current MRE.

Mineral Resources at the Project are considered as potentially mineable by open pit methods and are estimated based on prior drilling, as well as the most recent drilling campaign performed by AbraSilver between 2022 and 2025. The MRE is reported inside a Whittle optimised open pit shell based on a Net Value per Block method, with assumed mining costs of US$1.94/t; tank leach processing costs of US$22.96/t and G&A costs of US$3.32/t. As for the heap leach an overall processing cost of US$11.31/t has been assumed. This results in average cut-off grades equivalent to approximately 39 and 22g/t silver equivalent (“AgEq”) for the tank and heap leach Mineral Resource Estimate respectively, based on a gold

price of US$2,400/oz and a silver price of US$27.50/oz. Mining, processing and G&A costs, metallurgical recoveries and other inputs have been provided by AbraSilver.

Gold and silver grades were estimated into the block model from the RC and DDH holes including those DDH holes from the latest drill campaign, up to a cut-off date of March 30th, 2025. The Mineral Resource was estimated with Ordinary Kriging (“OK”) and bias was reviewed using an Inverse Distance squared estimate (ID2) for comparisons. Drill hole intervals have been composited to a length of 1 meter, which is the average sample length for core sampling. Grade capping has been applied to composited grade intervals on a case-by-case basis within each estimation domain. The estimation domains were defined using a combination of lithology domains, alteration domains, and oxide / sulphide state, defining a set of 24 domains for gold and silver for the Oculto zone and Laderas zone. For JAC, Sombra and Fantasma zones, iso-surface grade shell at 5 g/t AgEq were built, defining four zones at JAC and two extra zones at Fantasma and Sombra.

Metallurgical testing of Project mineralized material and host rocks has been carried out in a range of different laboratories between 1996 and 2023. For the purposes of this Technical Report, it is reasonable to assume that the gold and silver at the Project can be recovered using conventional precious metal processes commonly used in the mining industry.

- Comminution testing performed on fourteen variability samples of mineralized material categorized the material as very soft to moderately soft when compared to the JK Tech database after undergoing SAG Mill Comminution tests (SMC). The samples fell in the soft to very hard categories in Ball Mill grindability tests (BWI), and very mild to moderately abrasive in Bond Abrasion tests (AI) when compared to the SGS databases.
- QEMSCAN and PIMA analysis of the master composites and fourteen variability samples determined that quartz, alunite, and iron-oxides were the major mineral components of the samples. Major pyrite minerals were free pyrite; pyrite associated with hard silicates and complex pyrite. TIMA analysis for gold and silver showed that most of the silver was present as either oxidized silver, iodargyrite and chlorargyrite.
- The gold and silver concentrations in the five master composites ranged from 1.10 g/t to 2.60 g/t and 54 g/t to 151 g/t, respectively. Total sulphur and sulphide grades ranged from 2.10% to 3.94% and 0.57% to 2.05%, respectively. While relatively low, the sulphide sulphur grades indicate that the samples are not overly refractory in nature. Total carbon and total organic carbon values were at or below the analytical detection limits, indicating the sample is unlikely to display any preg-robbing characteristics.
- Optimum whole ore cyanidation conditions during the laboratory test were established with the JAC composite and applied to the variability samples. These conditions consisted of:
    - Grind size P80 of 150 µm,
    - 45% pulp density (w/w),
    - pH of 10.5-11.0 (maintained with lime),
    - 4 hours of pre-aeration with air sparging,
    - Air-sparging during leaching,
    - Sodium cyanide (NaCN) concentration of 1.5 g/L maintained for the first 12 hours of leaching and then allowed to naturally decay for the remaining leach time.

- Gravity separation recoveries for the four composite samples ranged from 8.6% to 17.3% for gold and from 3.3% to 16.4% for silver, respectively, indicating that the inclusion of a gravity circuit may be beneficial to the plant process.
- Gravity tailing cyanidation showed extractions ranging from 82% to 87% for gold and 54% to 87% for silver, respectively.
- Overall recovery of gold by gravity separation plus cyanidation of the gravity tails was in the range of 83.7% to 89.3%. Overall silver recovery was in the range of 56.8% to 88.2%.
- Average gold and silver recoveries for the project weighted by the tonnage in each mineralised domain of the Mineral Resource Estimate are 86.5% and 82.6% respectively.
- Merrill Crowe testing was successful and determined that ~100% of the gold and ~96% of the silver in the clarified, deaerated leach solution could be precipitated out with a 5 times stoichiometric addition of zinc dust plus an equivalent quarter amount of lead nitrate.
- Cyanide destruction testing on a simulated barren leach slurry from CCD determined that ~4.0g or less equivalent of SO2 is required per gram of CNWAD (with no copper addition) to achieve a product with less than 50 mg/L CNWAD at a retention time of 60 minutes.
- In 2023, to observe the behaviour of the marginal ore below the economic cutoff of the tank leaching process, lower head-grade samples were selected and sent to SGS Peru. Five composites were prepared from the five main metallurgical domains defined, leaching columns 110 mm in diameter and 1000 m min height were prepared. The leaching solution, which contained 1000 ppm of cyanide and conditioned at pH 10.5, was fed at 12 L/h/m². The total test time was 60 days, ranging a metal recovery from 58% to 85% for gold and 35% to 65% for silver.

The MRE is summarized as of July 29th, 2025, and has been estimated in alignment with the Canadian Institute of Mining, Metallurgy and Petroleum (“CIM”) Estimation of Mineral Resource and Mineral Reserves Best Practices Guidelines (CIM, 2019) and the Mineral Resource estimate has been categorized in accordance with the CIM Definition Standards (CIM, 2014) and comprises Measured, Indicated and Inferred Mineral Resource as summarised in Table 1-1.

Table 1-1: Diablillos Mineral Resource Estimate – As of July 29th, 2025.

	Zone	Category	Tonnes (000 t)	Ag (g/t)	Au (g/t)	AgEq (g/t)	Contained Ag (000 Oz Ag)	Contained Au (000 Oz Au)	Contained AgEq (000 Oz Ag)
Tank Leach	Oxides	Measured	26,545	119	0.71	183	101,564	604	156,487
		Indicated	46,584	56	0.63	114	84,430	948	170,592
		Measured & Indicated	**73,129**	**79**	**0.66**	**139**	**185,994**	**1,553**	**327,078**
		Inferred	9,693	34	0.57	86	10,616	176	26,647
Heap Leach	Oxides	Measured	6,673	16	0.14	25	3,486	30	5,342
		Indicated	24,102	12	0.17	23	9,163	133	17,506
		Measured & Indicated	**30,774**	**13**	**0.16**	**23**	**12,649**	**162**	**22,848**
		Inferred	10,024	9	0.20	21	2,811	64	6,850
Total	Oxides	Measured	33,218	98	0.59	152	105,050	634	161,829
		Indicated	70,686	41	0.48	83	93,593	1,081	188,098
		Measured & Indicated	**103,904**	**59**	**0.51**	**105**	**198,643**	**1,715**	**349,927**
		Inferred	19,628	21	0.38	53	13,427	241	33,496

Notes for July 2025 MRE:

1. Mineral Resources are not Mineral Reserves and have not demonstrated economic viability.
2. The formula for calculating AgEq is as follows: Silver Eq Oz = Silver Oz + Gold Oz x (Gold Price/Silver Price) x (Gold Recovery/Silver Recovery).
3. The Mineral Resource model was populated using Ordinary Kriging grade estimation within a three-dimensional block model and mineralized zones defined by wireframed solids, which are a combination of lithology and alteration domains. The 1m composite grades were capped where appropriate.
4. The Mineral Resource is reported inside a conceptual Whittle open pit shell derived using US$ 27.50/oz Ag price, US $2,400/oz Au price, 83% process recovery for Ag, and 87% process recovery for Au for primary tank leaching process and 58% process recovery for Ag, and 80% process recovery for Au for secondary heap leaching process.
5. The constraining open pit optimization parameters used were US $1.94/t mining cost, US $22.96/t processing cost, US $3.32/t G&A for primary tank leaching process and US $11.31/t for secondary heap leaching process, and average 51-degree open pit slopes.
6. The MRE has been categorized in accordance with the CIM Definition Standards (CIM, 2014). An average cut-off grade of approximately 39 g/t AgEq for the tank leaching process and 22g/t AgEq for the heap leaching process.
7. A Net Value per block [NVB] calculation was used to constrain the Mineral Resource, determine the "Benefits = Income-Cost", where, Income = [(Au Selling Price (US$/oz) - Au Selling Cost (USD/Oz)) x (Au grade (g/t)/31.1035)) x Au Recovery (%)] + [(Ag Selling Price (US$/oz) - Ag Selling Cost (USD/Oz)) x (Ag grade (g/t)/31.1035)) x Ag Recovery (%)] and Cost = Mining Cost (US$/t) + Process Cost (US$/t) + Transport Cost (US$/t) + G&A Cost (US$/t) + [Royalty Cost (%) x Income]
8. The Mineral Resource is sub-horizontal with sub-vertical feeders and a reasonable prospect for eventual economic extraction by open pit and tank leach processing methods.
9. In-situ bulk density were assigned to each model domain, according to samples averages for each lithology domain, separated by alteration zones and subset by oxidation.
10. All tonnages reported are dry metric tonnes and ounces of contained gold are troy ounces.
11. Mining recovery and dilution factors have not been applied to the Mineral Resource estimates.
12. The Mineral Resource was estimated by Mr. Peralta, B.Sc., FAusIMM CP (Geo), Independent Qualified Person under NI 43-101.
13. Mr. Peralta is not aware of any environmental, permitting, legal, title, taxation, socio-political, marketing, or other relevant issues that could materially affect the potential development of the Mineral Resource.
14. All figures are rounded to reflect the relative accuracy of the estimates. Minor discrepancies may occur due to rounding to appropriate significant figures.

Conclusions and Recommendations

Based on the new MRE presented in this report, the Project is an advanced stage project which warrants advancement to a Definitive Feasibility Study (“DFS”). Based on the results of the DFS, which is currently well-underway, advancing the project to a final financing and construction stage should be considered.

The principal recommendations from this report are:

- Improve the structural knowledge of the deposit with surface mapping of outcrops, and/or with information from oriented drill core or televiewer methods which will allow determination of the paleo magmatic water level related to gold and silver enrichment and a fine interpretation of actual faults and lineaments.
- In-fill drilling should continue at Oculto in areas of current Indicated Mineral Resources where confidence could be improved to Measured Mineral Resources.
- In-fill drilling should continue in areas of current Inferred Mineral Resources where confidence could be improved to Indicated.
- Perform definition drilling in the northeast of Oculto, using both in-fill and step-out holes.
- Definition drilling should be carried out between the Oculto and Fantasma zones, and between the JAC and Alpaca zones, to determine the continuity between the existing zones and identify potential new zones.
- In-fill drilling should continue at Sombra in between the existing holes to migrate Mineral Resources from Inferred to Indicated, also, step-out holes should be performed to define the limits of the existing ore body.
- Evaluate potential Mineral Resources in the sub-economic zones that are marginal to current estimated Mineral Resources, by adding metallurgical test-works.
- A further and detailed evaluation of the lower-grade oxide material for potential heap leaching is recommended, including bottle roll tests and column leach studies.
- Continued advancement of the Project toward delivery of a DFS, which is currently well-advanced.
- Undertake a Preliminary Economic Assessment on the heap leach Mineral Resource Estimate including more mine planning and metallurgical testing.
- An evaluation of the Mineral Resource contained in the underlying sulphides should eventually be carried out in parallel with a metallurgical test-work campaign, to quantify the contained metal in sulphides and its corresponding process.

Table 1-2 presents a budget for the recommended items:

Table 1-2: Proposed Budget Summary.

Description	Cost, USD (millions)
Completion of the DFS Report	**9.0**
In-fill drilling (approximately 5,000 meters @ US$ 400/m average)	**2.0**
Additional step-out drilling (range of 10,000 to 20,000 meters @ US$ 400/m average)	**4.0-8.0**
Additional Metallurgical Testwork	**0.5**
Total	**$15.5 to $19.5**

DOING BUSINESS IN ARGENTINA

Government Organization

Argentina is a democratic republic governed by an elected government, which is headed by a president, who is both the head of state and head of government. As of the date hereof, Javier Milei is the president of Argentina.

Argentine Mining Regulations

Argentina is a federal country with 23 provinces and the Autonomous City of Buenos Aires. Provinces in Argentina own and control property mineral resources and have the authority to:

- grant mining rights to private applicant entities;
- implement the *Argentine Mining Code* (enacted by the National Congress);
- regulate its procedural aspects through Provincial Procedural Codes; and
- organize each enforcement authority within its territory.

In order to carry out any mining activity in Argentina, there are mainly two types of mineral tenure granted by provinces according to the Argentine Mining Code (the "**Argentine Mining Code**"): (1) exploitation concessions and (2) exploration permits, which are further described below:

- **Exploitation Concessions:** These are sometimes referred to as "Minas" or "Mining Concessions". They are licenses that allow the property holder to exploit the mineral resources of the property, provided environmental approval is obtained. These permits have no time limit as long as obligations in the Argentine Mining Code are complied with.

- **Exploration Permits**: These are referred to as "Cateos", which have time limits that allow the property holder to explore the property for a period of time that is related to the size of the property. Like exploitation concessions, exploration permits also require environmental approval.

Depending on the province, exploitation concessions are granted by either a judicial (e.g. Salta) or administrative (e.g. Catamarca, San Juan and Chubut) authority.

An exploration permit can be transformed into an exploitation concession any time before its expiration period by filing a discovery claim, paying an annual canon fee and submitting and complying with an investment and work plan, among other requirements. The condition under which exploitation concessions are held is indefinite, provided that those annual payments are made and the investment and work plan is accomplished.

No exploitation or exploration can start without obtaining the Environmental Impact Assessment permit. A permit for drilling in areas of both types of mineral tenure must specify the type of mineral the holder is seeking to explore and exploit. Claims cannot be over-staked by new claims specifying different minerals.

The Corporation holds all required exploitation concessions with respect to the Diablillos Project and either exploitation concessions and/or exploration permits in its other mining interests in Argentina. The Diablillos Project is located within the provinces of Salta and Catamarca. Accordingly, the Corporation is in frequent discussions with judicial and administrative officials from each of Salta and Catamarca. The Corporation

also interacts with administrative officials from San Juan and Chubut, where the Corporation's other Argentine mineral projects are located. The Corporation does not have any material operations in any other jurisdiction.

Foreign Investments in Mining

The Argentine Companies Law establishes that for a foreign company to carry out ordinary business within the Argentine territory, it must set up a subsidiary or a branch under Argentine law. Accordingly, the Corporation carries out its Argentine mining operations through wholly-owned subsidiaries that are established under the laws of Argentina, namely AbraPlata Argentina SA ("**AbraPlata Argentina**"), Minera Cerro Bayo S.A. ("**Cerro Bayo**") and Pacific Rim Mining Corporation Argentina S.A. ("**PacRim**" and, together with AbraPlata Argentina and Cerro Bayo, the "**Argentina Subsidiaries**").

The principal risk associated with this corporate structure is the fact that the Corporation's material operating subsidiaries are located in Argentina and that Argentina's laws, culture and political system are different than Canada's laws, culture and political system. In order to mitigate this risk, the Corporation has ensured that its executive team, in charge of managing the Argentina Subsidiaries, is comprised of individuals who are familiar with Argentina's political, cultural and legal environment, as well as being fluent in Spanish. The Corporation has access to sophisticated legal and business experts in both Argentina and Canada able to help the Corporation anticipate and prepare for potential unforeseeable events related to its corporate structure.

Internal Controls

Ownership of Properties & Required Permits

To satisfy itself as to the Corporation's validity of tenure with respect to the Diablillos Project, the Corporation engaged local legal counsel to review title and the mining rights associated therewith. After performing such review, local counsel concluded that PacRim and Cerro Bayo held valid title to the mining concessions listed in the Technical Report. Local counsel also concluded that such concessions are in good standing and have been granted according to the provisions of applicable Argentine law.

To satisfy itself as to the Corporation's validity of tenure with respect to the La Coipita Project, the Corporation engaged local legal counsel to review the option agreements relating to the La Coipita Project and title and the mining rights associated therewith. After performing such review, local counsel concluded that AbraPlata Argentina holds a valid option agreement with respect to the concessions comprising the La Coipita Project and that such concessions are in good standing and have been granted according to the provisions of applicable Argentine law.

Control of Subsidiaries

The board of directors of the Corporation (the "**Board**") exercises one hundred percent control over each of the Argentina Subsidiaries, indirectly, through its wholly-owned subsidiaries. As the one hundred percent controlling shareholder of each of the Argentina Subsidiaries, the Corporation, through its wholly-owned subsidiaries, has the power to appoint and remove the directors and officers of each of the Argentina Subsidiaries and has the power to effect continuing control over the assets of each of the Argentina Subsidiaries. Carlos Eugenio Ponte is the current President and Director of each of the Argentina Subsidiaries. Hernán Zaballa is the current Alternate Director of each of the Argentina Subsidiaries. The bank accounts of each of the Argentina Subsidiaries are monitored by the Board through Argentina's

country manager appointed by the Board and transactions require signatures from each of the Chief Financial Officer and the country manager. The Corporation distributes cash to Argentina Subsidiaries on a periodic basis to fund operational costs. There are no material differences in the banking system between Canada and Argentina. The minute books and corporate records of the Argentina Subsidiaries are held by local counsel to the Corporation in Argentina.

Location of Management & Language

Certain of the Corporation's directors and officers (including the Chief Financial Officer) are domiciled in Canada, and certain of the Corporation's directors and officers are domiciled outside of Canada, including Hernán Zaballa, a director of the Corporation, who is domiciled in Argentina. All of the Corporation's directors and executive officers have experience in conducting business in foreign jurisdictions, including Argentina. Directors and executive officers of the Corporation visit the Argentine operations once or twice per year.

The Corporation also has local legal and audit advisors in Argentina to ensure that the Corporation is updated on all relevant new regulations or changes to existing regulations.

All directors and executive officers of the Corporation are fluent in English and a majority of such persons are also fluent in Spanish, Argentina's official language. While the vast majority of the material documents relating to the Corporation are in English, the Board and the Corporation's executive officers are equipped to address any matters in both Spanish and English to ensure that there are no language barriers in the carrying out of the business of the Corporation and its operations. Given the Board and management's familiarity with local customs and business practices in Argentina, the Corporation has not adopted a formal communication plan.

CONSOLIDATED CAPITALIZATION

Other than the issuance of 6,513,000 Common Shares in connection with the LIFE Offering, 270,860 Common Shares issued in connection with a concurrent private placement and 345,796 Common Shares issued on the net exercise of 535,000 outstanding stock options, there have been no material changes in the share and loan capital of the Corporation on a consolidated basis since September 30, 2025, the date of the Corporation's most recently completed financial statements.

The applicable prospectus supplement will describe any material change, and the effect of such material change, on our share and loan capitalization that will result from the issuance of Securities pursuant to such prospectus supplement.

USE OF PROCEEDS

The net proceeds from any offering of Securities and the proposed use of those proceeds will be set forth in the applicable prospectus supplement relating to that offering of Securities. We will not receive any proceeds from the sale of Securities by selling securityholders.

Management of the Corporation will retain broad discretion in allocating the net proceeds of any offering of Securities under this prospectus and the Corporation's actual use of the net proceeds will vary depending on its operating and capital needs from time to time.

Development Milestones

The Corporation expects to accomplish the following development milestones over the next 12 months.

Business Objective	Significant Milestone	Anticipated Timing to Achieve Business Objective	Estimated Cost USD
Receipt of permits and approvals	Obtain EIA Environmental Permit	Q1 2026	$0.1 million
	Obtain RIGI approval	Q1 2026	$0.1 million
Completion of the DFS Report	Completion of engineering and metallurgical test work required by the Diablillos Heap Leach PEA	Q2 2026	$0.6 million
	Completion of engineering and test work for Diablillos Project	Q2 2026	$5 million
Commencement of drilling activities	Metallurgical and infill to convert Mineral Resources to Reserves	Q2 2026	$2.0 million
	Completion of Phase VI exploration for JAC, Oculto and Sombra targets	Q3 2026	$7.2 million
	Ongoing water exploration drilling	Q3 2026	$3.5 million
Initiation of PFS for Heap Leaching	Initiation of PFS for Heap Leaching	Q3 2026	$0.8 million
Early Works Activities	Completion of early works planning and engineering	Q2 2026	$1.8 million
	Expansion of existing camp and upgrades to site infrastructure	Q3 2026	$2.5 million
	Hiring of Owners Team for execution phase	Q3 2026	$1.0 million
	Secure long lead time items	Q3 2026	$3.2 million
	Detailed engineering for critical path activities	Q3 2026	$3.5 million

While the Corporation believes that it has the skills and resources necessary to accomplish these business objectives, there is no certainty that the Corporation will be able to do so within the timelines indicated above, or at all. **See "*Risk Factors*".**

Negative Cash Flow From Operations

The Corporation has financed its operations primarily from the issuance of equity and interest income on funds available for investment. The Corporation has experienced operating losses and cash outflows from operations and will require ongoing financing to continue its exploration activities. While the Corporation's current financial resources are sufficient to meet its short-term liquidity requirements and to fund its operations for at least the coming 12 months, the Corporation's continued success is dependent upon the ability to finance its future cash requirements. There is no assurance that additional capital or other types of financing will be available if needed or that these financings will be on terms at least as favourable to the Corporation as those previously obtained, or at all. To the extent that the Corporation has negative operating cash flows in future periods, it may need to deploy a portion of its existing working capital to fund such negative cash flows. The Corporation may be required to raise additional funds through the issuance of additional equity securities, through loan financing, or other means. There is no assurance that additional capital or other types of financing will be available if needed or that these financings will be on terms at least as favourable to the Corporation as those previously obtained. See "*Risk Factors - Negative Operating Cash Flow*".

PRIOR SALES

Prior sales of the Securities will be provided, as required, in the applicable prospectus supplement with respect to the issuance of Securities pursuant to such prospectus supplement.

TRADING PRICE AND VOLUME

Trading price and volume of the Securities that are traded or quoted on a Canadian marketplace will be provided, as required, in the applicable prospectus supplement.

EARNINGS COVERAGE RATIOS

The applicable prospectus supplement will provide, as required, the earnings coverage ratios with respect to the issuance of Securities pursuant to such prospectus supplement.

DESCRIPTION OF SECURITIES

The following is a brief summary of certain general terms and provisions of the Securities as at the date of this prospectus. The summary does not purport to be complete and is indicative only. The specific terms of any Securities to be offered under this prospectus, and the extent to which the general terms described in this prospectus apply to such Securities, will be set forth in the applicable prospectus supplement. Moreover, a prospectus supplement relating to a particular offering of Securities may include terms pertaining to the Securities being offered thereunder that are not within the terms and parameters described in this prospectus.

Description of Common Shares

The following is a brief summary of the material attributes of our Common Shares. This summary does not purport to be complete. For full particulars and additional details on our Common Shares, reference should be made to our articles, a copy of which is available on SEDAR+ at www.sedarplus.ca. Additionally, a more extensive summary of the terms of our Common Shares is provided in the AIF, which is incorporated herein by reference.

Our authorized capital consists of an unlimited number of Common Shares of which 159,879,512 are issued and outstanding as at December 15, 2025. Each Common Share carries one vote at all meetings of shareholders, is entitled to receive dividends as and when declared by the Board and is entitled to participation in the remaining property and assets of the Corporation upon dissolution or winding-up. The Common Shares do not carry any pre-emptive, subscription, redemption or conversion rights.

Description of Warrants

The following is a brief summary of certain general terms and provisions of the Warrants that may be offered pursuant to this prospectus. This summary does not purport to be complete. The particular terms and provisions of the Warrants as may be offered pursuant to this prospectus will be set forth in the applicable prospectus supplement pertaining to such offering of Warrants, and the extent to which the general terms and provisions described below may apply to such Warrants will be described in the applicable prospectus supplement.

Warrants may be offered separately or together with other Securities, as the case may be. Each series of Warrants may be issued under a separate warrant indenture or warrant agency agreement to be entered into between us and one or more banks or trust companies acting as Warrant agent, or may be issued as stand-alone contracts. The applicable prospectus supplement will include details of the agreements, if any, governing the Warrants being offered. The Warrant agent, if any, will be expected to act solely as our agent and will not assume a relationship of agency with any holders of Warrant certificates or beneficial owners of Warrants. The following sets forth certain general terms and provisions of the Warrants that may be offered under this prospectus. The specific terms of the Warrants, and the extent to which the general terms described in this section apply to those Warrants, will be set forth in the applicable prospectus supplement.

We will file a copy of any warrant indenture or any warrant agency agreement relating to an offering of Warrants with the relevant securities regulatory authorities in Canada after we have entered into it.

Each applicable prospectus supplement will set forth the terms and other information with respect to the Warrants being offered thereby, which may include, without limitation, the following (where applicable):

- the designation of the Warrants;
- the aggregate number of Warrants offered and the offering price;
- the designation, number and terms of the other Securities purchasable upon exercise of the Warrants, and procedures that will result in the adjustment of those numbers;
- the exercise price of the Warrants;
- the dates or periods during which the Warrants are exercisable;
- the designation and terms of any securities with which the Warrants are issued;
- if the Warrants are issued as a unit with another Security, the date on and after which the Warrants and the other Security will be separately transferable;
- any minimum or maximum amount of Warrants that may be exercised at any one time;
- whether such Warrants will be listed on any securities exchange;
- any terms, procedures and limitations relating to the transferability, exchange or exercise of the Warrants;

- certain material Canadian tax consequences of owning the Warrants; and
- any other material terms and conditions of the Warrants.

Description of Units

The following is a brief summary of certain general terms and provisions of the Units that may be offered pursuant to this prospectus. This summary does not purport to be complete. The particular terms and provisions of the Units as may be offered pursuant to this prospectus will be set forth in the applicable prospectus supplement pertaining to such offering of Units, and the extent to which the general terms and provisions described below may apply to such Units will be described in the applicable prospectus supplement.

We may issue Units comprised of one or more of the other Securities described herein in any combination.

Each Unit may be issued so that the holder of the Unit is also the holder of each Security included in the Unit. Thus, the holder of a Unit may have the rights and obligations of a holder of each included Security. Any agreement under which a Unit may be issued may provide that the Securities included in the Unit may not be held or transferred separately at any time or at any time before a specified date.

Each applicable prospectus supplement will set forth the terms and other information with respect to the Units being offered thereby, which may include, without limitation, the following (where applicable):

- the designation, number and terms of the Units and of the Securities comprising the Units, including whether and under what circumstances those Securities may be held or transferred separately;
- any provisions for the issuance, payment, settlement, transfer or exchange of the Units or of the Securities comprising the Units;
- certain material Canadian tax consequences of owning the Securities comprising the Units; and
- any other material terms and conditions respecting the Units.

The preceding description and any description of Units in an applicable prospectus supplement does not purport to be complete and is subject to and is qualified in its entirety by reference to any agreement, if any, and, if applicable, collateral arrangements and depositary arrangements relating to such Units.

Description of Subscription Receipts

The following is a brief summary of certain general terms and provisions of Subscription Receipts that may be offered pursuant to this prospectus. This summary does not purport to be complete. The particular terms and provisions of the Subscription Receipts as may be offered pursuant to this prospectus will be set forth in the applicable prospectus supplement pertaining to such offering of Subscription Receipts, and the extent to which the general terms and provisions described below may apply to such Subscription Receipts will be described in the applicable prospectus supplement. Subscription Receipts may be offered separately or together with other Securities, as the case may be. The Subscription Receipts may be issued under a subscription receipt agreement.

The applicable prospectus supplement will include details of any subscription receipt agreement covering the Subscription Receipts being offered. We will file a copy of any subscription receipt agreement relating

to an offering of Subscription Receipts with the relevant securities regulatory authorities in Canada after we have entered into it. The specific terms of the Subscription Receipts, and the extent to which the general terms described in this section apply to those Subscription Receipts, will be set forth in the applicable prospectus supplement. This description may include, without limitation, the following (where applicable):

- the number of Subscription Receipts;
- the price at which the Subscription Receipts will be offered;
- the terms, conditions and procedures for the conversion of the Subscription Receipts into other Securities;
- the designation, number and terms of the other Securities that may be exchanged upon conversion of each Subscription Receipt;
- the designation, number and terms of any other Securities with which the Subscription Receipts will be offered, if any, and the number of Subscription Receipts that will be offered with each Security;
- terms applicable to the gross or net proceeds from the sale of the Subscription Receipts, plus any interest earned thereon;
- certain material Canadian tax consequences of owning the Subscription Receipts; and
- any other material terms and conditions of the Subscription Receipts.

Description of Debt Securities

The following is a brief summary of certain general terms and provisions of the Debt Securities that may be offered pursuant to this prospectus. This summary does not purport to be complete. The particular terms and provisions of the Debt Securities as may be offered pursuant to this prospectus will be set forth in the applicable prospectus supplement pertaining to such offering of Debt Securities, and the extent to which the general terms and provisions described below may apply to such Debt Securities will be described in the applicable prospectus supplement.

The Debt Securities may be offered separately or together with other Securities, as the case may be. The Debt Securities will be issued in one or more series under an indenture (the "**Indenture**") to be entered into between us and one or more trustees that will be named in a prospectus supplement for a series of Debt Securities. The applicable prospectus supplement will include details of the Indenture governing the Debt Securities being offered. We will file a copy of the Indenture relating to an offering of Debt Securities with the relevant securities regulatory authorities in Canada after we have entered into it. The description of certain provisions of the Indenture in this section do not purport to be complete and are subject to, and are qualified in their entirety by reference to, the provisions of the Indenture. The particular terms relating to Debt Securities offered by a prospectus supplement will be described in the related prospectus supplement. This description may include, but may not be limited to, any of the following, if applicable:

- the specific designation of the Debt Securities;
- the price or prices at which the Debt Securities will be issued;
- any limit on the aggregate principal amount of the Debt Securities;

- the date or dates, if any, on which the Debt Securities will mature and any available extensions thereof, and the portion (if less than all of the principal amount) of the Debt Securities to be payable upon declaration of acceleration of maturity;
- the rate or rates (whether fixed or variable) at which the Debt Securities will bear interest, if any, the date or dates from which any such interest will accrue and on which any such interest will be payable and the record dates for any interest payable on the Debt Securities that are in registered form;
- the terms and conditions under which we may be obligated to redeem, repay or purchase the Debt Securities pursuant to any sinking fund or analogous provisions or otherwise;
- the terms and conditions upon which we may redeem the Debt Securities, in whole or in part, at our option;
- the covenants and events of default applicable to the Debt Securities;
- the terms and conditions for any conversion or exchange of the Debt Securities for any other securities of the Corporation;
- whether the Debt Securities will be issuable in registered form, bearer form or both, and, if issuable in bearer form, the restrictions as to the offer, sale and delivery of the Debt Securities which are in bearer form and as to exchanges between registered form and bearer form;
- whether the Debt Securities will be issuable in the form of registered global securities, and, if so, the identity of the depositary for such registered global securities;
- the denominations in which registered Debt Securities will be issuable;
- each office or agency where payments on the Debt Securities will be made and each office or agency where the Debt Securities may be presented for registration of transfer or exchange;
- the currency in which the Debt Securities are denominated or the currency in which the Corporation will make payments on the Debt Securities;
- any index, formula or other method used to determine the amount of payments of principal of (and premium, if any) or interest, if any, on the Debt Securities; and
- any other terms of the Debt Securities which apply solely to the Debt Securities.

Each series of Debt Securities may be issued at various times with different maturity dates, may bear interest at different rates and may otherwise vary.

The terms on which a series of Debt Securities may be convertible into or exchangeable for our Common Shares or any of our other securities will be described in the applicable prospectus supplement. These terms may include provisions as to whether conversion or exchange is mandatory, at the option of the holder or at our option, and may include provisions pursuant to which the number of Common Shares or other securities of the Corporation to be received by the holders of such series of Debt Securities would be subject to adjustment.

To the extent any Debt Securities are convertible into Common Shares or other securities of the Corporation, prior to such conversion the holders of such Debt Securities will not have any of the rights of holders of the securities into which the Debt Securities are convertible, including the right to receive payments of dividends or the right to vote such underlying securities.

CERTAIN CANADIAN INCOME TAX CONSIDERATIONS

Owning any of the Securities may subject investors to tax consequences in Canada. Although the applicable prospectus supplement will describe certain Canadian federal income tax consequences of the acquisition, ownership and disposition of any Securities offered under this prospectus by an initial investor, the prospectus supplement may not describe these tax consequences fully or with respect to a particular investor. Investors are advised to consult their own tax advisor with respect to their particular circumstances.

PLAN OF DISTRIBUTION

We may from time to time during the 25-month period that this prospectus, including any amendments and supplements thereto, remains valid, offer for sale and issue up to an aggregate of $700,000,000 in Securities hereunder.

We may offer and sell the Securities to or through underwriters or dealers purchasing as principals, and may also sell directly to one or more purchasers, through agents, or pursuant to applicable statutory exemptions. The prospectus supplement relating to a particular offering of Securities will identify each underwriter, dealer or agent, as the case may be, that we engage in connection with the offering and sale of the Securities, and will set forth the terms of the offering of such Securities, including, to the extent applicable, any fees, discounts or any other compensation payable to underwriters, dealers or agents in connection with the offering, the method of distribution of the Securities, the initial issue price (in the event that the offering is a fixed price distribution), the proceeds that we will receive and any other material terms of the plan of distribution. Any initial offering price and discounts, concessions or commissions allowed or re-allowed or paid to dealers may be changed from time to time.

The Securities may be sold from time to time in one or more transactions at a fixed price or prices or at prices which may be changed or at market prices prevailing at the time of sale, at prices related to such prevailing prices or at negotiated prices, including sales in transactions that are deemed to be “at-the-market distributions”, which may include sales made directly on the TSX or other existing trading markets for the Securities.

No underwriter, dealer or agent, no affiliate of such an underwriter, dealer or agent and no person acting jointly or in concert with such an underwriter, dealer or agent involved in an “at-the-market distribution” will over-allot Securities in connection with such distribution or effect any other transactions that are intended to stabilize or maintain the market price of the Securities. The price at which the Securities will be offered and sold may vary from purchaser to purchaser and during the period of distribution.

In connection with the sale of the Securities, underwriters, dealers or agents may receive compensation from us or from other parties, including in the form of underwriters’, dealers’ or agents’ fees, commissions or concessions. Underwriters, dealers and agents that participate in the distribution of Securities may be deemed underwriters for the purposes of applicable Canadian securities legislation, and any such compensation received by them from us and any profit on the resale of the Securities by them may be deemed to be underwriting commissions.

In connection with any offering of Securities other than an “at-the-market distribution” (unless otherwise specified in the relevant prospectus supplement), the underwriters, dealers or agents, as the case may be, may over-allot or effect transactions which stabilize, maintain or otherwise affect the market price of the

Securities at a level other than those which otherwise might prevail on the open market. Such transactions may be commenced, interrupted or discontinued at any time.

Underwriters, dealers or agents who participate in the distribution of the Securities may be entitled, under agreements to be entered into with us, to indemnification by us against certain liabilities, including liabilities under Canadian securities legislation, or to contribution with respect to payments, which such underwriters, dealers or agents may be required to make in respect thereof. Such underwriters, dealers and agents may be customers of, engage in transactions with, or perform services for, us in the ordinary course of business.

Unless otherwise specified in the applicable prospectus supplement, each series or issue of Securities (other than Common Shares) will be a new issue of Securities with no established trading market. Accordingly, there is currently no market through which the Securities (other than Common Shares) may be sold and purchasers may not be able to resell such Securities purchased under this prospectus. This may affect the pricing of such Securities in the secondary market, the transparency and availability of trading prices, the liquidity of such Securities and the extent of issuer regulation. We may elect to list any of the Securities on one or more exchange, but unless otherwise specified in the applicable prospectus supplement, we will not be obligated to do so. In addition, underwriters will not be obligated to make a market in any securities. No assurance can be given regarding the activity of trading in, or liquidity of, any Securities. See "*Risk Factors*".

This prospectus constitutes a public offering of these Securities only in those jurisdictions where they may be lawfully offered for sale and therein only by persons permitted to sell such Securities. Unless otherwise specified in the applicable prospectus supplement, the securities have not been and will not be registered under the U.S. Securities Act or any state securities laws. Unless otherwise specified in the applicable prospectus supplement, the Securities may not be offered or sold in the U.S. or to, or for the account or benefit of, U.S. persons unless the Securities are registered under the U.S. Securities Act and applicable state securities laws or an exemption from such registration requirements is available. Each underwriter, dealer and agent who participates in the distribution will agree not to sell or offer to sell or to solicit any offer to buy any Securities within the U.S. or to, or for the account or benefit of, a U.S. person, except pursuant to an exemption from the registration requirements of the U.S. Securities Act and any applicable state securities laws. This prospectus does not constitute an offer to sell or a solicitation of an offer to buy any of these Securities in the U.S.

SELLING SECURITYHOLDERS

Securities may be sold under this prospectus by way of secondary offering by or for the account of certain of our securityholders (other than in connection to an "at-the-market distribution"). Any prospectus supplement that we file in connection with an offering of Securities by selling securityholders will include the following information: (i) the names of the selling securityholders; (ii) the number or amount of Securities owned, controlled or directed of the class being distributed by each selling securityholder; (iii) the number or amount of Securities of the class being distributed for the account of each selling securityholder; (iv) the number or amount of Securities of any class to be owned, controlled or directed by the selling securityholders after the distribution and the percentage that number or amount represents of the total number of our outstanding Securities; (v) whether the Securities are owned by the selling securityholders both of record and beneficially, of record only, or beneficially only; (vi) where applicable, the disclosure required by Form 44-101F1 *Short Form Prospectus*, and selling securityholders will file a non-issuer's submission to jurisdiction form with the applicable prospectus supplement; and (vii) all other information that is required to be included in the applicable prospectus supplement.

RISK FACTORS

Prospective investors in a particular offering of Securities should carefully consider, in addition to the information contained herein, the risks described in the prospectus supplement relating to that offering and the documents and information incorporated by reference herein and therein, including the risks described in the documents incorporated by reference herein.

Risks Related to Operations in Emerging Markets

Investing in an emerging market entails certain inherit risks

The Corporation conducts or participates in mining, development, exploration, and other activities in Argentina, which is an emerging market. Investing in emerging markets generally involves risks, which may include:

- expropriation or nationalization of property;
- changes in laws or policies or increasing legal and regulatory requirements of particular countries, including those relating to taxation, royalties, imports, exports, duties, currency, in-country beneficiation or other claims by government entities, including retroactive claims and/or changes in the administration of laws, policies and practices;
- uncertain political and economic environments, war, terrorism, sabotage and civil disturbances;
- lack of certainty with respect to legal systems, corruption and other factors that are inconsistent with the rule of law;
- delays in obtaining or the inability to obtain or maintain necessary governmental permits or to operate in accordance with such permits or regulatory requirements;
- import and export regulations, including restrictions on the export of gold or other minerals;
- limitations on the repatriation of earnings;
- underdeveloped industrial or economic infrastructure;
- internal security issues;
- increased financing costs;
- renegotiation, cancellation or forced modification of existing contracts; and
- risk of loss due to disease, and other potential medical endemic or pandemic issues, as a result of the potential related impact to employees, disruption to operations, supply chain delays, trade restrictions and impact on economic activity in affected countries or regions.

Argentina may experience economic problems that could affect the Corporation's business, financial condition and result of operations

The Corporation's material project is located in Argentina, and it depends upon local economic and social conditions. As a result, the Corporation's business, financial position and results of operations may be affected by the general conditions of the Argentine economy, including inflation, high interest rates, regulation, taxation, social instability, political unrest and other developments in or affecting Argentina, over which the Corporation has no control.

Following the 2023 presidential election, the new Argentine administration has undertaken significant policy reforms aimed at reducing fiscal deficits, cutting public expenditure, eliminating foreign exchange restrictions for individuals, and lowering inflation. In addition, the Argentine government enacted a new investment regime entitled Régimen de Incentivo a las Grandes Inversiones ("**RIGI**") intended to promote and stabilize large-scale investments, particularly in the energy and mining sectors. These measures represent a marked shift from prior policies and may improve Argentina's long-term economic outlook. However, their implementation is ongoing, and there remains uncertainty as to the timing, consistency, and durability of these reforms.

Economic and political instability may still arise from adverse external economic factors, potential delays in implementing announced reforms, social resistance to austerity measures, or from a reversal or modification of current policies. These risks include, among others:

- adverse external economic factors;
- inconsistent fiscal and monetary policies;
- reliance on external financing;
- changes in governmental economic policies;
- high levels of inflation (despite recent declines);
- abrupt changes in currency values;
- high interest rates;
- volatility of exchange rates;
- political and social tensions arising from structural reforms;
- exchange controls;
- wage and price controls;
- the imposition of trade barriers; and
- trade shocks.

Any of these factors could have a material adverse effect on the Corporation's business, financial condition, results of operations, cash flows or prospects.

The economy of Argentina is vulnerable to external shocks caused by significant economic difficulties of their respective trading partners, or by more general "contagion" effects

Weak, flat or negative economic growth or changes in international trade policy of the major trading partners of Argentina could adversely affect its balance of payments and, consequently, its economic growth. Decreased growth affecting such major trading partners could have a material adverse effect on the markets for exports from Argentina, and, in turn, adversely affect economic growth. The Argentine economy may be affected by "contagion" effects. International investors' reactions to events occurring in one developing country sometimes appear to follow a "contagion" pattern, in which an entire region or investment class is disfavored by international investors. In particular, Argentina has been adversely affected by such contagion effects on a number of prior occasions, including the 1994 Mexican financial crisis, the 1997 Asian financial crisis, the 1998 Russian financial crisis, the 1999 devaluation of the Brazilian real, and the 2001 collapse of Turkey's fixed exchange rate regime. Additionally, economic growth was

negatively affected as a result of the 2008 global financial crisis, and more recently, the COVID-19 pandemic. Similar developments can be expected to affect the Argentine economy in the future, and may accordingly affect the Corporation's business, financial position, operations, and results of operations.

We have operations in a country known to experience high levels of corruption and any violation of anti-corruption laws could subject us to penalties and other adverse consequences

We are subject to anti-corruption, anti-bribery, anti-money laundering and other international laws and regulations and are required to comply with the applicable laws and regulations of Argentina and Canada. In general, these laws prohibit improper payments or offers of payments to governments and their officials, political parties, state-owned or controlled enterprises, and/or private entities and individuals for the purpose of obtaining or retaining business. In addition, we are subject to economic sanctions regulations that restrict our dealings with certain sanctioned countries, individuals and entities. Our primary operations are located in Argentina, which is perceived as having relatively high levels of corruption. Our activities in this country create the risk of unauthorized payments or offers of payments by one of our employees, contractors, agents, or users that could be in violation of various laws, including anti-bribery laws in these countries. In addition, our ability to secure permits, renewals or other government approvals required to maintain our operations could be negatively impacted by corruption in one or more governmental institutions in Argentina. We have adopted various measures which mandate compliance with these anti-corruption, anti-bribery, and anti-money laundering laws, and have implemented training programs, compliance controls and procedures, and reviews and audits to ensure compliance with such laws. However, there can be no assurance that our internal controls, and procedures will be sufficient to prevent or detect all inappropriate practices, fraud or violations of such laws, regulations and requirements by our affiliates, employees, directors, officers, partners, agents and service providers, or that any such persons will not take actions in violation of our policies and procedures, for which we may be ultimately responsible. Any violations by us of anti-bribery and anti-corruption laws or sanctions regulations could have a material adverse effect on our business, reputation, results of operations and financial condition. We cannot predict the nature, scope or effect of future anti-corruption regulatory requirements to which our operations might be subject or the manner in which existing laws might be administered or interpreted.

Argentina has experienced significant political and socio-economic instability in the past, and may experience further instability in the future

Argentina has a history of political and economic volatility, including the 2001–2002 crisis and repeated periods of inflation, currency depreciation and sovereign debt distress. More recently, from 2018 to 2023, Argentina experienced recessionary conditions, sharp peso devaluations, high inflation, capital controls, and difficulties accessing international credit markets.

Since December 2023, the new government has implemented a pro-market economic program, emphasizing fiscal discipline, deregulation, reduction of subsidies, and the elimination of exchange controls for individuals. The introduction of RIGI seeks to attract foreign investment by providing stability in tax, customs and foreign exchange rules for qualifying projects. While these measures aim to restore macroeconomic stability and investor confidence, they also involve substantial political and social challenges, and their long-term effectiveness remains uncertain.

The success of these reforms will depend on a variety of factors, including (but not limited to) the following:

- international demand and prices for Argentina's principal commodity exports;

- stability and competitiveness of the Argentine Peso with respect to foreign currencies; competitiveness and efficiency of domestic industries and services;
- continued implementation of fiscal and monetary stabilization policies;
- the ability of the government to maintain political and social support for reforms;
- the ability to obtain financing from international markets, if and when needed;
- levels of domestic consumption and foreign and domestic investment and financing; and
- the rate of inflation.

If the current agenda cannot be fully implemented or sustained, or if future administrations reverse course, confidence in the Argentine economy could be adversely affected. Any worsening in the Argentine economy or political conditions could materially impact companies operating in Argentina, including the Corporation.

Argentina is subject to frequent and unpredictable changes in tax rates, capital controls, and foreign exchange restrictions, which may restrict or affect the profitability of the Corporation's operations in Argentina

Argentine federal, provincial and other local taxation authorities have historically applied tax rules and regulations in an inconsistent and unpredictable manner. In the past, Argentina also implemented strict foreign exchange restrictions and controls on capital flows, including mandatory repatriation of export proceeds and limitations on dividend and debt payments abroad. These policies, together with frequent changes in tax rates and export duties, have negatively affected the business climate.

The new administration has adopted, since 2023, a pro-market approach, eliminating exchange controls for individuals and promoting deregulation. RIGI, enacted in 2024, provides significant tax stability, foreign exchange benefits and customs incentives for large-scale projects, including mining. If the Corporation's projects qualify, these benefits may mitigate some of the historical risks of doing business in Argentina. However, there can be no assurance that these measures will be fully implemented as intended, or that they will not be modified or repealed in the future.

Changes in taxes, capital controls, or foreign exchange regulations in Argentina remain beyond the Corporation's control. Any adverse shift could increase the operating costs at the Diablillos Project, restrict development or production or constrain the Corporation's ability to receive distributions from its Argentine subsidiaries.

Risk of nationalization of mining assets in Argentina

In May 2012, the previous government of Argentina re-nationalized Repsol YPF SA, the country's largest oil and gas company. There can be no assurance that the government of Argentina will not nationalize other businesses operating in the country, including the business of the Corporation. If any portion of the Corporation's assets are expropriated or nationalized, there can be no assurance that the Corporation would receive payment equal to their fair market value. Nationalization of any of the Corporation's assets in Argentina could have a material adverse effect on the Corporation's business, operations, cash flows, and financial condition. The Corporation has not purchased any "political risk" insurance coverage and currently has no plans to do so.

While that precedent remains relevant, the current administration of President Javier Milei has taken a completely different approach. Since late 2023, the government has actively promoted mining investment

through measures such as RIGI providing extensive tax, customs, FX, and legal protections for projects over US$200 million.

In this context, the risk of nationalization appears low, as the government is encouraging extractive industries and aiming to provide an attractive and relatively stable environment for foreign investors. Nevertheless, it cannot be completely ruled out that future political shifts, regulatory changes, or judicial actions could alter this framework.

Changes in Argentinean environmental legislation could have adverse effects on our operations

The Corporation's exploration activities and future mining operations in Argentina are and will be subject to laws and regulations relating to the protection and remediation of the environment. Environmental legislation provides for restrictions and prohibitions on spills, releases or emissions of various substances produced in association with certain mining industry operations, such as seepage from tailings disposal areas, which would result in environmental pollution. These laws, regulations and the governmental policies for implementation of such laws and regulations change from time to time and are generally becoming more restrictive. In addition, mining projects in Argentina are required to provide social and economic benefits to local communities, including Indigenous populations, through employment opportunities, infrastructure contributions, and community engagement programs. The costs associated with compliance with these laws and regulations are substantial and possible future laws and regulations and changes to existing laws and regulations (including the imposition of higher taxes and mining royalties) could cause additional expenses or capital expenditure, or result in restrictions or delays in the Corporation's development plans. Any failure to comply with applicable environmental, social, and community regulations could result in fines, suspension of permits, or other penalties, and may adversely affect the Corporation's business, operations, financial condition, and reputation.

Title to Assets

Searches of mining records are carried out in accordance with mining industry practices to confirm satisfactory title to properties in which the Corporation holds or intends to acquire an interest, but the Corporation does not obtain title insurance with respect to such properties. The possibility exists that title to one or more of the properties, particularly title to undeveloped properties, might be defective because of errors or omissions in the chain of title, including defects in conveyances and defects in locating or maintaining such claims or concessions. The ownership and validity of mining claims and concessions are often uncertain and may be contested. The Corporation has taken and will continue to take all reasonable steps, in accordance with the laws and regulations of the jurisdictions in which their properties are located, to ensure proper title to its properties and to properties it may acquire in the future, either at the time of acquisition or prior to any major expenditures thereon. This, however, should not be construed as a guarantee of title. There are no assurances that the Corporation will obtain title. Both presently owned and after-acquired properties may be subject to prior unregistered agreements, transfers, land claims or other claims or interests. In addition, third parties may dispute the rights of the Corporation to its respective mining and other interests. The Corporation will attempt to clear title and obtain legal opinions commensurate to the intended level of expenditures required on areas that show promise. There can be no assurance, however, that it will be successful in doing so.

Risks Related to an Offering of Securities

Negative Operating Cash Flow

To date, the Corporation has had negative cash flow from operating activities. As of October 31, 2025, the Corporation had cash and cash equivalents on hand of approximately $67.8 million and working capital of approximately $67.2 million. Although the Corporation anticipates it will have positive cash flow from operating activities in future periods, it expects it will require additional working capital to fund operating activities. To the extent that the Corporation has negative cash flow in any future period, certain or all of the net proceeds from any future offering may be used to fund such negative cash flow from operating activities. Accordingly, the Corporation expects its primary use of the net proceeds of any future offering of Securities and its other available cash will be to fund its operating activities. The Corporation expects to require additional financing to fund its operations to the point where it is generating positive cash flows. Continued negative cash flow may restrict the Corporation's ability to pursue its business objectives. The Corporation has historically financed its working capital requirements primarily through equity and debt financings. While the Corporation has been successful in raising financing in the past, there is no assurance that it will be able to obtain additional financing or that such financing will be available on reasonable terms.

In addition, the Corporation's continued development of the Diablillos Project will require additional financing. The failure to raise such capital could result in the delay or indefinite postponement of current business objectives or the Corporation going out of business. Additional financing may not be available on favorable terms, or at all. If additional funds are raised through issuances of equity or securities (including debt securities) convertible into equity, existing shareholders could suffer significant dilution, and any new equity securities issued could have rights, preferences and privileges superior to those of holders of Common Shares. In addition, from time to time, the Corporation may enter into transactions to acquire assets or the shares or securities of other entities. These transactions may be financed wholly or partially with debt, which may temporarily increase the Corporation's debt levels above industry standards. Any debt financing secured in the future could involve restrictive covenants relating to capital raising activities and other financial and operational matters, which may make it more difficult for the Corporation to obtain additional capital and to pursue business opportunities, including potential acquisitions.

No Assurance of Active or Liquid Market

No assurance can be given that an active or liquid trading market for our Common Shares will be sustained. If an active or liquid market for our Common Shares fails to be sustained, the prices at which our Common Shares and other Securities trade may be adversely affected. Whether our Common Shares will trade at lower prices depends on many factors, including the liquidity of the Common Shares, prevailing interest rates, the markets for similar securities, general economic conditions, our financial condition, historic financial performance and future prospects.

There is currently no market through which the Securities, other than the Common Shares, may be sold and purchasers may not be able to resell such Securities. This may affect the pricing of such Securities in the secondary market, the transparency and availability of trading prices, the liquidity of such securities and the extent of issuer regulation.

Public Markets and Share Prices

The market price of our Common Shares and any other Securities offered hereunder that become listed and posted for trading on the TSX or any other stock exchange could be subject to significant fluctuations

in response to certain factors including, but not limited to, variations in our operating results and changes in financial markets and general market conditions. Securities markets have also experienced significant price and volume fluctuations from time to time. In some instances, these fluctuations have been unrelated or disproportionate to the operating performance of issuers. Market fluctuations may adversely impact the market price of our Common Shares and any other Securities offered hereunder that become listed and posted for trading on the TSX or any other stock exchange. There can be no assurance of the price at which our Common Shares and any other Securities offered hereunder that become listed and posted for trading on the TSX or any other stock exchange will trade.

Additional Issuances and Dilution

We may issue and sell additional securities to finance our operations. We cannot predict the size or type of future issuances of securities or the effect, if any, that future issuances and sales of securities will have on the market price of our securities issued and outstanding from time to time. Sales or issuances of substantial amounts of our securities, or the perception that such sales could occur, may adversely affect prevailing market prices for our issued and outstanding securities from time to time. With any additional sale or issuance of our securities, holders will suffer dilution with respect to voting power and may experience dilution in our earnings per share. Moreover, this prospectus may create a perceived risk of dilution resulting in downward pressure on the price of our issued and outstanding Common Shares, which could contribute to progressive declines in the prices of such securities.

No Dividends have been paid on the Common Shares

The Corporation has paid no cash dividends on any of its Common Shares to date and currently intends to retain its future earnings, if any, to fund the development growth of its businesses. In addition, the terms of any future debt or credit facility may preclude the Corporation from paying any dividends unless certain consents are obtained, and certain conditions are met.

Enforcement of Judgments Against Foreign Persons may not be Possible

Canadian investors should be aware that each of the non-resident members of the Board and management resides outside of Canada ("**Non-Resident Persons**"); as a result, it may not be possible for holders to effect service of process within Canada upon the Non-Resident Persons. All or a substantial portion of the assets of each of the Non-Resident Persons are likely to be located outside of Canada and, as a result, it may not be possible to satisfy a judgment against the Non-Resident Persons in Canada or to enforce a judgment obtained in Canadian courts against the Non-Resident Persons outside of Canada.

We have Broad Discretion in the Use of the Net Proceeds

Our management will have broad discretion with respect to the application of net proceeds received by us from the sale of Securities under this prospectus and may spend such proceeds in ways that do not improve our results of operations or enhance the value of our Common Shares or our other securities issued and outstanding from time to time. Any failure by management to apply these funds effectively could result in financial losses that could have a material adverse effect on our business or cause the price of our issued and outstanding securities to decline.

The Debt Securities may be unsecured and will rank equally in right of payment with all of the Corporation's other future unsecured debt

The Debt Securities may be unsecured and will rank equally in right of payment with all of the Corporation's other existing and future unsecured debt. The Debt Securities may be effectively subordinated to all of the Corporation's existing and future secured debt to the extent of the assets securing such debt. If the Corporation is involved in any bankruptcy, dissolution, liquidation or reorganization, the secured debt holders would, to the extent of the value of the assets securing the secured debt, be paid before the holders of unsecured debt securities, including the Debt Securities. In that event, a holder of Debt Securities may not be able to recover any principal or interest due to it under the Debt Securities.

In addition, the collateral, if any, and all proceeds therefrom, securing any Debt Securities may be subject to higher priority liens in favor of other lenders and other secured parties which may mean that, at any time that any obligations that are secured by higher ranking liens remain outstanding, actions that may be taken in respect of the collateral (including the ability to commence enforcement proceedings against the collateral and to control the conduct of such proceedings) may be at the direction of the holders of such indebtedness.

TRANSFER AGENT AND REGISTRAR

The transfer agent and registrar for the Common Shares is TSX Trust Company located at 100 Adelaide Street West, Suite 301, Toronto, Ontario M5H 4H1.

EXPERTS

Unless otherwise specified in a prospectus supplement, certain legal matters relating to the offering of the Securities will be passed upon on our behalf by Mintz LLP. As of the date hereof, the partners and associates of Mintz LLP beneficially owned, directly or indirectly, less than one percent (1%) of our outstanding securities.

The Corporation's auditors are Crowe Mackay LLP ("**Crowe**"). Crowe has confirmed that it is independent of the Corporation in accordance with the Code of Professional Conduct of the Chartered Professional Accountants of British Columbia.

Information of a scientific or technical nature in respect of the Diablillos Project is based upon the Technical Report, dated September 12, 2025, prepared by the Qualified Persons. Each of the Qualified Persons fall under the definition of independent "qualified person" under NI 43-101. To the Corporation's knowledge, after reasonable inquiry, as of the date hereof, the aforementioned Qualified Persons, do not beneficially own, directly or indirectly, any Common Shares.

EXEMPTIONS

Pursuant to a decision of the Autorité des marchés financiers dated September 12, 2025 the Corporation was granted a permanent exemption from the requirement to translate into French this prospectus as well as the documents incorporated by reference therein and any prospectus supplement to be filed in relation to an "at-the-market distribution". This exemption is granted on the condition that this prospectus and any prospectus supplement be translated into French if the Corporation offers Securities to Québec purchasers in connection with an offering other than in relation to an "at-the-market distribution".

AGENTS FOR SERVICE OF PROCESS IN CANADA

Robert Bruggeman, Hernán Zaballa, Nicholas Teasdale and Stephen Gatley, each directors of the Corporation, John Miniotis, President and Chief Executive Officer of the Corporation and David O'Connor, Chief Geologist of the Corporation, reside outside of Canada. Each of these individuals have appointed the Corporation (220 Bay Street, Suite 550, Toronto, Ontario, M5J 2W4) as their agent for service of process. In addition, Luis Rodrigo Peralta, Joseph M. Keane, Miguel Fuentealba and Shaida Miranda, reside outside of Canada. Purchasers are advised that it may not be possible for investors to enforce judgments obtained in Canada against any person that resides outside of Canada, even if the party has appointed an agent for service of process.

PURCHASERS' CONTRACTUAL RIGHTS AND STATUTORY RIGHTS OF WITHDRAWAL AND RESCISSION

Securities legislation in certain of the provinces and territories of Canada provides purchasers with the right to withdraw from an agreement to purchase securities. This right may be exercised within two (2) business days after receipt or deemed receipt of a prospectus or prospectus supplement relating to the Securities purchased by a purchaser and any amendment thereto. In several of the provinces and territories, the securities legislation further provides a purchaser with remedies for rescission or, in some jurisdictions, revisions of the price or damages if the prospectus and any amendment contains a misrepresentation or is not delivered to the purchaser, provided that the remedies for rescission, revisions of the price or damages are exercised by the purchaser within the time limit prescribed by the securities legislation of the purchaser's province or territory. The purchaser should refer to any applicable provisions of the securities legislation of the purchaser's province or territory for the particulars of these rights or consult with a legal adviser.

In addition, original purchasers of convertible, exchangeable or exercisable Securities (unless the Securities are reasonably regarded by us as incidental to the applicable offering as a whole) will have a contractual right of rescission against us in respect of the conversion, exchange or exercise of the convertible, exchangeable or exercisable Security. The contractual right of rescission will be further described in any applicable prospectus supplement, but will, in general, entitle such original purchaser to receive the amount paid for the applicable convertible, exchangeable or exercisable Security (and any additional amount paid upon conversion, exchange or exercise) upon surrender of the underlying securities acquired thereby, in the event that this prospectus (as supplemented or amended) contains a misrepresentation, provided that: (i) the conversion, exchange or exercise takes place within 180 days of the date of the purchase of the convertible, exchangeable or exercisable Security under this prospectus; and (ii) the right of rescission is exercised within 180 days of the date of the purchaser of the convertible, exchangeable or exercisable security under this prospectus.

In an offering of convertible, exchangeable or exercisable Subscription Receipts, Warrants or convertible, exchangeable or exercisable Debt Securities (or Units comprised partly thereof), investors are cautioned that the statutory right of action for damages for a misrepresentations contained in the prospectus is limited, in certain provincial securities legislation, to the price at which convertible, exchangeable or exercisable Securities are offered to the public under the prospectus offering. This means that, under the securities legislation of certain provinces and territories, if the purchaser pays additional amounts upon the conversion, exchange or exercise of the Security, those amounts may not be recoverable under the statutory right of action for damages that apply in those provinces or territories. The purchaser should refer to any applicable provisions of the securities legislation of the purchaser's province or territory for the particulars of this right of action for damages or consult with a legal advisor.

This contractual right of rescission will be consistent with the statutory right of rescission described under section 130 of the *Securities Act* (Ontario), and is in addition to any other right or remedy available to original purchasers under section 130 of the *Securities Act* (Ontario) or otherwise at law.

CERTIFICATE OF ABRASILVER RESOURCE CORP.

Dated: December 16, 2025

This short form prospectus, together with the documents incorporated in this prospectus by reference, will, as of the date of the last supplement to this prospectus relating to the securities offered by this prospectus and the supplement(s), constitute full, true and plain disclosure of all material facts relating to the securities offered by this prospectus and the supplement(s) as required by the securities legislation of each of the provinces and territories of Canada.
